

Personal Financial Statement

Completing your Personal Financial Statement:

Please complete your Personal Financial Statement in as much detail as possible. If you require additional space, please include an additional sheet of paper. You'll find the statement divided into the following categories:

- **Personal information:** Be sure to supply all relevant details.
- **Employment information:** Complete this section if you are currently employed outside your business. If not, please indicate that you are self-employed.
- **Your statement of net worth:** In this section, estimate the current market value of property such as real estate and your automobile. Include all liabilities, including outstanding balances on credit cards and income taxes owing. Use the blank lines for additional assets and liabilities not listed. Note that details of your assets and bank loans should be supplied in the **detailed description of assets** portion of the statement.
- **Annual income and expenses:** If you have a personal budget for the past year, it will serve as an excellent starting point for this section. Be sure to list income from all sources, before income taxes are deducted. Be sure to include all taxes in the expenses column.
- **Detailed description of assets:** Outline details of major investments in the appropriate categories, estimating their current market values when required. Also list details of outstanding bank loans. If you have other assets or major debts, provide details on a separate sheet.

Please prepare a separate Personal Financial Statement for each owner of the business.
