FICO Equivalent Scores

The following table sets forth the composition of the Portfolio as at February 2018 by FICO equivalent score ranges. To the extent available, Beacon scores from Equifax Canada Inc. are obtained at origination and bi-monthly thereafter. A Beacon score is a measurement that uses information collected by the major Canadian credit bureaus to assess consumer credit risk. Beacon scores rank-order consumers according to the likelihood that their credit obligations will be paid in accordance with the terms of their accounts. Although Equifax Canada Inc. discloses only limited information about the variables it uses to assess credit risk, those variables likely include, but are not limited to, debt level, credit history, payment patterns (including delinquency experience), and level of utilization of available credit. An individual's Beacon score may change over time, depending on the conduct of the individual, including the individual's usage of his or her available credit and changes in the credit score technology used by Equifax Canada Inc.

Beacon scores are based on independent, third-party information, the accuracy of which the Issuer cannot verify. CIBC does not use standardized credit scores, such as a Beacon score, alone for the purpose of credit adjudication.

The information presented in the table below should not be used alone as a method of forecasting whether cardholders will make payments in accordance with the terms of their Cardholder Agreements. Since the future composition of the Portfolio may change over time, the following table is not necessarily indicative of the composition of the Portfolio at any specific time in the future.

FICO Equivalent Scores for the Portfolio As at February 2018

Less than 560 or no score	7.32%	3.69%
Totals.....	100.00%	100.00%

⁽¹⁾ CIBC uses Beacon scores. This table excludes charged off, closed and security fraud accounts. The source of Beacon score information is Equifax Canada Inc. The information in the table above is as of the most recent billing date in February 2018 for the applicable cardholder based on CIBC's monthly billing files.

Portfolio Performance

The following tables set forth the historical performance of the Portfolio in which the Issuer maintains undivided co-ownership interests through ownership of Ownership Interests in respect of (a) the year-to-date amounts for the third quarter of the current fiscal year and the annual amounts for each of the three previous fiscal years, by revenue experience, loss experience and cardholder monthly payment rates and (b) as at February 28, 2018 and the end of each of the three previous fiscal years, by delinquencies.

Revenue Experience

The revenue experience in the following table is presented on a "billed basis", i.e., before deduction for losses. Revenues from interest receivable in respect of credit card receivables will be affected by numerous factors, including the periodic finance charges, the amount of any annual membership fees, other fees paid by cardholders and the percentage of cardholders who pay off their balances in full each month and do not incur periodic finance charges on purchases.

Revenue Experience for the Portfolio

	Nine Months Ended February 28, 2018	Year Ended May 31, 2017	Year Ended May 31, 2016	Year Ended May 31, 2015
	(Dollars in Thousands)			
Amount Billed	\$1,953,142	\$2,486,351	\$2,307,396	\$2,219,303
Daily Average Receivables Outstanding ⁽¹⁾	\$11,603,841	\$10,978,074	\$10,106,193	\$9,853,199
Average Revenue Yield ⁽²⁾	22.50%	22.65%	22.83%	22.52%

⁽¹⁾ Average of the monthly receivables outstanding, where each monthly receivables outstanding is an average of the daily receivables outstanding for a given month.

⁽²⁾ Average Revenue Yield has been annualized for the nine months ended February 28, 2018 and is calculated as the amount billed divided by the daily average receivables outstanding.

The revenues shown in the table above are attributable to periodic finance charges and annual and other fees billed to cardholders and include revenue attributable to the interchange fees payable to CIBC from other financial institutions that clear transactions. The revenues related to periodic finance charges and fees (other than annual fees) necessarily vary from time to time as a result of the collective preference of cardholders to use their credit cards to finance purchases and/or receive cash advances over time rather than for convenience use (where the cardholders pay off their entire balance each month, thereby avoiding periodic finance charges). Revenues also depend in part on the cardholders' use of other services offered by CIBC. Accordingly, revenues will be affected by future changes in the types of charges and fees assessed on the credit card accounts, the respective percentage of the receivables balances of the various types of credit card accounts and the types of credit card accounts under which the receivables arise.
