## Part V Liquidity Information

(For the period)	Nov 19 - Jan 20	Feb 20 - Apr 20	Feb 19 - Apr 19	Nov 19 - Apr 20	Nov 18 - Apr 19
The Average Liquidity Maintenance ratio	72.02%	53.28%	57.50%	62.65%	63.02%

The average LMR for above periods is calculated on the simple average of the average LMR for each calendar month's average and computed in accordance with the Banking (Liquidity) Rules.

### Liquidity

Liquidity risk is the risk of having insufficient cash or its equivalent in a timely and cost-effective manner to meet financial obligations as they come due.

CIBC's approach to liquidity risk management supports our business strategy, aligns with our risk appetite and adheres to regulatory expectations. Our management strategies, objectives and practices are regularly reviewed to align with changes to the liquidity environment, including regulatory, business and/or market developments. Liquidity risk remains within CIBC's risk appetite.

### Governance & Management

Canadian Imperial Bank of Commerce HK Branch (CIBC HK) is a branch of Canadian Imperial Bank of Commerce. CIBC HK's liquidity risk management is governed by the Asia Pacific (AP) Region Supplement to the Liquidity Risk Management Policy which incorporates and details how the AP region adheres to and supports the global CIBC Liquidity Risk Management Policy and the regulatory requirements in the AP jurisdictions.

Liquidity risk is managed using the three lines of defence model, and the ongoing management of liquidity risk is the responsibility of the Treasurer, supported by the Global Asset Liability Committee (GALCO):

- The Treasurer is responsible for managing the activities and processes required for measurement, reporting and monitoring of CIBC's liquidity risk position – this is the first line of defence
- The Liquidity and Non-Trading Market Risk group within Capital Markets Risk Management provides independent oversight, including the measurement, monitoring and control of liquidity risk, as the second line of defence
- Internal Audit provides the third line of defence, with independent assessment of the design and operating effectiveness of liquidity risk management controls, processes and systems

GALCO governs CIBC's liquidity risk management, ensuring liquidity risk framework, policies, methodologies and assumptions are regularly reviewed and, as appropriate, modified to ensure alignment with our operating environment and regulatory requirements.

The Liquidity Risk Management Committee, a subcommittee of GALCO, is responsible for supporting GALCO to ensure that CIBC's liquidity risk profile is comprehensively measured and managed in alignment with CIBC's strategic direction, risk appetite and regulatory requirements.

Locally, in the Asia Pacific region, key liquidity metrics are monitored and discussed where appropriate at the Hong Kong Management Committee (HKMC) and Asia Pacific Management Committee (APMC).

The AP risk appetite statement (RAS) articulates the aggregate levels of risk that the AP Region is willing to assume in pursuit of its strategy and business objectives and sets the basic goals and measurement metrics, which define tolerance levels for various risks.

## Funding Plan

CIBC's funding strategy is centralized at the Canadian parent and funds its operations with client-sourced deposits, supplemented with a wide range of wholesale funding. We routinely access a range of short-term and long-term secured and unsecured funding sources diversified by geography, depositor type, instrument, currency and maturity. We raise long-term funding from existing programs including covered bonds, asset securitizations and unsecured debt. CIBC continuously evaluates opportunities to diversify into new funding products and investor segments in an effort to maximize funding flexibility and minimize concentration and financing costs.

We regularly monitor wholesale funding levels and concentrations to internal limits consistent with our desired liquidity risk profile.

## Liquidity Risk Mitigation

Liquidity management is performed on a consolidated basis to ensure sufficient liquid assets and diversified funding sources to consistently fund our balance sheet and contingent obligations in each jurisdiction and maintain the strength of our enterprise under both normal and stressed market environments.

The Liquidity Maintenance Ratio (LMR) is monitored locally on a daily basis, against regulatory limits of 25% and internal buffer targets which are set more stringent than regulatory requirements. The CIBC HK branch maintains a prudent level of liquid assets comprised primarily of bills issued by the Hong Kong Monetary Authority.

CIBC HK's liquidity monitoring includes:

- i) Deposit and wholesale funding access and concentrations;
- ii) Asset quality, monetization timing and market constraints;
- iii) Reputational, regulatory and macro-economic environments; and
- iv) Pledging and funding commitments, internally and externally and among multiple jurisdictions.

## Stress Testing

A key component of our liquidity risk management, and complementing our assessments of liquidity risk, is liquidity risk stress testing. Liquidity stress testing involves the application of name-specific and market-wide stress scenarios at varying levels of severity to assess the amount of available liquidity required to satisfy anticipated obligations as they come due.

Furthermore, stress scenarios have been developed to incorporate CIBC HK branch specific characteristics, including aspects such as foreign exchange rate volatility, economic stress, asset haircut and monetization depths and interest rate impacts. Stress test reports are used to identify sources of potential CIBC HK liquidity strain and are made available to the APMC.

The results are considered as inputs when developing CIBC AP Region's Contingency Funding Plan.

## Contingency Funding Plan

The AP Region Contingency Funding Plan (CFP) aligns with the Global CFP, and is tailored to the jurisdiction's uniqueness to support CIBC as an enterprise. The AP Region CFP sets out the strategies for addressing liquidity shortfalls in emergency and unexpected situations, delineating CIBC's strategies to manage a range of stress conditions, establishing clear lines of responsibility and articulating invocation and escalation procedures. The AP Region CFP is reviewed and approved regularly by the APMC.
