

CIBC ANNOUNCES FIRST QUARTER 2014 RESULTS

Toronto, ON – Feb 27, 2014 – **CIBC** (TSX: CM) (NYSE: CM) today announced its financial results for the first quarter ended January 31, 2014.

First quarter highlights:

- Reported net income was \$1,177 million, compared with \$785 million for the first quarter a year ago, and \$825 million for the prior quarter.
- Adjusted net income⁽¹⁾ was \$951 million, compared with \$882 million for the first quarter a year ago, and \$894 million for the prior quarter.
- Reported diluted earnings per share was \$2.88, compared with \$1.88 for the prior year quarter, and \$2.02 for the prior quarter.
- Adjusted diluted earnings⁽¹⁾ per share was \$2.31, compared with \$2.12 for the prior year quarter, and \$2.19 for the prior quarter.
- Reported return on common shareholders' equity (ROE) was 27.5% and adjusted ROE⁽¹⁾ was 22.1%.

Results for the first quarter of 2014 were affected by the following items of note aggregating to a positive impact of \$0.57 per share:

- \$239 million (\$183 million after-tax, or \$0.46 per share) gain in respect of the completed Aeroplan transactions with Aimia Canada Inc. (Aimia) and The Toronto-Dominion Bank (TD), net of costs relating to the development of our enhanced travel rewards program;
- \$78 million (\$57 million after-tax, or \$0.14 per share) gain, net of associated expenses, on the sale of an equity investment in our exited European leveraged finance portfolio;
- \$26 million (\$19 million after-tax, or \$0.05 per share) reduction in the portion of the collective allowance recognized in Corporate and Other, including lower estimated credit losses relating to the Alberta floods;
- \$26 million (\$19 million after-tax, or \$0.05 per share) charge resulting from operational changes in the processing of write-offs in Retail and Business Banking;
- \$11 million (\$8 million after-tax, or \$0.02 per share) loss from the structured credit run-off business; and
- \$8 million (\$6 million after-tax, or \$0.01 per share) amortization of intangible assets.

CIBC's Basel III Common Equity Tier 1 ratio at January 31, 2014 was 9.5%, and our Tier 1 capital ratio and Total capital ratio were 11.5% and 14.2%, respectively, on an all-in basis compared to Basel III Common Equity Tier 1 ratio of 9.4%, Tier 1 capital ratio of 11.6% and Total capital ratio of 14.6% in the prior quarter.

CIBC announced a quarterly dividend increase of 2 cents per common share to 98 cents per share.

"Our record results this quarter reflect the progress we continue to make in executing our client-focused strategy," says Gerald T. McCaughey, CIBC President and Chief Executive Officer. "Each of our core businesses delivered strong results. The strength of our underlying fundamentals allows us to generate high returns for our shareholders."

Core business performance

Retail and Business Banking reported net income of \$746 million for the first quarter, up \$166 million or 29% from the same quarter last year. Adjusting for the items of note shown above, adjusted net income⁽¹⁾ was \$643 million, up \$61 million or 11% from the same quarter last year as a result of higher revenue due to volume growth across most products and higher fees, and also due to lower loan losses as a result of lower write-offs and bankruptcies.

During the first quarter of 2014, Retail and Business Banking continued to make progress against our objectives of accelerating profitable revenue growth and enhancing the client experience:

- We launched a significant expansion of our industry-leading mobile payments offer with TELUS, giving more Canadians the opportunity to pay with their phone and furthering CIBC's leadership position in this growing market;
- We began implementing a new partnership with the Greater Toronto Airports Authority as its exclusive financial institution sponsor at Toronto Pearson International, providing CIBC clients and other travellers innovative access to financial services at Canada's largest airport;
- First of the major banks in Canada to offer remote deposit capture, CIBC eDeposit[™], allowing CIBC clients to deposit cheques by simply taking a picture using their smartphone and CIBC's Mobile Banking App; and
- First among the big 5 Canadian banks to launch a pilot program for business banking clients to capture cheque images, enabling them to quickly scan, securely upload and deposit a high volume of cheques in a single transaction using a desktop cheque scanner.

Subsequent to the end of the quarter, we announced an agreement with Tim Hortons to launch a co-branded loyalty rewards Visa credit card.

Wealth Management reported net income of \$114 million for the first quarter, up \$25 million or 28% from the same quarter last year.

Revenue of \$502 million was up \$70 million or 16% compared with the first quarter of 2013, primarily due to higher client assets under management driven by market appreciation and net sales of long-term mutual funds, higher fee-based and commission revenue, the acquisition of Atlantic Trust on December 31, 2013, and higher contribution from our investment in American Century Investments.

During the first quarter of 2014, Wealth Management continued its progress in support of our strategic priority to build our wealth management platform:

- We completed our acquisition of Atlantic Trust, a U.S. private wealth management firm with US\$24 billion in assets under management; and
- We achieved our 20th consecutive quarter of positive net retail sales of long-term mutual funds with \$1.2 billion of net sales.

Wholesale Banking reported net income of \$264 million for the first quarter, up \$55 million or 26% from the prior quarter. Excluding items of note, adjusted net income⁽¹⁾ was \$215 million, comparable with the prior quarter.

In support of its objective to be a leading wholesale bank in Canada and in core Canadian industries in the rest of the world, Wholesale Banking acted as:

- Co-lead arranger and joint bookrunner on Progressive Waste Solutions' US\$1.9 billion revolving credit facility;
- Joint bookrunner on Cardinal Energy's \$248 million initial public offering;
- Financial advisor to Penn-West Petroleum on the sale of certain assets with a value of approximately \$500 million in three separate transactions; and
- Joint bookrunner on TELUS' \$800 million bond offering.

"In summary, CIBC delivered record performance during the quarter," says Mr. McCaughey. "The strategic focus that each of our businesses place on deepening client relationships and driving profitable revenue growth continues to contribute to our financial performance and our ongoing ability to deliver quality, consistent returns."

CIBC in our communities

CIBC is committed to supporting causes that matter to our clients, our employees and our communities. During the guarter:

- CIBC employees donated a record \$4.6 million on CIBC Miracle Day to support kids in-need through over 450 children's charities across Canada, the U.S and in the U.K.;
- Through the generosity of 21,000 employees and retirees as well as a corporate donation, CIBC raised \$12.4 million for the 2013 United Way campaign, an 11% increase over last year;
- CIBC announced the 67 members of CIBC Team Next, a \$2 million investment in amateur athletes from across the country; and

• Thousands joined CIBC to celebrate the Lunar New Year at CIBC Lunarfest in Vancouver and the inaugural CIBC Lion Dance Chinese New Year Celebration in Markham, Ontario.

A NOTE ABOUT FORWARD-LOOKING STATEMENTS: From time to time, we make written or oral forward-looking statements within the meaning of certain securities laws, including in this report, in other filings with Canadian securities regulators or the U.S. Securities and Exchange Commission and in other communications. All such statements are made pursuant to the "safe harbour" provisions of, and are intended to be forward-looking statements under, applicable Canadian and U.S. securities legislation, including the U.S. Private Securities Litigation Reform Act of 1995. These statements include, but are not limited to, statements made in the "Message from the President and Chief Executive Officer", "External reporting changes", "Overview – Financial results, "Overview – Significant events", "Overview – Outlook for calendar year 2014", "Strategic business units overview – Business unit allocations", "Financial condition – Capital resources", "Management of risk – Risk overview", "Management of risk – Credit risk", "Management of risk – Market risk", "Management of risk - Liquidity risk", "Accounting and control matters - Critical accounting policies and estimates", "Accounting and control matters - Regulatory developments" and "Accounting and control matters - Controls and procedures" sections of this report and other statements about our operations, business lines, financial condition, risk management, priorities, targets, ongoing objectives, strategies and outlook for calendar year 2014 and subsequent periods. Forward-looking statements are typically identified by the words "believe", "expect", "anticipate", "intend", "estimate", "forecast", "target", "objective" and other similar expressions or future or conditional verbs such as "will", "should", "would" and "could". By their nature, these statements require us to make assumptions, including the economic assumptions set out in the "Overview -Outlook for calendar year 2014" section of this report, and are subject to inherent risks and uncertainties that may be general or specific. A variety of factors, many of which are beyond our control, affect our operations, performance and results, and could cause actual results to differ materially from the expectations expressed in any of our forward-looking statements. These factors include: credit, market, liquidity, strategic, insurance, operational, reputation and legal, regulatory and environmental risk; the effectiveness and adequacy of our risk management and valuation models and processes; legislative or regulatory developments in the jurisdictions where we operate, including the Dodd-Frank Wall Street Reform and Consumer Protection Act and the regulations issued and to be issued thereunder, the Basel Committee on Banking Supervision's global standards for capital and liquidity reform, and those relating to the payments system in Canada; amendments to, and interpretations of, risk-based capital guidelines and reporting instructions, and interest rate and liquidity regulatory guidance; the resolution of legal and regulatory proceedings and related matters; the effect of changes to accounting standards, rules and interpretations; changes in our estimates of reserves and allowances; changes in tax laws; changes to our credit ratings; political conditions and developments; the possible effect on our business of international conflicts and the war on terror; natural disasters, public health emergencies, disruptions to public infrastructure and other catastrophic events; reliance on third parties to provide components of our business infrastructure; potential disruptions to our information technology systems and services, including the evolving risk of cyber attack; losses incurred as a result of internal or external fraud; the accuracy and completeness of information provided to us concerning clients and counterparties; the failure of third parties to comply with their obligations to us and our affiliates; intensifying competition from established competitors and new entrants in the financial services industry; technological change; global capital market activity; changes in monetary and economic policy; currency value and interest rate fluctuations; general business and economic conditions worldwide, as well as in Canada, the U.S. and other countries where we have operations, including increasing Canadian household debt levels, the high U.S. fiscal deficit and Europe's sovereign debt crisis; our success in developing and introducing new products and services, expanding existing distribution channels, developing new distribution channels and realizing increased revenue from these channels; changes in client spending and saving habits; our ability to attract and retain key employees and executives; our ability to successfully execute our strategies and complete and integrate acquisitions and joint ventures; and our ability to anticipate and manage the risks associated with these factors. This list is not exhaustive of the factors that may affect any of our forward-looking statements. These and other factors should be considered carefully and readers should not place undue reliance on our forward-looking statements. We do not undertake to update any forward-looking statement that is contained in this report or in other communications except as required by law.

External reporting changes

The following external reporting changes were made in the first quarter of 2014. Prior period amounts were restated accordingly.

Amendments to IAS 19 "Employee Benefits"

We adopted amendments to IAS 19 "Employee Benefits" commencing November 1, 2011, which require us to recognize: (i) actuarial gains and losses in Other comprehensive income (OCI) in the period in which they arise; (ii) interest income on plan assets in net income using the same rate as that used to discount the defined benefit obligation; and (iii) all past service costs (gains) in net income in the period in which they arise.

Adoption of IFRS 10 "Consolidated Financial Statements"

We adopted IFRS 10 "Consolidated Financial Statements" commencing November 1, 2012, which replaces IAS 27 "Consolidated and Separate Financial Statements" and Standards Interpretation Committee (SIC) – 12 "Consolidated – Special Purpose Entities". The adoption of IFRS 10 required us to deconsolidate CIBC Capital Trust from the consolidated financial statements, which resulted in a replacement of Capital Trust securities issued by CIBC Capital Trust with Business and government deposits for the senior deposit notes issued by us to CIBC Capital Trust.

Sale of Aeroplan portfolio

On December 27, 2013, we sold approximately 50 percent of our Aerogold VISA portfolio, consisting primarily of credit card only customers, to the Toronto-Dominion Bank (TD). Accordingly, the revenue related to the sold credit card portfolio was moved from Personal Banking to the Other line of business within Retail and Business Banking.

Allocation of Treasury activities

Treasury-related transfer pricing will continue to be charged or credited to each line of business within our Strategic Business Units (SBUs). We changed our approach to allocating the residual financial impact of Treasury activities. Certain fees will be charged directly to the lines of business, and the residual net revenue will now be retained in Corporate and Other.

Income statement presentation

We reclassified certain amounts associated with our self-managed credit card portfolio from Non-interest expenses to Non-interest income. There was no impact on consolidated net income due to this reclassification.

Overview

Financial results

Reported net income for the quarter was \$1,177 million, compared with \$785 million for the same quarter last year and \$825 million for the prior quarter. Adjusted net income⁽¹⁾ for the quarter was \$951 million, compared with \$882 million for the same quarter last year and \$894 million for the prior quarter.

Reported diluted earnings per share (EPS) for the quarter was \$2.88, compared with \$1.88 for the same quarter last year and \$2.02 for the prior quarter. Adjusted diluted EPS⁽¹⁾ for the quarter was \$2.31, compared with \$2.12 for the same quarter last year and \$2.19 for the prior quarter.

Net income for the current quarter was affected by the following items of note:

- \$239 million (\$183 million after-tax) gain in respect of the Aeroplan transactions with Aimia Canada Inc. (Aimia) and TD, net of costs relating to the development of our enhanced travel rewards program (\$123 million after-tax in Retail and Business Banking, and \$60 million after-tax in Corporate and Other). See the "Significant events" section for further details;
- \$78 million (\$57 million after-tax) gain, net of associated expenses, on the sale of an equity investment in our exited European leveraged finance portfolio (Wholesale Banking);
- \$26 million (\$19 million after-tax) reduction in the portion of the collective allowance recognized in Corporate and Other⁽²⁾, including lower estimated credit losses relating to the Alberta floods (Corporate and Other);
- \$26 million (\$19 million after-tax) charge resulting from operational changes in the processing of write-offs in Retail and Business Banking;
- \$11 million (\$8 million after-tax) loss from the structured credit run-off business (Wholesale Banking); and
- \$8 million (\$6 million after-tax) amortization of intangible assets⁽³⁾ (\$1 million after-tax in Retail and Business Banking, \$3 million after-tax in Wealth Management, and \$2 million after-tax in Corporate and Other).

The above items of note increased revenue by \$353 million, non-interest expenses by \$55 million, and income tax expenses by \$72 million. In aggregate, these items of note increased net income by \$226 million.

Net interest income⁽⁴⁾

Net interest income was up \$50 million or 3% from the same quarter last year, primarily due to volume growth across most retail products and higher revenue from corporate banking. These factors were partially offset by lower cards revenue as a result of the Aeroplan transactions noted above, and lower revenue from our exited FirstLine mortgage broker business.

Net interest income was up \$12 million or 1% from the prior quarter, primarily due to volume growth and wider spreads across most retail products, and higher interest income from Wholesale Banking, largely offset by lower cards revenue as a result of the Aeroplan transactions noted above.

Non-interest income⁽⁴⁾

Non-interest income was up \$419 million or 32% from the same quarter last year, primarily due to the gains relating to the Aeroplan transactions with Aimia and TD and the sale of an equity investment in our exited European leveraged finance portfolio, both shown as items of note, and higher mutual fund fees. The same quarter last year included a gain on the sale of our private wealth management business (Asia), also shown as an item of note.

Non-interest income was up \$442 million or 34% from the prior quarter, primarily due to the gains relating to the Aeroplan transactions and the sale of an equity investment noted above. The prior quarter included the impairment of an equity position associated with our exited U.S. leveraged finance portfolio, also shown as an item of note.

Provision for credit losses

Provision for credit losses was down \$47 million or 18% from the same quarter last year. In Retail and Business Banking, the provision was down mainly due to lower write-offs and bankruptcies in the cards portfolio, partially offset by a charge resulting from operational changes in the processing of write-offs, shown as an item of note. In Wholesale Banking, the provision was down due to lower losses in the U.S. real estate finance portfolio. In Corporate and Other, the provision was down primarily due to a reduction in the collective allowance, including lower estimated credit losses relating to the Alberta floods, shown as an item of note. The current quarter also had higher losses in FirstCaribbean International Bank Limited (CIBC FirstCaribbean).

Provision for credit losses was down \$53 million or 20% from the prior quarter. In Retail and Business Banking, the provision was down primarily due to lower losses in the commercial lending portfolio, partially offset by the charge relating to write-offs noted above. In Wholesale Banking, the provision was comparable with the prior quarter. In Corporate and Other, the provision was down primarily due to the reduction in the collective allowance noted above. The current quarter also had lower losses in CIBC FirstCaribbean.

Non-interest expenses

Non-interest expenses were down \$9 million compared with the same quarter last year, primarily due to lower expenses in the structured credit run-off business, which included the Lehman-related settlement charge shown as an item of note in the same quarter last year, largely offset by the costs relating to the development of our enhanced travel rewards program, and to the Aeroplan transactions noted above, as well as higher employee-related compensation and computer, software and office equipment expenses in the current quarter.

Non-interest expenses were up \$49 million or 3% from the prior quarter, primarily due to higher employee-related compensation, partially offset by a restructuring charge relating to CIBC FirstCaribbean, which was included as an item of note in the prior quarter.

⁽¹⁾ For additional information, see the "Non-GAAP measures" section.

⁽²⁾ Relates to collective allowance, except for (i) residential mortgages greater than 90 days delinquent; (ii) personal loans and scored small business loans greater than 30 days delinquent, and (iii) net write-offs for the cards portfolio, which are all reported in the respective SBUs.

⁽³⁾ Beginning in the fourth quarter of 2013, also includes amortization of intangible assets for equity-accounted associates.

⁽⁴⁾ Trading activities and related risk management strategies can periodically shift trading income between net interest income and non-interest income. Therefore, we view total trading income as the most appropriate measure of trading performance.

Income taxes

Income tax expense was up \$133 million or 105% from the same quarter last year, and up \$106 million or 69% from the prior quarter, primarily due to higher income.

In prior years, the Canada Revenue Agency issued reassessments disallowing the deduction of approximately \$3 billion of the 2005 Enron settlement payments and related legal expenses. The matter is currently in litigation. The Tax Court of Canada trial on the deductibility of the Enron payments is scheduled to commence in October 2015.

Should we successfully defend our tax filing position in its entirety, we would recognize an additional accounting tax benefit of \$214 million and taxable refund interest of approximately \$199 million. Should we fail to defend our position in its entirety, we would incur an additional tax expense of approximately \$866 million and non-deductible interest of approximately \$124 million.

Foreign exchange

The estimated impact of U.S. dollar translation on key lines of our interim consolidated statement of income, as a result of changes in average exchange rates, is as follows:

	Jan. 31, 2014	Jan. 31, 2014
\$ millions, for the three months ended	vs. Jan. 31, 2013	vs. Oct. 31, 2013
Estimated increase in:		
Total revenue	\$ 37	\$ 17
Provision for credit losses	3	1
Non-interest expense	15	7
Income taxes	1	1
Net income	18	8
Average US\$ appreciation relative to C\$	8.5%	3.6%

Impact of items of note in prior periods

Net income for the prior quarters was affected by the following items of note:

Q4, 2013

- \$39 million (\$37 million after-tax) restructuring charge relating to CIBC FirstCaribbean (Corporate and Other);
- \$35 million (\$19 million after-tax) impairment of an equity position associated with our exited U.S. leveraged finance portfolio (Wholesale Banking);
- \$24 million (\$18 million after-tax) expenses relating to the development of our enhanced travel rewards program and to the Aeroplan transactions with Aimia and TD (Retail and Business Banking);
- \$15 million (\$11 million after-tax) gain from the structured credit run-off business (Wholesale Banking); and
- \$7 million (\$6 million after-tax) amortization of intangible assets (\$1 million after-tax in Retail and Business Banking, \$2 million after-tax in Wealth Management, and \$3 million after-tax in Corporate and Other).

The above items of note decreased revenue by \$20 million, increased non-interest expenses by \$70 million, and decreased income tax expenses by \$21 million. These items of note decreased net income by \$69 million.

Q1, 2013

- \$148 million (\$109 million after-tax) loss from the structured credit run-off business, including the charge in respect of a settlement of the U.S. Bankruptcy Court adversary proceeding brought by the Estate of Lehman Brothers Holdings, Inc. (Wholesale Banking);
- \$16 million (\$16 million after-tax) gain, net of associated expenses, on the sale of our Hong Kong and Singapore-based private wealth management business (Corporate and Other); and
- \$5 million (\$4 million after-tax) amortization of intangible assets (\$2 million after-tax in Retail and Business Banking and \$2 million after-tax in Corporate and Other).

The above items of note increased revenue by \$28 million, non-interest expenses by \$165 million, and decreased income tax expenses by \$40 million. In aggregate, these items of note decreased net income by \$97 million.

Significant events

Aeroplan Agreements and enhancements to CIBC travel rewards program

On December 27, 2013, CIBC completed the transactions contemplated by the tri-party agreements with Aimia and TD that were announced on September 16, 2013.

CIBC sold to TD approximately 50% of its existing Aerogold VISA credit card portfolio, consisting primarily of credit card only customers. Consistent with its strategy to invest in and deepen client relationships, CIBC retained the Aerogold VISA credit card accounts held by clients with broader banking relationships at CIBC.

The portfolio divested by CIBC consisted of \$3.3 billion of credit card receivables. Upon closing, CIBC received a cash payment from TD equal to the credit card receivables outstanding being acquired by TD.

CIBC also received upon closing, in aggregate, \$200 million in upfront payments from TD and Aimia.

In addition to these amounts, CIBC released \$81 million of allowance for credit losses related to the sold portfolio, and incurred \$3 million in direct costs related to the transaction in the three months ended January 31, 2014. The net gain on sale of the sold portfolio recognized in the three months ended January 31, 2014, which includes the upfront payments, release of allowance for credit losses and costs related to the transaction, is \$278 million (\$211 million after-tax).

Under the terms of the agreements:

- CIBC continues to have rights to market the Aeroplan program and originate new Aerogold cardholders through its CIBC branded channels.
- The parties have agreed to certain provisions to compensate for the risk of cardholder migration from one party to another. There is potential for payments of up to \$400 million by TD/Aimia or CIBC for net cardholder migration over a period of 5 years.
- CIBC expects to receive annual commercial subsidy payments from TD of approximately \$38 million per year in each of the three years after closing.
- The CIBC and Aimia agreement includes an option for either party to terminate the agreement after the third year and provides for penalty payments
 due from CIBC to Aimia if holders of Aeroplan credit cards from CIBC's retained portfolio switch to other CIBC credit cards above certain thresholds.
- CIBC is working with TD under an interim servicing agreement to effect a smooth transition of the cardholders moving to TD.

In conjunction with the completion of the Aeroplan transaction, CIBC has fully released Aimia and TD from any potential claims in connection with TD becoming Aeroplan's primary financial credit card partner.

Separate from the tri-party agreements, CIBC continues with its plan to provide enhancements to our proprietary travel rewards program, delivering on our commitment to give our clients access to a market leading travel rewards program. The enhanced program is built on extensive research and feedback from our clients and from Canadians about what they want from their travel rewards card.

CIBC incurred incremental costs of \$39 million (\$28 million after-tax) in respect of supporting the tri-party agreements and in respect of the development of our enhanced travel rewards program in the three months ended January 31, 2014.

The aggregate increase in pre-tax income of \$239 million (\$183 million after-tax) in respect of the above has been treated as an item of note.

Atlantic Trust Private Wealth Management

On December 31, 2013, CIBC completed the acquisition of Atlantic Trust Private Wealth Management (Atlantic Trust) from its parent company, Invesco Ltd., for \$224 million (US\$210 million) plus working capital and other adjustments. Atlantic Trust, which has approximately US\$24 billion in assets under management (AUM), provides integrated wealth management solutions for high-net-worth individuals, families, foundations and endowments in the United States. The results of the acquired business have been consolidated from the date of close and are included in the Wealth Management SBU. For additional information, see Note 3 to our interim consolidated financial statements.

Sale of equity investment

On November 29, 2013, CIBC sold an equity investment that was previously acquired through a loan restructuring in CIBC's exited European leveraged finance business. The transaction resulted in an after-tax gain, net of associated expenses, of \$57 million.

(1) Certain information has been restated to reflect the changes in accounting policies stated in Note 1 to the interim consolidated financial statements and to conform to the presentation adopted in the current period.

(2) Wholesale Banking revenue and income taxes are reported on a taxable equivalent basis (TEB) with an equivalent offset in the revenue and income taxes of Corporate and Other.

Our quarterly results are modestly affected by seasonal factors. The second quarter has fewer days as compared with the other quarters, generally leading to lower earnings. The summer months (July – third quarter and August – fourth quarter) typically experience lower levels of capital markets activity, which affects our brokerage, investment management, and wholesale banking activities.

Revenue

Retail and Business Banking revenue has benefitted from volume growth across most retail products, offset to some extent by the continued low interest rate environment and attrition in our exited FirstLine mortgage broker business. The current quarter included the gain relating to the Aeroplan transactions with Aimia and TD, partially offset by lower cards revenue as a result of these transactions.

Wealth Management revenue has benefitted from higher average AUM and strong net sales of long-term mutual funds. The current quarter also included the impact of the acquisition of Atlantic Trust on December 31, 2013.

Wholesale Banking revenue is influenced to a large extent by capital markets conditions, and growth in the equity derivatives business which has resulted in higher tax-exempt income. Revenue has also been impacted by the volatility in the structured credit run-off business. The current quarter included a gain on the sale of an equity investment in our exited European leveraged finance portfolio. The fourth quarter of 2012 included a gain on sale of interests in entities in relation to the acquisition of TMX Group Inc. and the loss relating to the change in valuation of collateralized derivatives to an overnight index swap (OIS) basis. The second quarter of 2012 included a hedge accounting loss on leveraged leases.

Corporate and Other includes the offset related to tax-exempt income noted above. The current quarter included the gain relating to the Aeroplan transactions noted above and the first quarter of 2013 included the gain on sale of the private wealth management business (Asia).

Provision for credit losses

Provision for credit losses is dependent upon the credit cycle in general and on the credit performance of the loan portfolios. In Retail and Business Banking, losses in the cards portfolio declined throughout 2012 and 2013. The current quarter had a charge resulting from operational changes in the processing of write-offs and the third quarter of 2013 had a charge resulting from a revision of estimated loss parameters on our unsecured lending portfolios. In Wholesale Banking, the second and third quarter of 2013 had higher losses in the exited European leveraged finance portfolio, and the fourth quarter of 2012 included losses in the exited U.S. leveraged finance portfolio. 2012 also included higher losses in the U.S. real estate finance portfolio. In Corporate and Other, the third quarter of 2013 had an increase in the collective allowance, which included estimated credit losses relating to the Alberta floods, while the current quarter included a decrease in collective allowance, including partial reversal of the credit losses relating to the Alberta floods.

Non-interest expenses

Non-interest expenses have fluctuated over the period largely due to changes in employee-related compensation and benefits, including pension expense. The current quarter and the prior quarter had expenses relating to the development of our enhanced travel rewards program, and to the Aeroplan transactions with Aimia and TD. The prior quarter also had a restructuring charge relating to CIBC FirstCaribbean. The first quarter of 2013 had higher expenses in the structured credit run-off business.

Income taxes

Income taxes vary with changes in income subject to tax, and the jurisdictions in which the income is earned. Taxes can also be affected by the impact of significant items. Tax-exempt income has generally been trending higher for the periods presented in the table above.

Outlook for calendar year 2014

Global growth is expected to improve in 2014, helped by a diminished burden from fiscal tightening in both the U.S. and Europe, and a continuation of stimulative monetary policy. U.S. real gross domestic product (GDP) is expected to accelerate to approximately 3% as we move past the drag from tax hikes that affected 2013. A further climb in home building, and the lift to household incomes and credit quality from ongoing job creation should also help U.S. real GDP. Europe looks to have emerged from recession. Although some emerging markets are facing domestic policy challenges, they will benefit from improved global trade volumes. Canada's growth rate should improve to the 2.0% to 2.5% range, as firmer global conditions support exports and capital spending, offsetting a slower pace of housing construction and continued restraint in government program spending. Consumer demand will be sustained at moderate growth rates by job creation. Both the U.S. Federal Reserve and the Bank of Canada are likely to wait until 2015 before raising short-term interest rates, although longer term rates could increase through the year in anticipation of that future policy turn.

In Retail banking, household credit demand, which has picked up due to faster mortgage growth, could decelerate later in the year if mortgage rates begin to climb and housing sales slow. Demand for business credit should pick up later in the year as more optimism emerges on capital spending. A further drop in the unemployment rate should support household credit quality, but there is little room for business and household insolvency rates to drop from what are already very low levels. Wealth management should see an improvement in demand for equities and other higher risk assets as global growth improves. Wholesale banking should benefit from rising capital spending that increases the demand for corporate lending and debt financing, and provincial governments will still have elevated borrowing needs, including those related to infrastructure projects. A sturdier global climate could reduce uncertainties that held back equity issuance in the prior year.

Non-GAAP measures

We use a number of financial measures to assess the performance of our business lines. Some measures are calculated in accordance with GAAP (IFRS), while other measures do not have a standardized meaning under GAAP, and accordingly, these measures may not be comparable to similar measures used by other companies. Investors may find these non-GAAP measures useful in analyzing financial performance. For a more detailed discussion on our non-GAAP measures, see page 12 of the 2013 Annual Report. The following table provides a reconciliation of non-GAAP to GAAP measures related to CIBC on a consolidated basis.

CIBC has three SBUs – Retail and Business Banking, Wealth Management and Wholesale Banking. These SBUs are supported by six functional groups – Technology and Operations, Corporate Development, Finance, Treasury, Administration, and Risk Management, which form part of Corporate and Other. The expenses of these functional groups are generally allocated to the business lines within the SBUs. Corporate and Other also includes our International banking operations comprising mainly CIBC FirstCaribbean, strategic investments in the CIBC Mellon joint ventures and The Bank of N.T. Butterfield & Son Limited, and other income statement and balance sheet items not directly attributable to the business lines.

Business unit allocations

Treasury activities impact the reported financial results of the SBUs. Each line of business within our SBUs is charged or credited with a market-based cost of funds on assets and liabilities, respectively, which impacts the revenue performance of the SBUs. Once the interest and liquidity risk inherent in our clientdriven assets and liabilities is transfer priced into Treasury, it is managed within CIBC's risk framework and limits. The residual financial results associated with Treasury activities are reported in Corporate and Other. Capital is attributed to the SBUs in a manner that is intended to consistently measure and align economic costs with the underlying benefits and risks associated with SBU activities. Earnings on unattributed capital remain in Corporate and Other. We review our transfer pricing methodologies on an ongoing basis to ensure they reflect changing market environments and industry practices.

To measure and report the results of operations of the lines of business within our Retail and Business Banking and Wealth Management SBUs, we use a Manufacturer/Customer Segment/Distributor Management Model. The model uses certain estimates and allocation methodologies in the preparation of segmented financial information. Under this model, internal payments for sales and trailer commissions and distribution service fees are made among the lines of business and SBUs. Periodically, the sales and trailer commission rates paid to customer segments for certain products are revised and applied prospectively.

Non-interest expenses are attributed to the SBUs to which they relate based on appropriate criteria. Revenue, expenses, and other balance sheet resources related to certain activities are fully allocated to the lines of business within the SBUs.

The individual allowances and related provisions are reported in the respective SBUs. The collective allowances and related provisions are reported in Corporate and Other except for: (i) residential mortgages greater than 90 days delinquent; (ii) personal loans and scored small business loans greater than 30 days delinquent; and (iii) net write-offs for the cards portfolio, which are all reported in the respective SBUs. All allowances and related provisions for CIBC FirstCaribbean are reported in Corporate and Other.

Retail and Business Banking

Retail and Business Banking provides clients across Canada with financial advice, banking, investment, and authorized insurance products and services through a strong team of advisors and more than 1,100 branches, as well as our ABMs, mobile sales force, telephone banking, online and mobile banking.

Financial overview

Net income for the quarter was \$746 million, up \$166 million from the same quarter last year, primarily due to higher revenue, partially offset by higher non-interest expenses.

Net income was up \$133 million from the prior quarter, mainly due to higher revenue.

Revenue

Revenue was up \$245 million or 12% from the same quarter last year.

Personal banking revenue was up \$94 million, due to volume growth across most products, higher fees and wider spreads.

Business banking revenue was comparable with the same quarter last year, as narrower spreads were offset by volume growth and higher fees.

Other revenue was up \$154 million, mainly due to the gain relating to the Aeroplan transactions with Aimia and TD shown as an item of note, partially offset by lower cards revenue as a result of these transactions, and lower revenue from our exited FirstLine mortgage broker business.

Revenue was up \$168 million or 8% from the prior quarter.

Personal banking revenue was up \$21 million, primarily due to volume growth and wider spreads.

Business banking revenue was down \$6 million, primarily due to narrower spreads.

Other revenue was up \$153 million, mainly due to the gain relating to the Aeroplan transactions noted above, partially offset by lower cards revenue as a result of these transactions.

Provision for credit losses

Provision for credit losses was down \$31 million from the same quarter last year, mainly due to lower write-offs and bankruptcies in the cards portfolio, partially offset by a charge resulting from operational changes in the processing of write-offs, shown as an item of note.

Provision for credit losses was down \$5 million from the prior quarter, primarily due to lower losses in the commercial lending portfolio, partially offset by the charge relating to write-offs noted above.

Non-interest expenses

Non-interest expenses were up \$58 million or 6% from the same quarter last year, primarily due to the costs relating to the development of our enhanced travel rewards program, and to the Aeroplan transactions noted above.

Non-interest expenses were comparable with the prior quarter.

Income taxes

Income taxes were up \$52 million and \$40 million from the same quarter last year and the prior quarter, respectively, primarily due to higher income.

Wealth Management

Wealth Management provides relationship-based advisory services and an extensive suite of leading investment solutions to meet the needs of institutional, retail and high net worth clients. Our asset management, retail brokerage and private wealth management businesses combine to create an integrated offer, delivered through more than 1,500 advisors across Canada and the U.S.

Financial overview

Net income for the quarter was \$114 million, up \$25 million from the same quarter last year, and up \$11 million from the prior quarter, primarily due to higher revenue, partially offset by higher non-interest expenses.

Revenue

Revenue was up \$70 million or 16% from the same quarter last year.

Retail brokerage revenue was up \$25 million, mainly due to higher fee-based and commission revenue.

Asset management revenue was up \$28 million, primarily due to higher client AUM driven by market appreciation and net sales of long-term mutual funds, and higher contribution from our equity-accounted investment in American Century Investments.

Private wealth management revenue was up \$17 million, mainly due to the acquisition of Atlantic Trust on December 31, 2013, and higher AUM driven by client growth.

Revenue was up \$32 million or 7% from the prior quarter.

Retail brokerage revenue was up \$12 million, primarily due to higher fee-based revenue.

Asset management revenue was up \$7 million, primarily due to higher client AUM driven by market appreciation and net sales of long-term mutual funds.

Private wealth management revenue was up \$13 million, mainly due to higher AUM, including the impact of the acquisition noted above.

Non-interest expenses

Non-interest expenses were up \$35 million or 11% from the same quarter last year, and up \$16 million or 5% from the prior quarter, primarily due to higher employee-related compensation.

Income taxes

Income taxes were up \$11 million from the same quarter last year and up \$7 million from the prior quarter mainly due to higher income.

Wholesale Banking

Wholesale Banking provides a wide range of credit, capital markets, investment banking and research products and services to government, institutional, corporate and retail clients in Canada and in key markets around the world.

Certain information has been restated to reflect the changes in accounting policies stated in Note 1 to the interim consolidated financial statements and to conform to the presentation adopted in the current period.

(3) Revenue and income taxes are reported on a TEB basis. Accordingly, revenue and income taxes include a TEB adjustment of \$110 million for the quarter ended January 31, 2014 (October 31, 2013: \$78 million; January 31, 2013: \$92 million). The equivalent amounts are offset in the revenue and income taxes of Corporate and Other.
 (4) For additional information, see the "Non-GAAP measures" section.

Financial overview

Net income for the guarter was \$264 million, up \$178 million from the same guarter last year, mainly due to higher revenue and lower non-interest expenses. Net income was up \$55 million from the prior quarter, mainly due to higher revenue, partially offset by higher non-interest expenses.

Revenue

Revenue was up \$123 million or 22% from the same quarter last year.

Capital markets revenue was up \$3 million, primarily due to higher revenue from foreign exchange and equity derivatives trading, partially offset by a lower reversal of credit valuation adjustments (CVA) against credit exposures to derivative counterparties (other than financial guarantors) and lower debt and equity issuance revenue.

Corporate and investment banking revenue was up \$39 million, mainly due to higher revenue from corporate banking and U.S. real estate finance and higher investment portfolio gains, partially offset by lower advisory and equity new issuance revenue.

Other revenue was up \$81 million, primarily due to the gain on the sale of an equity investment in our exited European leveraged finance portfolio, shown as an item of note, partially offset by losses in the structured credit run-off business compared with gains in the prior year quarter.

Revenue was up \$160 million or 31% from the prior quarter.

Capital markets revenue was up \$51 million, mainly due to higher revenue from foreign exchange and equity derivatives trading, partially offset by lower debt issuance revenue.

Corporate and investment banking revenue was up \$4 million, primarily due to higher corporate banking and advisory revenue, partially offset by lower revenue in U.S. real estate finance.

Other revenue was up \$105 million from the prior quarter, primarily due to the gain on the sale of an equity investment noted above, partially offset by losses in the structured credit run-off business compared with gains in the prior guarter. The prior guarter included the impairment of an equity position associated with our exited U.S. leveraged finance portfolio, shown as an item of note.

Provision for credit losses

Provision for credit losses was down \$8 million from the same quarter last year, due to lower losses in the U.S. real estate finance portfolio. Provision for credit losses was comparable with the prior guarter.

Non-interest expenses

Non-interest expenses were down \$116 million or 26% from the same quarter last year, mainly due to higher expenses in the structured credit run-off business related to the charge in respect of a settlement of the U.S. Bankruptcy Court adversary proceeding brought by the Estate of Lehman Brothers Holdings, Inc. in the prior year guarter, partially offset by higher performance-based compensation.

Non-interest expenses were up \$58 million or 21% from the prior guarter, mainly due to higher performance-based compensation.

Income taxes

Income taxes for the guarter were up \$69 million from the same guarter last year, primarily due to higher income.

Income taxes for the guarter were up \$44 million from the prior guarter, primarily due to higher income and the impact of changes in the proportion of income subject to varying rates of tax in different jurisdictions.

Structured credit run-off business

The results of the structured credit run-off business are included in the Wholesale Banking SBU.

Results

\$ millions, for the three months ended	2014	2013	2013
	Jan. 31	Oct. 31	Jan. 31
Net interest income (expense)	\$ (13)	\$ (12)	\$ (14)
Trading income	5	15	18
Designated at fair value (FVO) losses	(2)	(2)	(3)
Other income	-	16	5
Total revenue	(10)	17	6
Non-interest expenses	1	2	154
Income (loss) before taxes	(11)	15	(148)
Income taxes	(3)	4	(39)
Net income (loss)	\$ (8)	\$ 11	\$ (109)

Net loss for the quarter was \$8 million (US\$7 million), compared with \$109 million (US\$110 million) for the same quarter last year and net income of \$11 million (US\$10 million) for the prior quarter.

Net loss for the quarter was mainly due to net interest expense and a decrease in the value of receivables related to protection purchased from financial guarantors (on loan assets that are carried at amortized cost), resulting from an increase in the mark-to-market (MTM) of the underlying positions, partially offset by gains on unhedged positions and a reduction in CVA relating to financial guarantors.

Position summary

The following table summarizes our positions within our structured credit run-off business:

 Excluded from the table above are equity available-for-sale (AFS) securities that we obtained in consideration for commutation of our U.S. residential mortgage market (USRMM) contracts with financial guarantors with a carrying value of US\$14 million (October 31, 2013: US\$10 million).

USRMM – collateralized debt obligation (CDO)

Our net USRMM position, consisting of a written credit derivative, amounted to US\$69 million. This position was hedged through protection purchased from a large U.S.-based diversified multinational insurance and financial services company with which we have market-standard collateral arrangements.

Collateralized loan obligation (CLO)

CLO positions consist of senior tranches of CLOs backed by diversified pools of primarily U.S. (63%) and European-based (35%) senior secured leveraged loans. As at January 31, 2014, approximately 32% of the total notional amount of the CLO tranches was rated equivalent to AAA, 64% was rated between the equivalent of AA+ and AA-, and the remainder was the equivalent of A+ or lower. As at January 31, 2014, approximately 17% of the underlying collateral was rated equivalent to BB- or higher, 56% was rated between the equivalent of B+ and B-, 66% was rated equivalent to CCC+ or lower, with the remainder unrated. The CLO positions have a weighted-average life of 2.0 years and average subordination of 30%.

Corporate debt

Corporate debt exposure consists of a large matched super senior derivative, where CIBC has purchased and sold credit protection on the same reference portfolio. The reference portfolio consists of highly diversified, predominantly investment grade corporate credit. Claims on these contracts do not occur until cumulative credit default losses from the reference portfolio exceed 30% during the remaining 35-month term of the contract. On this reference portfolio, we have sold protection to an investment dealer.

Other

Our significant positions in the Investments and Ioans section within Other, as at January 31, 2014, include:

- Variable rate Class A-1/A-2 notes classified as trading securities with a notional value of US\$260 million and a fair value of US\$231 million, tracking notes classified as AFS with a notional value of US\$6 million and a fair value of US\$2 million, and loans with a notional value of US\$57 million and fair value and carrying value of nil. These notes were originally received in exchange for our non-bank sponsored asset-backed commercial paper (ABCP) in January 2009, upon the ratification of the Montreal Accord restructuring;
- US\$156 million notional value of CDOs consisting of trust preferred securities (TruPs) collateral, which are Tier I Innovative Capital Instruments issued by U.S. regional banks and insurers. These securities are classified as FVO securities and had a fair value of US\$130 million;
- US\$95 million notional value of CDO trading securities with collateral consisting of high-yield corporate debt portfolios with a fair value of US\$81 million; and
- US\$40 million notional value of an asset-backed security (ABS) classified as a loan, with fair value of US\$37 million and carrying value of US\$36 million.

Our significant positions in the Written credit derivatives, liquidity and credit facilities section within Other, as at January 31, 2014, include:

- US\$269 million notional value of written credit derivatives with a fair value of US\$39 million, on inflation-linked notes, and CDO tranches with collateral consisting of non-U.S. residential mortgage-backed securities and TruPs; and
- US\$177 million of undrawn Margin Funding Facility related to the Montreal Accord restructuring.

Unmatched

The underlying in our unmatched position is a reference portfolio of corporate debt.

Credit protection purchased from financial guarantors and other counterparties

The following table presents the notional amounts and fair values of credit protection purchased from financial guarantors and other counterparties by counterparty credit quality, based on external credit ratings (Standard & Poor's (S&P) and/or Moody's Investors Service (Moody's)), and the underlying referenced assets. Excluded from the table below are certain performing loans and tranched securities positions in our continuing businesses, with a total notional amount of approximately US\$45 million, which are partly secured by direct guarantees from financial guarantors or by bonds guaranteed by financial guarantors.

			Notior	nal ar	mounts	of re	eference	d assets	5		Credit protection purch from financial guarant and other counterpart

Non-investment grade	44		-		-		129		-	173		16		(9)		7		
Unrated	1,618		-		-		28		-	1,646		29		(12)		17		
	4,175		-		-		185		-	4,360		98		(30)		68		
Other counterparties (1)																		
Investment grade	126		10		229		12		-	377		164		1		165		
Unrated	-		3,990		-		-		449	4,439		16		-		16		
	126		4,000		229		12		449	4,816		180		1		181		
	\$ 4,301	\$	4,000	\$	229	\$	197	\$	449	\$ 9,176	\$	278	\$	(29)	\$	249		
October 31, 2013	\$ 4,642	\$	4,271	\$	241	\$	229	\$	480	\$ 9,863	\$	312	\$	(37)	\$	275		

(1) In cases where more than one credit rating agency provides ratings and those ratings differ, we use the lowest rating.

The unrated other counterparties is primarily one Canadian conduit. The conduit is in compliance with collateral posting arrangements and has posted collateral exceeding current market exposure. The fair value of the collateral as at January 31, 2014 was US\$271 million relative to US\$16 million of net exposure.

Lehman Brothers bankruptcy proceedings

During 2013, we recognized a US\$150 million charge (US\$110 million after-tax) in respect of the full settlement of the U.S. Bankruptcy Court adversary proceeding brought by the Estate of Lehman Brothers Holdings, Inc. challenging the reduction to zero of our unfunded commitment on a variable funding note. In 2008, we recognized a US\$841 million gain on the variable funding note.

Corporate and Other

Corporate and Other includes the six functional groups – Technology and Operations, Corporate Development, Finance, Treasury, Administration, and Risk Management – that support CIBC's SBUs. The expenses of these functional groups are generally allocated to the business lines within the SBUs. Corporate and Other also includes our International banking operations comprising mainly CIBC FirstCaribbean, strategic investments in the CIBC Mellon joint ventures and The Bank of N.T. Butterfield & Son Limited, and other income statement and balance sheet items not directly attributable to the business lines.

(3) TEB adjusted. See footnote 3 in "Wholesale Banking" section for additional details.

Financial overview

Net Income for the quarter was \$53 million, up \$23 million from the same quarter last year, mainly due to higher revenue, partially offset by higher noninterest expenses.

Net Income for the quarter was \$53 million, compared to net loss of \$100 million in the prior quarter, mainly due to higher revenue, lower provision for credit losses and non-interest expenses.

Revenue

Revenue was up \$31 million or 19% from the same quarter last year.

International banking revenue was down \$9 million, primarily due to the gain on the sale of our private wealth management (Asia) business included as an item of note in the same guarter last year, partially offset by higher revenue from CIBC FirstCaribbean.

Other revenue was up \$40 million mainly due to the gain relating to the Aeroplan transactions with Aimia and TD, shown as an item of note. This was partially offset by lower treasury revenue and a higher TEB adjustment.

Revenue was up \$94 million or 91% from the prior quarter.

International banking revenue was up \$6 million, due to higher revenue from CIBC FirstCaribbean.

Other revenue was up \$88 million, primarily due to the gain relating to the Aeroplan transactions noted above.

Provision for credit losses

Provision for credit losses was down \$7 million from the same quarter last year, primarily due to a reduction in the collective allowance, including lower estimated credit losses relating to the Alberta floods, shown as an item of note. The current quarter also had higher losses in CIBC FirstCaribbean.

Provision for credit losses was down \$49 million from the prior quarter, primarily due to the reduction in the collective allowance noted above. The current quarter also had lower losses in CIBC FirstCaribbean.

Non-interest expenses

Non-interest expenses were up \$14 million or 6% compared with the same quarter last year, primarily due to higher expenses relating to CIBC FirstCaribbean and higher unallocated corporate support costs.

Non-interest expenses were down \$25 million or 9% from the prior quarter, mainly due to a restructuring charge relating to CIBC FirstCaribbean shown as an item of note in the prior quarter, partially offset by higher unallocated corporate support costs.

Income taxes

Income tax benefit was comparable with the same quarter last year.

Income tax benefit was down \$15 million from the prior quarter, primarily due to a lower loss, partially offset by a higher TEB adjustment.

(1) Certain information has been restated to reflect the changes in accounting policies stated in Note 1 to the interim consolidated financial statements and to conform to the presentation adopted in the current period.

Assets

As at January 31, 2014, total assets were up \$2.9 billion or 1% from October 31, 2013.

Cash and deposits with banks decreased by \$106 million or 2%, mostly due to lower treasury deposit placements.

Securities decreased by \$967 million or 1%, primarily due to a decrease in AFS securities, partially offset by an increase in trading securities. AFS securities decreased primarily due to lower Canadian government securities, partially offset by an increase in corporate debt securities. Trading securities increased primarily due to an increase in foreign government securities.

Securities borrowed or purchased under resale agreements decreased \$1.5 billion or 5%, primarily due to treasury investment management activities. Net loans and acceptances increased by \$439 million. Residential mortgages were up \$1.0 billion, primarily due to growth in CIBC-branded mortgages,

partially offset by attrition in the exited FirstLine mortgage broker business. Credit card loans were down \$3.3 billion, primarily due to the sale to TD. Business and government loans and acceptances were up \$2.8 billion, largely due to an increase in our foreign lending portfolio.

Derivative instruments increased by \$4.5 billion or 23%, largely driven by foreign exchange derivatives valuation. Other assets increased \$574 million or 4%, primarily due to the assets acquired as a result of the acquisition of Atlantic Trust.

Liabilities

As at January 31, 2014, total liabilities were up \$2.1 billion or 1% from October 31, 2013.

Deposits decreased by \$828 million, primarily due to lower outstanding secured borrowings, partially offset by retail volume growth. Further details on the composition of deposits are provided in Note 7 to the interim consolidated financial statements.

Obligations related to securities lent or sold short or under repurchase agreements increased \$473 million or 2%, primarily due to client-driven activities. Derivative instruments increased by \$2.5 billion or 13%, largely driven by foreign exchange derivatives valuation.

Equity

As at January 31, 2014, equity increased by \$893 million or 5% from October 31, 2013, primarily due to a net increase in retained earnings and accumulated other comprehensive income (AOCI).

Capital resources

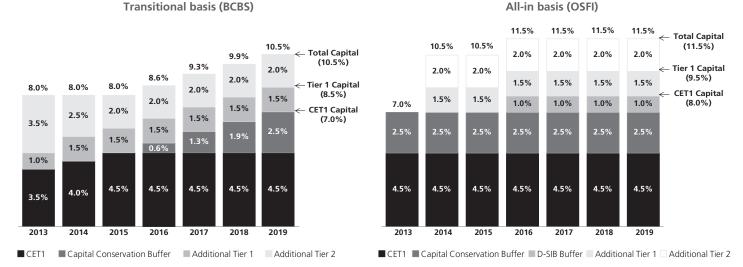

We actively manage our capital to maintain a strong and efficient capital base, to maximize risk-adjusted returns to shareholders, and to meet regulatory requirements. For additional details on capital resources, see pages 29 to 36 of the 2013 Annual Report.

Regulatory capital requirements under Basel III

Our regulatory capital requirements are determined in accordance with guidelines issued by the Office of the Superintendent of Financial Institutions (OSFI) which are based upon the risk-based capital standards developed by the Basel Committee on Banking Supervision (BCBS).

OSFI mandated all institutions to have established a target CET1 ratio of 7%, comprised of the 2019 all-in minimum ratio plus a conservation buffer effective the first quarter of 2013. For the Tier 1 and Total capital ratios, the all-in capital targets are 8.5% and 10.5%, respectively, effective the first quarter of 2014. "All-in" is defined by OSFI as capital calculated to include all of the regulatory adjustments that will be required by 2019, but retaining the phase-out rules for non-qualifying capital instruments. Certain deductions from CET1 capital are phased in at 20% per year from 2014. Amounts not yet deducted from capital under OSFI's transitional rules are risk weighted, creating a difference between RWAs on a transitional and all-in basis.

A comparison of the BCBS transitional capital ratio requirements and the OSFI all-in target capital ratio requirements is as follows.

CET1 capital includes common shares, retained earnings and AOCI (excluding AOCI relating to cash flow hedges), less regulatory adjustments for items such as goodwill and other intangible assets, deferred tax assets, assets related to defined benefit pension plans as reported on our consolidated balance sheet, and certain investments. Additional Tier 1 capital primarily includes preferred shares and innovative Tier 1 notes, and Tier 2 capital consists primarily of subordinated debentures, subject to phase-out rules for capital instruments that are non-qualifying.

OSFI has released its guidance on domestic systemically important banks (DSIBs) and the associated capital surcharge. CIBC is considered to be a DSIB in Canada along with the Bank of Montreal, the Bank of Nova Scotia, the National Bank of Canada, the Royal Bank of Canada, and TD. DSIBs will be subject to a 1% CET1 surcharge commencing January 1, 2016.

Basel leverage ratio requirement

The Basel III capital reforms included a non-risk-based capital metric, the leverage ratio, to supplement risk-based capital requirements. On January 12, 2014, the BCBS issued the full text of its leverage ratio framework which contained some modifications to its consultative document dated June 2013.

The leverage ratio is defined as the Capital Measure (Tier 1 capital) divided by the Exposure Measure. The Exposure Measure includes the sum of: (i) On-balance sheet assets;

- (ii) Adjustments for securities financing transaction exposures with a limited form of netting available if certain conditions are met;
- (iii) Derivative exposures as specified under the rules; and
- (iv) Other off-balance sheet exposures, such as credit commitments and direct credit substitutes, converted into credit exposure equivalents using Basel Standardized Approach credit conversion factors.

Items deducted from Tier 1 capital will be excluded from the Exposure Measure.

The BCBS requires banks to disclose their leverage ratio beginning in 2015. The document states that the BCBS will continue to test whether a minimum requirement of 3% for the leverage ratio is appropriate. Any final adjustments to the rule will be made by 2017, for implementation on January 1, 2018.

OSFI has indicated that it will issue a new leverage guideline later this year. The guideline will be effective in January 2015 and will replace the current assets-to-capital multiple (ACM) test with the Basel III leverage ratio test. Federally regulated deposit-taking institutions will be expected to have Basel III leverage ratios in excess of 3%.

Continuous enhancement to risk-based capital requirements

Last year the BCBS published a number of proposals for changes to the existing risk-based capital requirements (see page 30 of the 2013 Annual Report), and continues to do so with the objective of clarifying and increasing the capital requirements for certain business activities. In addition to the leverage ratio document discussed above, since the start of the fiscal year, the BCBS has published the following updated proposal: "Revisions to the securitisation framework – consultative document".

"Capital requirements for banks' equity investments in funds – final standard" was published in December 2013. The final revised framework applies to banks' investments in the equity of funds that are held in the banking book. The implementation date is January 1, 2017. Banks should look-through to the underlying assets of the fund in order to more properly reflect the risk of those investments. A fund's use of leverage should also be considered when determining risk-based capital requirements associated with investments in the fund. The BCBS recognizes that a full look-through approach may not always be feasible to apply, and that alternative approaches are warranted under certain circumstances.

Regulatory capital

Our capital ratios and ACM are presented in the table below:

\$ millions, as at	2014 Jan. 31	2013 Oct. 31
Transitional basis		
CET1 capital	\$ 16,705 \$	16,698
Tier 1 capital	17,851	17,830
Total capital	21,295	21,601
RWA	153,245	151,338
CET1 ratio	10.9%	11.0%
Tier 1 capital ratio	11.6%	11.8%
Total capital ratio	13.9%	14.3%
ACM	18.4 x	18.0 x
All-in basis		
CET1 capital	\$ 13,347 \$	12,793
Tier 1 capital	16,189	15,888
Total capital	19,890	19,961
RWA	140,505	136,747
CET1 ratio	9.5%	9.4%
Tier 1 capital ratio	11.5%	11.6%
Total capital ratio	14.2%	14.6%

Capital ratios (All-in basis)

CET1 ratio increased 0.1% from October 31, 2013. CET1 capital increased due to internal capital generation (net income less dividends and shares repurchased for cancellation). This helped to offset an increase in RWAs during the quarter.

RWAs increased by \$3.8 billion over the quarter, primarily driven by the impact of foreign exchange movements, commencement of the phase-in of the credit valuation capital charge and normal business growth, partially offset by the sale of the Aeroplan portfolio.

АСМ

The ACM increased 0.4 times from October 31, 2013. This was due to a combination of a decrease in capital for ACM purposes along with an increase in gross assets for ACM purposes this quarter.

Significant capital management activity

Normal course issuer bid

On September 5, 2013, we announced that the Toronto Stock Exchange had accepted the notice of CIBC's intention to commence a new normal course issuer bid. Purchases under this bid commenced on September 18, 2013 and will terminate upon the earlier of (i) CIBC purchasing up to a maximum of 8 million common shares, (ii) CIBC providing a notice of termination, or (iii) September 8, 2014.

During the quarter ended January 31, 2014, we purchased and cancelled an additional 1,415,100 common shares under this bid at an average price of \$89.87 for a total amount of \$127 million.

Dividends

On February 26, 2014, the Board of Directors approved an increase in our quarterly common share dividend from \$0.96 per share to \$0.98 per share for the quarter ending April 30, 2014.

Off-balance sheet arrangements

We enter into off-balance sheet arrangements in the normal course of our business. We consolidate all of our sponsored trusts that securitize our own assets with the exception of the commercial mortgage securitization trust.

CIBC-sponsored conduits

We sponsor a single-seller conduit and several multi-seller conduits (collectively, the conduits) in Canada.

As at January 31, 2014, the underlying collateral for various asset types in our non-consolidated sponsored multi-seller conduits amounted to \$2.0 billion (October 31, 2013: \$2.1 billion). The estimated weighted-average life of these assets was 1.0 years (October 31, 2013: 1.1 years). Our holdings of commercial paper issued by our non-consolidated sponsored multi-seller conduits that offer commercial paper to external investors were \$15 million (October 31, 2013: \$9 million). Our committed backstop liquidity facilities to these conduits were \$3.1 billion (October 31, 2013: \$3.2 billion). We also provided credit facilities of \$30 million (October 31, 2013: \$30 million) to these conduits as at January 31, 2014.

We participated in a syndicated facility for a 3-year commitment of \$575 million to our single-seller conduit that provides funding to franchisees of a major Canadian retailer. Our portion of the commitment was \$110 million (October 31, 2013: \$110 million). As at January 31, 2014, we funded \$84 million (October 31, 2013: \$81 million) through the issuance of bankers' acceptances.

(1) Excludes securities issued by, retained interest in, and derivatives with entities established by Canada Mortgage and Housing Corporation (CMHC), Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac), Government National Mortgage Association (Ginnie Mae), Federal Home Loan Banks, Federal Farm Credit Bank, and Student Loan Marketing Association (Sallie Mae). \$3.0 billion (October 31, 2013: \$3.0 billion) of the exposures related to CIBC-structured vehicles and third-party structured vehicles – structured credit run-off were hedged.

(2) The negative fair value recorded on the interim consolidated balance sheet was \$348 million (October 31, 2013: \$368 million). Notional of \$2.6 billion (October 31, 2013: \$2.7 billion) was hedged with credit derivatives protection from third parties. The fair value of these hedges net of CVA was \$212 million (October 31, 2013: \$213 million). An additional notional of \$156 million (October 31, 2013: \$161 million) was hedged through a limited recourse note. Accumulated fair value losses were \$14 million (October 31, 2013: \$15 million) on unhedged written credit derivatives.

Additional details of our structured entities are provided in Note 6 to the interim consolidated financial statements. Details of our other off-balance sheet arrangements are provided on pages 36 and 37 of the 2013 Annual Report.

Management of risk

Our approach to management of risk, and our governance structure, have not changed significantly from that described on pages 38 to 72 of the 2013 Annual Report. Certain disclosures in this section have been shaded as they are required under IFRS 7 "Financial Instruments – Disclosures" and form an integral part of the interim consolidated financial statements.

Risk overview

Most of CIBC's business activities involve, to a varying degree, a variety of risks, and effective management of risks is fundamental to CIBC's success. Our objective is to balance the level of risk with our business objectives for growth and profitability in order to achieve consistent and sustainable performance while remaining within our risk appetite.

Our risk appetite defines tolerance levels for various risks. This is the foundation for our risk management culture, and our risk management framework. Our risk management framework includes:

- The Board-approved risk appetite statement;
- Risk policies, procedures and limits to align activities with our risk appetite;
- Regular risk reports to identify and communicate risk levels;
- An independent control framework to identify and test compliance with key controls;
- Stress testing to consider potential impacts of changes in the business environment on capital, liquidity and earnings;
- Proactive consideration of risk mitigation options in order to optimize results; and
- Oversight through our risk-focused committees and governance structure.

Managing risk is a shared responsibility at CIBC. Business units and risk management professionals work in collaboration to ensure that business strategies and activities are consistent with our risk appetite. CIBC's approach to enterprise-wide risk management aligns with the three lines of defence model:

- (1) CIBC's lines of business are responsible for all risks associated with their activities this is the first line of defence;
- (2) As the second line of defence, CIBC's risk management, compliance and other control functions are responsible for independent oversight of the enterprise-wide risks inherent in CIBC's business activities; and
- (3) As the third line of defence, CIBC's Internal Audit function provides an independent assessment of the design and operating effectiveness of risk management controls, processes and systems.

We continuously monitor our risk profile against our defined risk appetite and related limits, taking actions as needed to maintain an appropriate balance of risk and return. Monitoring our risk profile includes forward-looking analysis of sensitivity to local and global market factors, economic conditions, and political and regulatory environments that influence our overall risk profile.

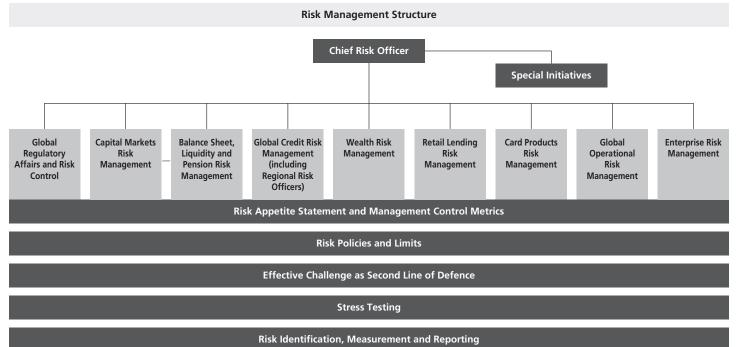

Regular and transparent risk reporting and discussion at senior management committees facilitate communication of risks and discussion of risk management strategies across the organization.

Additional information on our risk governance, risk management process and risk culture are provided on pages 39 to 43 of the 2013 Annual Report.

Risk management structure

The Risk Management group, led by our Chief Risk Officer, is responsible for setting risk strategies and for providing independent oversight of the businesses. Risk Management works to identify, assess, mitigate, monitor and control the risks associated with business activities and strategies, and is responsible for providing an effective challenge to the lines of businesses.

There were changes made during the quarter to the Risk Management structure. The current structure is illustrated below.

The Risk Management group performs several important activities including:

- Developing CIBC's risk appetite and associated management control metrics;
- Setting risk strategy to manage risks in alignment with our risk appetite and business strategy;
- Establishing and communicating risk policies, procedures and limits to control risks in alignment with risk strategy;
- Measuring, monitoring and reporting on risk levels;
- Identifying and assessing emerging and potential strategic risks; and
- Deciding on transactions that fall outside of risk limits delegated to business lines.

The ten key groups within Risk Management, independent of the originating businesses, contribute to our management of risk:

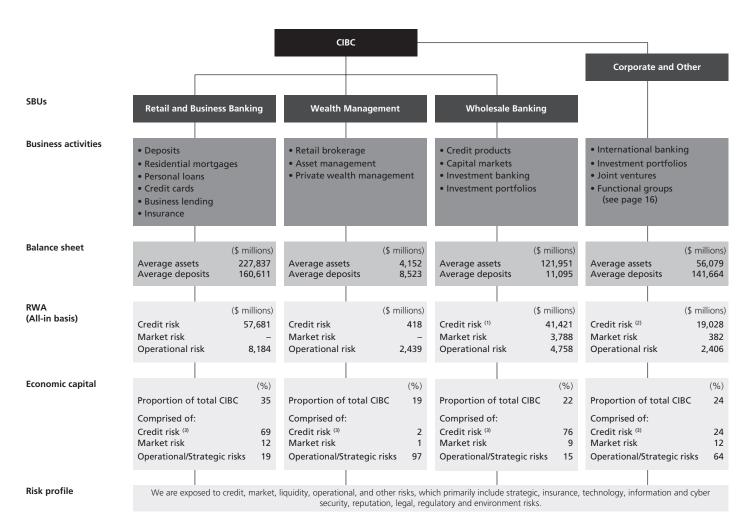

- Global Regulatory Affairs and Risk Control This team provides expertise in risk, controls and regulatory reporting, and oversees regulatory interactions across CIBC to ensure coordinated communication and the effective development of and adherence to action plans.
- Capital Markets Risk Management This unit provides independent oversight of the measurement, monitoring and control of market risks (both trading and non-trading), and trading credit risk across CIBC's portfolios.
- Balance Sheet, Liquidity and Pension Risk Management This unit has primary global accountability for providing an effective challenge and sound risk oversight to the treasury/liquidity management function within CIBC.
- Global Credit Risk Management This unit is responsible for the adjudication and oversight of credit risks associated with our commercial and wholesale lending activities globally, management of the risks in our investment portfolios, as well as management of special loan portfolios.
- Wealth Risk Management This unit is responsible for the independent governance and oversight of the wealth management business/activities in CIBC globally.
- Retail Lending Risk Management This unit primarily oversees the management of credit and fraud risk in the retail lines of credit and loans, residential mortgage, and small business loan portfolios, including the optimization of credit portfolio quality.
- Card Products Risk Management This unit oversees the management of credit risk in the card products portfolio, including the optimization of credit portfolio quality.
- Global Operational Risk Management This team has global accountability for the identification, measurement and monitoring of all operational risks, including locations, people, insurance, technology, subsidiaries/affiliates and vendors.
- Enterprise Risk Management This unit is responsible for enterprise-wide analysis, including enterprise-wide stress testing and reporting, risk systems and models, as well as economic capital methodologies.
- Special Initiatives This unit is responsible for assisting in the design, delivery and implementation of new initiatives aligned with Risk Management's strategic plan, while enhancing internal client partnerships and efficiency.

Top and emerging risks

We monitor and review top and emerging risks that may affect our future results, and take action to mitigate potential risks if required. We perform an in-depth analysis, which can include stress testing our exposures relative to the risks, and provide updates and related developments to the Board on a regular basis. The main top and emerging risks that we consider with potential negative implications, that are material for CIBC, have not changed significantly from those described on pages 43 to 44 of the 2013 Annual Report.

Risks arising from business activities

The chart below shows our business activities and related risk measures based upon regulatory RWAs and economic capital as at January 31, 2014:

(1) Includes counterparty credit risk of \$7,579 million.

(2) Includes counterparty credit risk of \$382 million.

(3) Includes investment risk.

Credit risk

Credit risk is defined as the risk of financial loss due to a borrower or counterparty failing to meet its obligations in accordance with contractual terms.

Credit risk arises mainly from our Retail and Business Banking and our Wholesale lending businesses. Other sources of credit include our trading activities, including our over-the-counter (OTC) derivatives, debt securities, and our repo-style transaction activity. In addition to losses on the default of a borrower or counterparty, unrealized gains or losses may occur due to changes in the credit spread of the counterparty, which could impact the carrying or fair value of our asset.

Exposure to credit risk

\$ millions, as at	2014 Jan. 31	2013 Oct. 31
Business and government portfolios-advanced internal ratings-based (AIRB) approach		
Drawn Undrawn commitments Repo-style transactions Other off-balance sheet OTC derivatives	\$ 83,710 38,304 58,861 63,880 16,753	\$ 84,016 35,720 57,975 51,885 13,255

Gross EAD	\$ 545,068	\$ 532,085
Net EAD	\$ 494,524	\$ 480,472

Forbearance policy

We employ forbearance techniques to manage customer relationships and to minimize credit losses due to default, foreclosure or repossession. In certain circumstances, it may be necessary to modify a loan for economic or legal reasons related to a borrower's financial difficulties and we may grant a concession in the form of below-market rates or terms that would not otherwise be considered, for the purpose of maximizing recovery of our exposure to the loan. In circumstances where the concession is considered below market, the modification is reported as a troubled debt restructuring (TDR). TDRs are subject to our normal quarterly impairment review which considers, amongst other factors, covenants and/or payment delinquencies. An appropriate level of loan loss provision by portfolio segment is then established.

In retail lending, forbearance techniques include interest capitalization, amortization amendments and debt consolidations. We have a set of eligibility criteria which allow our Client Account Management team to determine suitable remediation strategies and propose products based on each borrower's situation. These solutions are intended to increase the ability of borrowers to service their obligation by providing often more favourable conditions than those originally provided.

The solutions available to corporate and commercial clients vary based on the individual nature of the client's situation and are undertaken selectively where it has been determined that the client has or is likely to have repayment difficulties servicing its obligations. Covenants often reveal changes in the client's financial situation before there is a change in payment behaviour and typically allow for a right to reprice or accelerate payments. Solutions may be temporary in nature or may involve other special management options.

During the current quarter, \$20 million (\$3 million for the quarter ended January 31, 2013) of loans have undergone TDR.

Real estate secured personal lending

Real estate secured personal lending comprises residential mortgages and personal loans and lines secured by residential property (HELOC). This portfolio is low risk as we have a first charge on the majority of the properties, and second lien on only a small portion of the portfolio. We use the same lending criteria in the adjudication of both first lien and second lien loans.

The following table provides details on our Canadian residential mortgage and HELOC portfolios:

	Re	esidential m	nortg	jages			HELO	C ⁽¹⁾	Total						
\$ billions, as at January 31, 2014	Insured (2)				Uninsured			ured	Insured (2)				Uninsur	ed

Other	74	73	73	72	73	71
Total Canadian portfolio (2)	70%	70%	70%	69%	71%	69%

(1) LTV ratios for newly originated residential mortgages and HELOCs are calculated based on weighted average

(2) Geographical allocation is based on the address of the property managed.

The following table provides the average LTV ratios on our total Canadian residential mortgage portfolio:

	Insured	Uninsured
January 31, 2014 ⁽¹⁾	60%	60%
October 31, 2013 (1)	59%	60%
(1) LTV retire for residential montones are calculated based on unighted surgery. The based primetry for October 21, 2012 and larvery 21, 2014 are based on Target	Netional Deals	National

(1) LTV ratios for residential mortgages are calculated based on weighted average. The house price estimates for October 31, 2013 and January 31, 2014 are based on Teranet – National Bank National Composite House Price Index (Teranet) as of September 30, 2013 and December 31, 2013, respectively. Teranet is an independent estimate of the rate of change of Canadian home prices. The sale prices are based on the property records of public land registries. The monthly indices cover eleven Canadian metropolitan areas which are combined to form a national composite index.

The tables below summarize the remaining amortization profile of our total Canadian residential mortgages. The first table provides the remaining amortization periods based on the minimum contractual payment amounts. The second table provides the remaining amortization periods based upon current customer payment amounts, which incorporate payments larger than the minimum contractual amount and/or higher frequency of payments.

Contractual payment basis								
	Less than	5-10	10-15	15-20	20-25	25-30	30-35	35 years

As at October 31, 2013	1%	1%	3%	12%	19%	39%	25%	-%
Current customer payment basis								
	Less than	5-10	10-15	15-20	20-25	25-30	30-35	35 years
	5 years	years	years	years	years	years	years	and above
As at January 31, 2014	3%	6%	11%	15%	25%	29%	11%	-%
As at October 31, 2013	3%	6%	11%	15%	24%	28%	12%	1%

We have two types of condominium exposures in Canada: mortgages and developer loans. Both are primarily concentrated in the Toronto and Vancouver areas. As at January 31, 2014, our Canadian condominium mortgages were \$16.6 billion (October 31, 2013: \$16.6 billion) of which 73% (October 31, 2013: 74%) were insured. Our drawn developer loans were \$798 million (October 31, 2013: \$920 million) or 1% of our business and government portfolio and our related undrawn exposure was \$1.9 billion (October 31, 2013: \$2.1 billion). The condominium developer exposure is diversified across 70 projects.

We stress test our mortgage and HELOC portfolio to determine the potential impact of different economic events. Our stress tests can use variables such as GDP, unemployment, bankruptcy rates, debt service ratios and delinquency trends, which are reflective of potential ranges of housing price declines, to model potential outcomes for a given set of circumstances. The stress testing involves variables that could behave differently in certain situations. Our main tests use economic variables in a similar range to the early 1980s and early 1990s when Canada experienced economic downturns. Our results show that in an economic downturn, our strong capital position should be sufficient to absorb mortgage and HELOC losses.

Counterparty credit exposure

We have counterparty credit exposure that arises from our interest rate, foreign exchange, equity, commodity, and credit derivatives trading, hedging, and portfolio management activities, as explained in Note 12 of the 2013 annual consolidated financial statements.

The following table shows the rating profile of OTC derivative MTM receivables (after derivative master netting agreements, but before any collateral):

\$ billions, as at		2014 Jan. 31			2013 Oct. 31
		Expos	sure (1)	
Investment grade	\$ 6.94	84.8%	\$	4.59	85.0%
Non-investment grade	1.07	13.0		0.78	14.5
Watchlist	0.16	1.9		0.03	0.5
Unrated	0.02	0.3		-	-
	\$ 8.19	100.0%	\$	5.40	100.0%

(1) MTM of the OTC derivative contracts is after the impact of master netting agreements, but before any collateral

The following table provides details of our impaired loans, allowances and provisions for credit losses.

GIL less allowance for impairment as a percentage of related assets ⁽²⁾					0.36%	-				0.35%				0.38%

(1) Includes collective allowance relating to personal, scored small business and mortgage impaired loans that are greater than 90 days delinquent, and individual allowance.

(2) The related assets include loans, securities borrowed or purchased under resale agreements, and acceptances.

Impaired loans

During the quarter, \$417 million of loans were newly classified as impaired. New classification as impaired was down \$24 million from the same quarter last year, mainly attributable to consumer loans. New classification was down \$7 million from the prior quarter, due to decrease in consumer loans, partially offset by an increase in the business and government loans.

Reductions in GIL due to transfer out of impaired loans and net repayments were \$168 million. These reductions were down \$54 million from the same quarter last year, due to a decrease in reduction in both business and government loans and consumer loans. They were up \$34 million from the prior quarter, mainly driven by an increase in reduction in business and government loans, partially offset by a decrease in consumer loans.

The write-offs for the quarter totalled \$277 million. The write-offs were down from the same quarter last year due to a decrease in both business and government loans and consumer loans. The write-offs were down \$105 million from the prior quarter, primarily due to a decrease in business and government loan write-offs, partially offset by an increase in consumer loans resulting from operational changes in the processing of write-offs.

After experiencing an increase during the 2009 recession, GIL stabilized in 2011 and showed some improvements in 2012 and 2013. About half of the consumer GIL in this quarter were from Canada, in which insured mortgages accounted for the majority, and where losses are expected to be minimal. Consumer GIL in CIBC FirstCaribbean increased this quarter mainly due to continued economic pressure in the Caribbean region. GIL in business and government loans were comparable to the prior quarter, but lower than the same quarter last year due to write-offs of impaired accounts in the sectors of business services, publishing and transportation sectors, as well as U.S. real estate finance accounts originated before 2009.

Allowance for Impairment

The allowance for impairment was down \$116 million or 17% from the same quarter last year. The individually assessed allowance for business and government loans decreased by \$100 million or 23%, mainly driven by decreases in the real estate, construction, and transportation sectors. The decrease in the real estate and construction sectors was primarily in the U.S., and was consistent with the decrease in GIL. The decrease in the transportation sector was attributable to the write-off of an account in the U.S. in the second quarter of 2013. The individually assessed allowance for consumer loans was comparable to the same quarter last year. The collectively assessed allowance for consumer impairment was down \$7 million or 3% due to a revision of estimated loss parameters on unsecured lending portfolios implemented in the third quarter of 2013, partially offset by an increase in the mortgage portfolio of CIBC FirstCaribbean. The collectively assessed allowance for business and government impairment was down \$10 million, with small decreases spread across various sectors.

The allowance for impairment was \$575 million, up \$28 million or 5% from the prior quarter. The individually assessed allowance for business and government loans increased by \$27 million or 9%, largely driven by an increase in the business services and real estate and construction sectors. Both of these movements were primarily in the Caribbean region and they were consistent with the changes in GIL. Business and government GIL decreased \$40 million in the U.S., where individually assessed allowances decreased \$8 million. The decrease in both GIL and the individually assessed allowance was largely driven by the U.S. real estate finance accounts originated before 2009. Both of the individually assessed allowance for consumer loans and the collectively assessed allowance for impairment were comparable to the prior quarter.

Exposure to certain countries and regions

Several European countries, especially Greece, Ireland, Italy, Portugal, and Spain, have continued to experience credit concerns. The following tables provide our exposure to these and other European countries, both within and outside the European. Except as noted in our indirect exposures section below, we do not have any other exposure through our special purpose entities (SPEs) to the countries included in the tables below.

We do not have material exposure to the countries in the Middle East and North Africa that have either experienced or may be at risk of unrest. These countries include Algeria, Bahrain, Egypt, Jordan, Lebanon, Libya, Morocco, Oman, Saudi Arabia, Syria, Tunisia, and Yemen.

Direct exposures to certain countries and regions

Our direct exposures presented in the tables below comprise (A) funded – on-balance sheet loans (stated at amortized cost net of allowances, if any), deposits with banks (stated at amortized cost net of allowances, if any) and securities (stated at fair value); (B) unfunded – unutilized credit commitments, letters of credit, and guarantees (stated at notional amount net of allowances, if any) and sold credit default swap (CDS) contracts where we do not benefit from subordination (stated at notional amount less fair value); and (C) derivative MTM receivables (stated at fair value) and repo-style transactions (stated at fair value).

Of our total direct exposures to Europe, approximately 94% (2013: 96%) is to entities in countries with Aaa/AAA ratings from at least one of Moody's or S&P.

The following tables provide a summary of our positions in this business:

						I	Direct	exposures

(1) Includes \$188 million of exposure (notional value of \$215 million and fair value of \$27 million) on a CDS sold on a bond issue of a U.K. corporate entity, which is guaranteed by a financial guarantor. We currently hold the CDS sold as part of our structured credit run-off business. A payout on the CDS sold would be triggered by the bankruptcy of the reference entity, or a failure of the entity to make a principal or interest payment as it is due; as well as failure of the financial guarantor to meet its obligation under the guarantee.

Direct experience (continued)

(1) The amounts are shown net of CVA.

(2) Collateral on derivative MTM receivables was \$1.0 billion (October 31, 2013: \$1.4 billion), collateral on repo-style transactions was \$4.0 billion (October 31, 2013: \$4.0 billion), and both are comprised of cash and investment-grade debt securities.

Indirect exposures to certain countries and regions

Our indirect exposures comprise securities (primarily CLOs classified as loans on our consolidated balance sheet), and written credit protection on securities in our structured credit run-off business where we benefit from subordination to our position. Our gross exposure before subordination is stated at carrying value for securities and notional, less fair value for derivatives where we have written protection. We have no indirect exposures to Portugal, Turkey, Guernsey, or Russia.

		Total indirect
\$ millions, as at January 31, 2014		xposure

In addition to the indirect exposures above, we have indirect exposures to European counterparties when we have taken debt or equity securities issued by European entities as collateral for our securities lending and borrowing activity, from entities that are not in Europe. Our indirect exposure was \$156 million (October 31, 2013: \$211 million).

Selected exposures in certain selected activities

In response to the recommendations of the Financial Stability Board, this section provides information on our other selected activities within our continuing and exited businesses that may be of particular interest to investors based on their risk characteristics and the current market environment. For additional information on these selected exposures, refer to pages 57 to 58 of the 2013 Annual Report.

U.S. real estate finance

The following table provides a summary of our positions in this business:

\$ millions, as at January 31, 2014	Drawn	Und	drawn
Construction program Interim program Permanent program	\$158 5,983 226	\$	58 408 –
Exposure, net of allowance	\$ 6,367	\$	466
Of the above: Net impaired On credit watch list	\$ 103 168	\$	_ 2
Exposure, net of allowance, as at October 31, 2013	\$ 5,938	\$	467

As at January 31, 2014, the allowance for credit losses for this portfolio was \$48 million (October 31, 2013: \$55 million). During the quarter ended January 31, 2014, we recorded provision for credit losses of \$3 million (\$9 million for the quarter ended January 31, 2013).

The business also maintains commercial mortgage-backed securities (CMBS) trading and distribution capabilities. As at January 31, 2014, we had CMBS inventory with a notional amount of \$9 million and a fair value of less than \$1 million (October 31, 2013: notional of \$9 million and fair value of less than \$1 million).

Leveraged finance

The exposures in our leveraged finance activities in Europe and U.S. are discussed below.

European leveraged finance

The following table provides a summary of our positions in this exited business:

\$ millions, as at January 31, 2014	Drawn	Und	raw	/n
Manufacturing – capital goods	\$ 199	\$		8
Publishing, printing and broadcasting	5			_
Utilities	10			_
Transportation	4			1
Exposure, net of allowance	\$ 218	\$		9
Of the above:				
Net impaired	\$ 5	\$		_
On credit watch list	175			8
Exposure, net of allowance, as at October 31, 2013 (1)	\$ 359	\$	2	28

(1) Excludes \$21 million of carrying value relating to equity received pursuant to a reorganization. We sold this equity investment during the quarter. See "Overview" section for additional information.

Our exposure declined primarily due to loan repayments in the current quarter. These repayments occurred in conjunction with our sale of an equity investment in the borrower that we had previously received pursuant to an earlier reorganization. See "Overview" section for additional information.

As at January 31, 2014, the allowance for credit losses for this portfolio was \$37 million (October 31, 2013: \$35 million). During the quarter ended January 31, 2014, the provision for credit losses was nil (nil for the quarter ended January 31, 2013).

U.S. leveraged finance

The following table provides a summary of our positions in this business:

\$ millions, as at January 31, 2014	Drawn	Undr	awn
Transportation	\$ 38	\$	-
Publishing, printing and broadcasting	8		-
Exposure, net of allowance	\$ 46	\$	-
Of the above: Net impaired On credit watch list	\$ 38 8	\$	-
Exposure, net of allowance, as at October 31, 2013	\$ 44	\$	4

As at January 31, 2014, the allowance for credit losses for this portfolio was \$2 million (October 31, 2013: \$2 million). During the quarter ended January 31, 2014, the provision for credit losses was nil (net reversal of \$1 million for the quarter ended January 31, 2013).

Market risk

Market risk arises from positions in currencies, securities and derivatives held in our trading portfolios, and from our retail banking business, investment portfolios, and other non-trading activities. Market risk is defined as the potential for financial loss from adverse changes in underlying market factors, including interest and foreign exchange rates, credit spreads, and equity and commodity prices.

Risk measurement

The following table provides balances on the consolidated balance sheet which are subject to market risk. Certain differences between accounting and risk classifications are detailed in the footnotes below:

\$ millions, as at					2014 Jan. 31					2013 Oct. 31	(1)
			Subject to mar	ket risk			Subject to m	narket	t risk

(1) Certain information has been restated to reflect the changes in accounting policies stated in Note 1 to the interim consolidated financial statements and to conform to the presentation adopted in the current period.

(2) Excludes structured credit run-off business of \$861 million (October 31, 2013: \$837 million). These are considered non-trading for market risk purposes.

(3) Excludes \$228 million (October 31, 2013: \$63 million) of loans that are warehoused for future securitization purposes. These are considered non-trading for market risk purposes.
 (4) Excludes derivatives relating to the structured credit and other run-off businesses which are considered non-trading for market risk purposes.

(4) Excludes derivatives relating to the structured credit and other run-off businesses which at
 (5) Comprises FVO deposits which are considered trading for market risk purposes.

Trading activities

The following three tables show value at risk (VaR), stressed VaR and incremental risk charge for our trading activities based on risk type under an internal models-based approach.

Trading revenue (TEB) comprises both trading net interest income and non-interest income and excludes underwriting fees and commissions. Trading revenue (TEB) for the purposes of these tables excludes positions described in the "Structured credit run-off business" section of the MD&A and certain other exited portfolios.

Average total VaR for the three months ended January 31, 2014 was up 2% from the last quarter, driven mainly by an increase in our equity and debt specific risks, partially offset by a decrease in interest rate and credit spread risks.

Average total stressed VaR for the three months ended January 31, 2014 was up 115% from the last quarter. During the current stressed VaR period from January 7, 2008 to January 6, 2009, the market exhibited not only increased volatility in interest rate but also increased volatility in equity price combined with a reduction in the level of interest rates, and an increase in credit spreads.

Average incremental risk charge for the three months ended January 31, 2014 was up 4% from the last quarter, mainly due to an increase in the investment grade trading inventory.

VaR by risk type – trading portfolio

\$ millions, as at or for the three months ended				2014 Jan. 31		2013 Oct. 31		2013 Jan. 31
	High	Low	As at	Average	As at	Average	As at	Average
Interest rate risk	\$ 2.8	\$ 0.7	\$ 1.6	\$ 1.2	\$ 1.2	\$ 2.0	\$ 3.7	\$ 3.0
Credit spread risk	1.4	0.9	1.2	1.1	1.2	1.3	1.8	1.7
Equity risk	9.1	1.8	1.9	2.6	1.9	2.0	2.2	2.2
Foreign exchange risk	0.8	0.4	0.6	0.6	0.5	0.6	1.3	0.5
Commodity risk	1.7	0.6	0.9	0.9	0.6	0.9	0.8	1.0
Debt specific risk	3.5	1.9	3.0	2.5	2.5	2.3	2.4	2.6
Diversification effect (1)	n/m	n/m	(4.9)	(4.5)	(4.3)	(4.8)	(7.3)	(6.0)
Total VaR (one-day measure)	\$ 9.7	\$ 3.3	\$ 4.3	\$ 4.4	\$ 3.6	\$ 4.3	\$ 4.9	\$ 5.0

(1) Total VaR is less than the sum of the VaR of the different market risk types due to risk offsets resulting from portfolio diversification effect.

n/m Not meaningful. It is not meaningful to compute a diversification effect because the high and low may occur on different days for different risk types.

Stressed VaR by risk type – trading portfolio

\$ millions, as at or for the three months ended				2014 Jan. 31		2013 Oct. 31		2013 Jan. 31
	High	Low	As at	Average	As at	Average	As at	Average
Interest rate risk	\$ 18.0	\$ 0.5	\$ 18.0	\$ 7.1	\$ 3.9	\$ 5.1	\$ 8.9	\$ 9.5
Credit spread risk	9.0	1.3	7.1	6.8	4.9	4.7	6.0	5.1
Equity risk	21.3	0.9	1.1	4.8	1.9	2.5	1.3	3.1
Foreign exchange risk	3.8	0.4	0.7	1.0	0.7	0.6	1.9	1.7
Commodity risk	14.7	0.3	1.2	3.0	0.8	1.2	0.4	1.3
Debt specific risk	4.0	0.7	3.0	2.2	1.7	1.3	1.4	1.5
Diversification effect (1)	n/m	n/m	(15.3)	(14.8)	(10.5)	(10.7)	(9.4)	(10.4)
Total stressed VaR (one-day measure)	\$ 18.1	\$ 3.1	\$ 15.8	\$ 10.1	\$ 3.4	\$ 4.7	\$ 10.5	\$ 11.8

(1) Total stressed VaR is less than the sum of the VaR of the different market risk types due to risk offsets resulting from portfolio diversification effect.

n/m Not meaningful. It is not meaningful to compute a diversification effect because the high and low may occur on different days for different risk types.

Incremental risk charge – trading portfolio

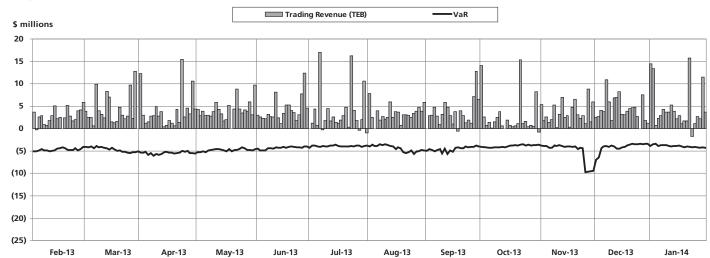

\$ millions, as at or for the three months ended				2014 Jan. 31		2013 Oct. 31		2013 Jan. 31
	High	Low	As at	Average	As at	Average	As at	Average
Default risk Migration risk	\$ 117.0 58.5	\$ 71.1 30.1	\$ 86.6 51.3	\$ 86.5 43.9	\$ 102.9 45.4	\$ 81.0 44.4	\$ 36.0 40.4	\$ 51.7 41.9
Incremental risk charge (one-year measure)	\$ 170.2	\$ 105.0	\$ 137.9	\$ 130.4	\$ 148.3	\$ 125.4	\$ 76.4	\$ 93.6

Trading revenue

The trading revenue (TEB) and VaR graph below shows the current quarter and the three previous quarters' actual daily trading revenue (TEB) against the previous day close of business VaR measures. Trading revenue distribution on which VaR is calculated is not on a TEB basis.

During the quarter, trading revenue (TEB) was positive for 98% of the days. Trading loss did not exceed VaR during the quarter. During the quarter, the largest loss totalling \$1.7 million occurred on January 24, 2014. The loss was driven by a sharp increase in commodity prices. The largest gain of \$15.7 million occurred on January 23, 2014. It was attributable to the normal course of business within our capital markets group, notably in the equity derivatives business. Average daily trading revenue (TEB) was \$4.2 million during the quarter and the average daily TEB was \$1.7 million.

Trading revenue (TEB)⁽¹⁾ versus VaR

(1) Certain fair value adjustments such as OIS are recorded only at month end but allocated throughout the month for the table above.

Non-trading activities

Interest rate risk

Non-trading interest rate risk consists primarily of risk inherent in asset/liability management activities and the activities of domestic and foreign subsidiaries. Interest rate risk results from differences in the maturities or repricing dates of assets and liabilities, both on- and off-balance sheet, as well as from embedded optionality in retail products. This optionality arises predominantly from the prepayment exposures of mortgage products, mortgage commitments and some GIC products with early redemption features; this optionality is measured consistent with our actual experience. A variety of cash instruments and derivatives, principally interest rate swaps, futures and options, are used to manage and control these risks.

The following table shows the potential impact over the next 12 months, adjusted for structural assumptions (excluding shareholders' equity), estimated prepayments and early withdrawals, of an immediate 100 and 200 basis point increase or decrease in interest rates. In addition, we have a floor in place in the downward shock to accommodate for the current low interest rate environment (i.e. the analysis uses the floor to stop interest rates from going into a negative position in the lower rate scenarios).

Interest rate sensitivity – non-trading (after-tax)

Liquidity risk

Liquidity risk is the risk of having insufficient cash resources to meet financial obligations as they fall due, in their full amount and stipulated currencies, without raising funds at adverse rates or selling assets on a forced basis.

Our liquidity risk management strategies seek to maintain sufficient liquid financial resources and diversified funding sources to continually fund our balance sheet and contingent obligations under both normal and stressed market environments.

Liquid and encumbered assets

Our policy is to hold a pool of high quality unencumbered liquid assets that will be immediately available to meet outflows determined under the stress scenario. Liquid assets are cash, short-term bank deposits, high quality marketable securities and other assets that can be readily pledged at central banks and in repo markets or converted into cash in a timely fashion. Encumbered assets comprise assets pledged as collateral and other assets that we consider restricted for legal or other reasons. Unencumbered assets comprise assets that are readily available in the normal course of business to secure funding or meet collateral needs and other assets that are not subject to any restrictions on their use to secure funding or as collateral.

Liquid assets net of encumbrances constitute our unencumbered pool of liquid assets and are summarized in the following table:

										2014		2013
\$ millions, as at										Jan. 31		Oct. 31 ⁽¹⁾
		Gross liqui	d assets		Enci	umbered li	quid assets	(2)	Un	nencumbere	ed liq	uid assets

	\$	152,561	\$	54,106	\$	65,647	\$	32,915	\$	108,105	\$	105,900

(1) Certain information has been restated to reflect the changes in accounting policies stated in Note 1 to the interim consolidated financial statements and to conform to the presentation adopted in the current period.

Excludes intraday pledges to the Bank of Canada related to the Large Value Transfer System as these are normally released at the end of the settlement cycle each day. Comprises cash, non-interest bearing deposits and interest-bearing deposits with contractual maturities of less than 30 days. (2)

Comprises trading, AFS and FVO securities. Excludes securities in our structured credit run-off business, private debt and private equity securities of \$1,663 million (October 31, 2013: \$1,621 million). (4)Comprises \$3,050 million (October 31, 2013: \$3,417 million) of cash collateral on securities borrowed, \$24,145 million (October 31, 2013: \$25,311 million) of securities purchased under resale agreements, (5) \$25,200 million (October 31, 2013: \$24,157 million) of securities borrowed against securities lent, and \$1,711 million (October 31, 2013: \$759 million) of securities received for derivative collater

(6) Includes securitized and transferred residential mortgages under the Canada Mortgage Bond and the Government of Canada's Insured Mortgage Purchase programs, and securitized mortgages that were not transferred to external parties including those in the Covered Bond Programme. These are reported in Loans on our interim consolidated balance sheet.

Comprises mortgages, excluding NHA mortgage-backed securities, included in the Covered Bond Programme (7) (8)Comprises assets held in consolidated trusts supporting funding liabilities.

(9) Comprises \$2,546 million (October 31, 2013: \$2,727 million) of cash pledged for derivatives collateral and \$382 million (October 31, 2013: \$334 million) of gold and silver certificates.

In the course of our regular business activities, a portion of our total assets are pledged for collateral management purposes, including those necessary for dayto-day clearing and settlement of payments and securities. For additional details, see Note 22 to the 2013 annual consolidated financial statements.

Our unencumbered liquid assets increased by \$2.2 billion or 2% from October 31, 2013, primarily due to a decrease in the encumbrances related to NHA mortgage-backed securities, partially offset by an increase in the encumbrances related to securities.

In addition to the above, we have access to the Bank of Canada Emergency Lending Assistance (ELA) program through the pledging of non-mortgage assets. We do not include ELA borrowing capacity as a source of available liquidity when evaluating surplus liquidity.

The following table summarizes unencumbered liquid assets held by CIBC parent bank and significant subsidiaries:

	2014	2013
\$ millions, as at	Jan. 31	Oct. 31 (1)
CIBC parent bank	\$ 80,264	\$ 78,761
Broker/dealer ⁽²⁾	15,074	15,049
Other significant subsidiaries	12,767	12,090
	\$ 108,105	\$ 105,900

Certain information has been restated to reflect the changes in accounting policies stated in Note 1 to the interim consolidated financial statements and to conform to the presentation adopted in the current period

Relates to CIBC World Markets Inc. and CIBC World Markets Corp.

Asset encumbrance

Includes \$1 million (October 31, 2013: \$70 million) of interest-bearing deposits with contractual maturities greater than 30 days.
 Certain information has been restated to reflect the changes in accounting policies stated in Note 1 to the interim consolidated financial statements and to conform to the presentation adopted in the current

(2) Certain information has been restated to reflect the changes in accounting policies stated in Note 1 to the interim consolidated financial statements and to conform to the presentation adopted in the current period.

Funding

We manage liquidity to meet both short- and long-term cash requirements. Reliance on wholesale funding is maintained at prudent levels and within approved limits, consistent with our desired liquidity profile.

Our funding strategy includes access to funding through retail deposits and wholesale funding and deposits. Personal deposits are a significant source of funding and totalled \$127.3 billion as at January 31, 2014 (October 31, 2013: \$125.0 billion).

The following table provides the contractual maturities at carrying values of funding sourced by CIBC from the wholesale market:

¢ '''' >1 >4 >04 4	ess than	1 - 3	3 - 6	6 - 12		Less than	1 - 2	Over	T

The following table provides a currency breakdown, in Canadian dollar equivalent, of funding sourced by CIBC in the wholesale market:

\$ billions, as at		2014 Jan. 31		2013 Oct. 31
CAD USD EUR Other	\$ 63.1 42.3 1.3 5.8	56% 38 1 5	\$ 69.2 44.2 1.3 6.2	57% 37 1 5
	\$ 112.5	100%	\$ 120.9	100%

Our funding and liquidity levels remained stable and sound over the year and we do not anticipate any events, commitments or demands that will materially impact our liquidity risk position.

Impact on collateral if there is a downgrade of CIBC's credit rating

We are required to deliver collateral to certain derivative counterparties in the event of a downgrade to our current credit risk rating. The collateral requirement is based on MTM exposure, collateral valuations, and collateral arrangement thresholds as applicable. The following table presents the additional collateral requirements (cumulative) for rating downgrades:

\$ billions, as at	2014 Jan. 31	2013 Oct. 31
One-notch downgrade	\$ 0.1	\$ 0.1
Two-notch downgrade	0.3	0.3
Three-notch downgrade	0.7	0.9

Liquidity Coverage Ratio Disclosure Standards

In January 2014, the BCBS published the Liquidity Coverage Ratio (LCR) Disclosure Standards. The document outlines the minimum standards applicable for public disclosure of the LCR by all internationally active banks. Banks will be required to disclose quantitative information about the LCR using a common template, supplemented by qualitative discussion, as appropriate, on key elements of the liquidity metric. These standards are effective for the first reporting period after January 1, 2015. OSFI has indicated that additional implementation guidance, applicable to Canadian banks, will be provided in due course. We are currently updating processes and systems to meet the stipulated timeline and requirements.

Contractual obligations

Contractual obligations give rise to commitments of future payments affecting our short- and long-term liquidity and capital resource needs. These obligations include financial liabilities, credit and liquidity commitments, and other contractual obligations.

Assets and liabilities

The following table provides the contractual maturity profile of our on-balance sheet assets and liabilities at their carrying values. CIBC models the behaviour of both assets and liabilities on a net cash flow basis by applying recommended regulatory stress assumptions, supplemented by business experience, against contractual maturities and contingent exposures to construct its behavioural balance sheet. The behavioural balance sheet is a key component of CIBC's liquidity risk management framework and is the basis by which CIBC manages its liquidity risk profile.

(1) Certain information has been restated to reflect the changes in accounting policies stated in Note 1 to the interim consolidated financial statements and to conform to the presentation adopted in the current period.

(2) Comprises \$127.3 billion (October 31, 2013: \$125.0 billion) of personal deposits of which \$122.9 billion (October 31, 2013: \$120.4 billion) are in Canada and \$4.4 billion (October 31, 2013: \$182.9 billion) of personal deposits of which \$122.9 billion (October 31, 2013: \$120.4 billion) are in Canada and \$4.4 billion (October 31, 2013: \$182.9 billion) of business and government deposits of which \$144.6 billion (October 31, 2013: \$149.0 billion) are in Canada and \$36.7 billion (October 31, 2013: \$3.9 billion) in other countries; and \$5.7 billion (October 31, 2013: \$5.6 billion) of bank deposits of which \$1.9 billion (October 31, 2013: \$2.0 billion) are in Canada and \$3.8 billion (October 31, 2013: \$3.9 billion) in other countries; and \$5.7 billion (October 31, 2013: \$5.6 billion) of bank deposits of which \$1.9 billion (October 31, 2013: \$2.0 billion) are in Canada and \$3.8 billion (October 31, 2013: \$3.6 billion) in other countries.

Our net asset position remained unchanged relative to October 31, 2013. The changes in the contractual maturity profile were primarily due to the natural migration of maturities and also reflect the impact of our regular business activities.

Credit-related commitments

The following table provides the contractual maturity of notional amounts of credit-related commitments. Since a significant portion of commitments are expected to expire without being drawn upon, the total of the contractual amounts is not representative of future liquidity requirements.

Less than 1 - 3 3 - 6 6 - 9 9 - 12 1 - 2 2 - 5 Over specified	(1) Total

(1) Obligations that are legally binding agreements whereby we agree to purchase products or services with specific minimum or baseline quantities defined at fixed, minimum or variable prices over a specified period of time are defined as purchase obligations. Purchase obligations are included through to the termination date specified in the respective agreements, even if the contract is renewable. Many of the purchase agreements for goods and services include clauses that would allow us to cancel the agreement prior to expiration of the contract within a specific notice period. However, the amount above includes our obligations without regard to such termination clauses (unless actual notice of our intention to terminate the agreement has been communicated to the counterparty). The table excludes purchases of debt

and equity instruments that settle within standard market timeframes. Includes estimated minimum pension contributions, and expected benefit payments for post-retirement medical and dental plans, the long-term disability plan, and related medical and dental benefits for disabled employees. Subject to change as contribution decisions are affected by various factors, such as market performance, regulatory requirements, and management's ability to change funding policy. Also, funding requirements after 2014 are excluded due to the significant variability in the assumptions required to project the timing of cash flows. (2)

Other risks

We also have policies and processes to measure, monitor and control other risks, including strategic, insurance, operational, technology, reputation and legal, regulatory, and environmental risks. These risks and related policies and processes have not changed significantly from those described on pages 70 to 72 of the 2013 Annual Report.

Accounting and control matters

Critical accounting policies and estimates

A summary of significant accounting policies is presented in Note 1 to the consolidated financial statements of the 2013 Annual Report. The interim consolidated financial statements have been prepared using the same accounting policies as CIBC's consolidated financial statements for the year ended October 31, 2013, except as described in Note 1 to the interim consolidated financial statements. Certain accounting policies require us to make judgments and estimates, some of which may relate to matters that are uncertain. The key management judgments and estimates remain substantially unchanged from those described on pages 73 to 77 of the 2013 Annual Report, except for the valuation of financial instruments, securitizations and structured entities and post-employment and other long-term benefit plan assumptions, which have been impacted by the adoption of new and amended accounting standards as described below.

Valuation of financial instruments

Debt and equity trading securities, trading business and government loans, obligations related to securities sold short, derivative contracts, AFS securities and FVO financial instruments are carried at fair value. FVO financial instruments include certain debt securities, structured retail deposits and business and government deposits. Retail mortgage interest rate commitments are also designated as FVO financial instruments.

Effective November 1, 2013, CIBC adopted IFRS 13 "Fair Value Measurement". Adoption of this standard did not result in changes to how we measure fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability at the measurement date in an orderly arm's length transaction between market participants in an orderly transaction in the principal market at the measurement date under current market conditions (i.e. the exit price). Fair value measurements are categorized into levels within a fair value hierarchy based on the nature of the valuation inputs (Level 1, 2 or 3). We have an established and well-documented process for determining fair value. Fair value is based on unadjusted quoted prices in an active market for the same instrument, where available (Level 1). If active market prices or quotes are not available for an instrument, fair value is then based on valuation models using all significant observable inputs (Level 2) or one of more significant non-observable inputs (Level 3). Estimating fair value requires the application of judgment. The type and level of judgment required is largely dependent on the amount of observable market information available. For instruments valued using internally developed models that use significant non-observable market inputs and are therefore classified within Level 3 of the hierarchy, the judgment used to estimate fair value is more significant than when estimating the fair value of instruments classified within Levels 1 and 2. To ensure that valuations are appropriate, a number of policies and controls are put in place. Independent validation of fair value is performed at least on a monthly basis. Valuation inputs are verified to external sources such as exchange quotes, broker quotes or other management-approved independent pricing sources.

The following table presents amounts, in each category of financial instruments, which are fair valued using valuation techniques based on one or more significant non-observable market inputs (Level 3), for the structured credit run-off business and total consolidated CIBC. For further details of the valuation of and sensitivity associated with Level 3 financial assets and liabilities, see Note 2 to the interim consolidated financial statements.

Fair value adjustments

We apply judgment in establishing valuation adjustments that take into account various factors that may have an impact on the valuation of financial instruments that are carried at fair value on the consolidated balance sheet. Such factors include, but are not limited to, the bid-offer spread, illiquidity due to lack of market depth and other market risks, parameter uncertainty, model risk, credit risk, and future administration costs.

The establishment of fair value adjustments and the determination of the amount of write-downs involve estimates that are based on accounting processes and judgments by management. We evaluate the adequacy of the fair value adjustments and the amount of write-downs on an ongoing basis. The levels of fair value adjustments and the amount of the write-downs could change as events warrant and may not reflect ultimate realizable amounts. The following table summarizes our valuation adjustments:

\$ millions, as at	2014 Jan. 31	C	2013 ct. 31
Securities			
Market risk	\$ 2	\$	5
Derivatives			
Market risk	64		57
Credit risk	39		42
Administration costs	5		5
Total valuation adjustments	\$ 110	\$	109

Allowance for credit losses

We establish and maintain an allowance for credit losses that is considered the best estimate of probable credit-related losses existing in our portfolio of onand off-balance sheet financial instruments, giving due regard to current conditions.

The allowance for credit losses consists of individual and collective components.

Individual allowances

The majority of our business and government loan portfolios are assessed on an individual loan basis. Individual allowances are established when impaired loans are identified within the individually assessed portfolios. A loan is classified as impaired when we are of the opinion that there is no longer a reasonable assurance of the full and timely collection of principal and interest. The individual allowance is the amount required to reduce the carrying value of an impaired loan to its estimated realizable amount. This is determined by discounting the expected future cash flows at the effective interest rate inherent in the loan. Individual allowances are not established for portfolios that are collectively assessed, including most retail portfolios.

Collective allowances

Consumer and certain small business allowances

Residential mortgages, credit card loans, personal loans, and certain small business loan portfolios consist of large numbers of homogeneous balances of relatively small amounts, for which we take a portfolio approach to establish the collective allowance. As it is not practical to review each individual loan, we utilize a formula basis, by reference to historical ratios of write-offs to current accounts and balances in arrears. For residential mortgages, personal loans and certain small business loans, this historical loss experience enables CIBC to determine appropriate PD and LGD parameters, which are used in the calculation of the portion of the collective allowance for current accounts. The PDs determined by this process that correspond to the risk levels in our retail portfolios are disclosed on page 48 of the 2013 Annual Report. For credit card loans, non-current residential mortgages, personal loans and certain small business loans, the historical loss experience enables CIBC to calculate flows to write-off in our roll-rate models that determine the collective allowance that pertain to these loans.

We also consider estimates of the time periods over which losses that are present would be identified and a provision taken, our view of current economic and portfolio trends, evidence of credit quality improvements or deterioration, and events such as the 2013 Alberta floods. On a regular basis, the parameters that affect the allowance calculation are updated, based on our experience and the economic environment.

Business and government allowances

For groups of individually assessed loans for which no objective evidence of impairment has been identified on an individual basis, a collective allowance is provided for losses which we estimate are inherent in the portfolio at the reporting date, but not yet specifically identified from an individual assessment of the loan.

The methodology for determining the appropriate level of the collective allowance incorporates a number of factors, including the size of the portfolios, expected loss rates, and relative risk profiles. We also consider estimates of the time periods over which losses that are present would be identified and a provision taken, our view of current economic and portfolio trends, and evidence of credit quality improvements or deterioration. On a regular basis, the parameters that affect the collective allowance calculation are updated, based on our experience and the economic environment. Expected loss rates for business loan portfolios are based on the risk rating of each credit facility and on the PD factors associated with each risk rating, as well as estimates of LGD. The PD factors reflect our historical loss experience and are supplemented by data derived from defaults in the public debt markets. Our risk-rating method and categories are disclosed on page 47 of the 2013 Annual Report. Historical loss experience is adjusted based on observable data to reflect the effects of current conditions. LGD estimates are based on our experience over past years.

For further details on the allowance for credit losses, see Note 5 to the interim consolidated financial statements.

Securitizations and structured entities

Securitization of our own assets

Effective November 1, 2013, with retrospective application to November 1, 2012, CIBC adopted IFRS 10 "Consolidated Financial Statements" which replaced IAS 27 "Consolidated and Separate Financial Statements" and Standards Interpretation Committee ("SIC") –12 "Consolidation – Special Purpose Entities". Under IFRS 10, judgment is exercised in determining whether an investor controls an investee including assessing whether the investor has: (i) power over the investee; (ii) exposure, or rights, to variable returns from its involvement with the investee; and (iii) the ability to affect those returns through its power over the investee.

We sponsor several structured entities that purchase and securitize our own assets including the Cards II Trust, Broadway Trust and Crisp Trust, which we continue to consolidate under IFRS 10.

We also securitize our own mortgage assets through a government-sponsored securitization program. We sell these securitized assets to a governmentsponsored securitization vehicle that we do not consolidate, as well as to other third parties. IAS 39 "Financial Instrument Recognition and Measurement" provides guidance on when to derecognize financial assets. A financial asset is derecognized when the contractual rights to receive cash flows from the asset have expired, or when we have transferred the rights to receive cash flows from the asset such that:

- We have transferred substantially all the risks and rewards of the asset; or
- We have neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

We have determined that our securitization activities related to residential mortgages and cards receivables are accounted for as secured borrowing transactions because we have not met the aforementioned criteria.

In addition, we sell and derecognize commercial mortgages through a pass-through arrangement with a trust that securitizes these mortgages into ownership certificates held by various external investors. We continue to perform special servicing of the mortgages in exchange for a market-based fee and do not consolidate the trust. We also sell certain U.S. commercial mortgages to third-parties which qualify for derecognition because we have transferred substantially all the risks and rewards of the mortgages and have no continuous involvement after the transfer.

Securitization of third-party assets

We also sponsor several structured entities that purchase pools of third-party assets. We monitor the extent to which we support these structured entities through direct investment in the debt issued by the structured entities and through the provision of liquidity protection to the other debtholders, to assess whether we should consolidate these entities.

Where we consider that CIBC should consolidate a structured entity, IFRS 10 requires that we reconsider this assessment if facts and circumstances indicate that there are changes to one or more of the three elements of control described above, for example, when any of the parties gains or loses power, or

when there is a change in the parties' exposure or rights to variable returns from its involvement with the investee. Specifically, in relation to our multi-seller conduits, we reconsider our consolidation assessment whenever our level of interest in the ABCP issued by the conduits changes significantly, or in the rare event that the liquidity facility we provide to the conduits is drawn or amended.

A significant increase in our holdings of the outstanding commercial paper by the conduits would become more likely in a scenario in which the market for bank-sponsored ABCP suffered a significant deterioration such that the conduits were unable to roll their ABCP.

For additional information on the securitizations of our own assets and third-party assets, see the "Off-balance sheet arrangements" section and Note 6 to the interim consolidated financial statements.

Asset impairment

Goodwill, other intangible assets and long-lived assets

As at January 31, 2014, we had goodwill of \$1,870 million (October 31, 2013: \$1,733 million) and other intangible assets with an indefinite life of \$138 million (October 31, 2013: \$136 million). Goodwill is not amortized, but is tested, at least annually, for impairment by comparing the recoverable amount of the cash-generating unit (CGU) to which goodwill has been allocated, with the carrying amount of the CGU including goodwill. Any deficiency is recognized as impairment of goodwill. The recoverable amount of a CGU is defined as the higher of its estimated fair value less cost to sell or value in use.

Acquired intangible assets are separately recognized if the benefits of the intangible assets are obtained through contractual or other legal rights, or if the intangible assets can be sold, transferred, licensed, rented, or exchanged. Determining the useful lives of intangible assets requires judgment and fact-based analysis. Intangibles with an indefinite life are not amortized but are assessed for impairment by comparing the recoverable amount to the carrying amount.

Long-lived assets and other identifiable intangibles with a definite life are amortized over their estimated useful lives. These assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount is higher than the recoverable amount. The recoverable amount is defined as the higher of its estimated fair value less cost to sell and value in use. In calculating the recoverable amount we estimate the future cash flows expected to result from the use of the asset and its eventual disposition.

We performed our annual impairment testing of goodwill and indefinite lived intangible assets in the fourth quarter of 2013 and did not record any impairment at that time. At that time we determined that our estimate of the recoverable amount of the CIBC FirstCaribbean CGU approximated its carrying amount as at August 1, 2013. As a result, no impairment charge was recognized.

The recoverable amount of CIBC FirstCaribbean estimated in the fourth quarter of 2013 was based on a value in use calculation that was estimated using a five-year cash flow projection approved by CIBC FirstCaribbean's management and an estimate of the capital required to be maintained in the region to support ongoing operations. The five-year cash flow projection was consistent with CIBC FirstCaribbean's three-year internal plan that was reviewed by its Board of Directors. The forecast reflected the currently challenging economic conditions and an expected recovery in those conditions within the Caribbean region. A terminal growth rate of 2.5% (2.5% as at August 1, 2012) was applied to the years after the five-year forecast. All of the forecast cash flows were discounted at an after-tax rate of 13% (14.25% pre-tax) which we believe to be a risk-adjusted interest rate appropriate to CIBC FirstCaribbean (we used an identical after-tax rate of 13% as at August 1, 2012). The determination of a discount rate and a terminal growth rate both require the exercise of judgment. The discount rate was determined based on the following primary factors: (i) the risk-free rate; (ii) an equity risk premium; (iii) beta adjustment to the equity risk premium based on a review of betas of comparable publicly traded financial institutions in the region; and (iv) a country risk premium. The terminal growth rate was based on the forecast inflation rates and management's expectations of real growth.

Reductions in the estimated recoverable amount could arise from various factors, such as reductions in forecasted cash flows, an increase in the assumed level of required capital, and any adverse changes to the discount rate or the terminal growth rate either in isolation or in any combination thereof. In the fourth quarter of 2013 we estimated that a 10% decrease in each of the terminal year's and subsequent years' forecasted cash flows would result in a reduction in the estimated recoverable amount of CIBC FirstCaribbean by approximately \$150 million. We also estimated that a 50 basis point increase in the after-tax discount rate would result in a reduction in the estimated recoverable amount of CIBC FirstCaribbean by approximately \$150 million. We also estimated that a 50 basis point increase in the after-tax discount rate would result in a reduction in the estimated recoverable amount of CIBC FirstCaribbean by approximately \$150 million. We also estimated that a 50 basis point increase in the after-tax discount rate would result in a reduction in the estimated recoverable amount of CIBC FirstCaribbean by approximately \$150 million. We also estimated that a 50 basis point increase in the after-tax discount rate would result in a reduction in the estimated recoverable amount of CIBC FirstCaribbean by approximately \$190 million. These sensitivities are indicative only and should be considered with caution, as the effect of the variation in each assumption on the estimated recoverable amount was calculated in isolation without changing any other assumptions. In practice, changes in one factor may result in changes in another, which may magnify or counteract the disclosed sensitivities. For additional details, see Note 8 to the 2013 annual consolidated financial statements.

Economic conditions in the Caribbean region remain challenging and we continue to monitor our investment. Reductions in the estimated recoverable amount of our CIBC FirstCaribbean CGU could result in goodwill impairment charges in future periods.

Income taxes

We are subject to income tax laws in the various jurisdictions where we operate, and the tax laws in those jurisdictions are potentially subject to different interpretations by us and the relevant taxation authority. We use judgment in the estimation of income taxes and deferred income tax assets and liabilities. As a result, management judgment is applied in the interpretation of the relevant tax laws and in estimating the provision for current and deferred income taxes. A deferred tax asset or liability is determined for each temporary difference based on the tax rates that are expected to be in effect in the period that the asset is realized or the liability is settled. Where the temporary differences will not reverse in the foreseeable future, no deferred tax amount is recognized.

As at January 31, 2014, we had a deferred income tax asset of \$548 million (October 31, 2013: \$526⁽¹⁾ million) and a deferred income tax liability of \$31 million (October 31, 2013: \$33⁽¹⁾ million). We are required to assess whether it is probable that our deferred income tax asset will be realized prior to its expiration and, based on all the available evidence, determine if any portion of our deferred income tax asset should not be recognized. The factors used to assess the probability of realization are our past experience of income and capital gains, forecast of future net income before taxes, available tax planning strategies that could be implemented to realize the deferred income tax asset, and the remaining expiration period of tax loss carryforwards. Although realization is not assured, we believe, based on all the available evidence, it is probable that the remaining deferred income tax asset will be realized.

Income tax accounting impacts all our reporting segments. For further details of our income taxes, see Note 10 to the interim consolidated financial statements.

(1) Restated to reflect the changes in accounting policies stated in Note 1 to the interim consolidated financial statements and to conform to the presentation adopted in the current period.

Provisions and contingent liabilities

In the ordinary course of its business, CIBC is a party to a number of legal proceedings, including regulatory investigations, in which claims for substantial monetary damages are asserted against CIBC and its subsidiaries. Legal provisions are established if, in the opinion of management, it is both probable that an outflow of economic benefits will be required to resolve the matter, and a reliable estimate can be made of the amount of the obligation. If the reliable estimate of probable loss involves a range of potential outcomes within which a specific amount within the range appears to be a better estimate, that amount is accrued. If no specific amount within the range of potential outcomes appears to be a better estimate than any other amount, the mid-point in the range is

accrued. In some instances, however, it is not possible either to determine whether an obligation is probable or to reliably estimate the amount of loss, in which case no accrual can be made.

While there is inherent difficulty in predicting the outcome of legal proceedings, based on current knowledge and in consultation with legal counsel, we do not expect the outcome of these matters, individually or in aggregate, to have a material adverse effect on our consolidated financial statements. However, the outcome of these matters, individually or in aggregate, may be material to our operating results for a particular reporting period. We regularly assess the adequacy of CIBC's litigation accruals and make the necessary adjustments to incorporate new information as it becomes available.

The provisions disclosed in Note 23 to the 2013 annual consolidated financial statements include all of CIBC's accruals for legal matters as at that date, including amounts related to the significant legal proceedings described in that note and to other legal matters.

CIBC considers losses to be reasonably possible when they are neither probable nor remote. It is reasonably possible that CIBC may incur losses in addition to the amounts recorded when the loss accrued is the mid-point of a range of reasonably possible losses, or the potential loss pertains to a matter in which an unfavourable outcome is reasonably possible but not probable.

CIBC believes the estimate of the aggregate range of reasonably possible losses in excess of the amounts accrued for its significant legal proceedings, where it is possible to make such an estimate, is from nil to approximately \$240 million as at January 31, 2014. This estimated aggregate range of reasonably possible losses is based upon currently available information for those significant proceedings in which CIBC is involved, taking into account CIBC's best estimate of such losses for those cases for which an estimate can be made. CIBC's estimate involves significant judgment, given the varying stages of the proceedings and the existence of multiple defendants in many of such proceedings whose share of the liability has yet to be determined. The range does not include potential punitive damages and interest. The matters underlying the estimated range as at January 31, 2014 consist of the significant legal matters disclosed in Note 23 to the 2013 annual consolidated financial statements as updated below. The matters underlying the estimate can currently be made as many of them are in preliminary stages and certain matters have no specific amount claimed. Consequently, these matters are not included in the range.

The following developments related to our significant legal matters occurred since the issuance of our 2013 annual consolidated financial statements:

- Marcotte Visa Class Action: The appeal was heard by the Supreme Court of Canada in February 2014. The court reserved its decision.
- Green Secondary Market Class Action: In February 2014 the Ontario Court of Appeal released its decision overturning the lower court and allowing the matter to proceed as a certified class action.
- Brown Overtime Class Action: The plaintiffs' appeal to the Ontario Court of Appeal is scheduled for May 2014.

Other than the items described above, there are no significant developments in the matters identified in Note 23 to our 2013 annual consolidated financial statements, and no significant new matters have arisen since the issuance of our 2013 annual consolidated financial statements.

Post-employment and other long-term benefit plan assumptions

We sponsor a number of benefit plans to eligible employees, including registered and supplemental pension plans, and post-retirement medical and dental plans (other post-employment benefit plans). We also continue to sponsor a long-term disability (LTD) income replacement plan and associated medical and dental benefits (collectively, other long-term benefit plans). The LTD plan was closed to new claims effective June 1, 2004.

Effective November 1, 2013, with retrospective application to November 1, 2011, CIBC adopted amendments to IAS 19 "Employee Benefits". The amendments require the following: (i) recognition of actuarial gains and losses in OCI in the period in which they arise; (ii) recognition of interest income on plan assets in net income using the same rate as that used to discount the defined benefit obligation; and (iii) recognition of all past service costs (gains) in net income in the period in which they arise. See Note 1 to the interim consolidated financial statements for further details on the impact of the adoption of the amendments to IAS 19 on prior periods.

The calculation of net defined benefit plan expense and obligations depends on various actuarial assumptions such as discount rates, health-care cost trend rates, turnover of employees, projected salary increases, retirement age, and mortality rates. The actuarial assumptions used for determining the net defined benefit expense for a fiscal year are set at the beginning of the annual reporting period, are reviewed in accordance with accepted actuarial practice and are approved by management.

The discount rate assumption used in measuring the net defined benefit expense and defined benefit obligations reflects market yields, as of the measurement date, on high quality debt instruments with a currency and term to maturity that match the currency and expected timing of benefit payments. Our discount rate is estimated by developing a yield curve based on high quality corporate bonds. While there is a deep market of high quality corporate bonds denominated in Canadian dollars with short and medium terms to maturity, there is not a deep market in bonds with terms to maturity that match the timing of all the expected benefit payments for all of our Canadian plans. As a result, for our Canadian pension, other post-employment and other long-term benefit plans, we estimate the yields of high quality corporate bonds with longer term maturities by extrapolating current yields on bonds with short- and medium-term durations along the yield curve. Judgment is required in constructing the yield curve, and as a result, different methodologies applied in constructing the yield curve can give rise to different discount rates.

As a result of adopting the amendments to IAS 19, commencing in the first quarter of 2014, with retrospective application for fiscal 2013 and 2012, we remeasure our Canadian post-employment benefit plans on a quarterly basis for changes in the discount rate and for actual assets returns, with the actuarial gains and losses recognized in OCI (see Note 1 to the interim consolidated financial statements for further details).

For further details of our annual pension and other post-employment expense and obligations, see Note 19 to the 2013 annual consolidated financial statements and Note 1 to the interim consolidated financial statements.

Regulatory developments

Dodd-Frank Wall Street Reform and Consumer Protection Act

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") was enacted in the U.S. in July 2010. The Dodd-Frank Act contains many broad reforms impacting the financial services industry, including, among other things, increased consumer protection, regulation of the OTC derivative markets, heightened capital, liquidity and prudential standards, and restrictions on proprietary trading by banks. The Dodd-Frank Act will affect every financial institution in the U.S. and many financial institutions that operate outside the U.S. As many aspects of the Dodd-Frank Act are subject to rulemaking that U.S. regulators have not finalized, the full impact on CIBC is difficult to anticipate until all the regulations are finalized and released. CIBC continually monitors developments to prepare for rulemakings that have the potential to impact our operations in the U.S. and elsewhere.

In December 2012, CIBC registered as a swap dealer with the U.S. Commodity Futures Trading Commission (CFTC) and adopted processes and procedures necessary to comply with newly-promulgated U.S. regulations in trading swaps with U.S. persons. The CFTC has issued final rules on most areas relating to swaps, including cross-border guidance that impacts CIBC's swap trading with non-U.S. counterparties. The CFTC has not yet issued final rules on

clearing, capital and margin, and the CFTC has not issued a determination of the extent to which it will rely on substituted compliance with Canadian swap trading regulations. CIBC will continue to monitor and prepare for developments by the CFTC in this area. Additionally, the U.S. Securities and Exchange Commission is expected to implement parallel reforms applying to the securities-based swaps markets. While these far-reaching reforms have increased our cost of regulatory compliance and may restrict our ability to continue to engage in certain types of trading activity, we do not expect them to have a significant impact on our results.

On February 18, 2014, the Federal Reserve Board released final enhanced prudential standards for large U.S. bank holding companies and foreign banking organizations (FBOs) with total consolidated assets of \$50 billion or more. The new enhanced prudential standards include six primary requirements: risk-based capital and leverage requirements; liquidity requirements; single counterparty exposure limits; internal risk management standards; debt-to-equity limits; and annual stress testing. The new rules also require FBOs to maintain liquidity buffers in their U.S. branches and agencies and, if certain asset thresholds are met, to create a U.S. intermediate holding company which will also be subject to enhanced prudential standards. FBOs are subject to the final rules' new requirements beginning on July 1, 2016. CIBC is evaluating the impact of the final rules on our operations.

The Dodd-Frank Act also mandates the so-called Volcker Rule, which restricts certain proprietary trading and private equity fund activities of banking entities operating in the U.S. In December 2013, five U.S. regulatory agencies jointly published final regulations implementing the Volcker rule. The final regulations and the accompanying materials are complex and will require CIBC to implement new controls and to develop new systems to ensure compliance with the rule's reporting obligations and restrictions. The regulations are effective on April 1, 2014, and banking entities must engage in good-faith efforts that will result in conformance with the rule by July 21, 2015. CIBC is actively assessing the impact of the Volcker rule on our operations and developing a conformance plan for full implementation. The new regulations also contain various provisions that enable banks to seek extensions in certain circumstances and CIBC may seek such extensions where necessary or appropriate.

The Foreign Account Tax Compliance Act

The Foreign Account Tax Compliance Act (FATCA) is U.S. legislation, the intent of which is to discourage tax evasion by U.S. taxpayers who have placed assets in financial accounts outside of the U.S. – either directly or indirectly through foreign entities such as trusts and corporations.

Under the final FATCA regulations, non-U.S. financial institutions will be required to identify and report accounts owned or controlled by U.S. taxpayers, including citizens of the U.S. worldwide (U.S. Accounts). In addition, identification and reporting will also be required on accounts of financial institutions that do not comply with FATCA regulations. On February 5, 2014, the Government of Canada announced the signing of an Intergovernmental Agreement (IGA) with the United States, to facilitate FATCA information reporting by Canadian financial institutions. Under proposed legislation to implement the provisions of the IGA, Canadian financial institutions must report information on certain U.S. Accounts directly to the Canada Revenue Agency. Other countries in which CIBC operates have signed, or are in the process of negotiating and signing, IGAs with the United States. CIBC will meet all FATCA obligations, in accordance with local law.

The provisions of FATCA and the related Canadian legislation come into effect on July 1, 2014.

Principles for Effective Risk Data Aggregation and Risk Reporting

In January 2013, the BCBS published "Principles for Effective Risk Data Aggregation and Risk Reporting". The Principles outline BCBS's expectations to enhance risk data governance oversight and to improve risk data aggregation and reporting practices, thereby facilitating timely, consistent, and accurate decision making. It is expected that we will be subject to greater reporting scrutiny and may incur increased operating costs as a result of the Principles. We have begun an enterprise wide Risk Data Aggregation initiative to be compliant with the Principles.

Controls and procedures

Disclosure controls and procedures

CIBC's management, with the participation of the President and Chief Executive Officer and the Chief Financial Officer, has evaluated the effectiveness of CIBC's disclosure controls and procedures as at January 31, 2014 (as defined in the rules of the SEC and the Canadian Securities Administrators) and has concluded that such disclosure controls and procedures were effective.

Changes in internal control over financial reporting

There have been no changes in CIBC's internal control over financial reporting during the quarter ended January 31, 2014, that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

Certain information has been restated to reflect the changes in accounting policies stated in Note 1 and to conform to the presentation adopted in the current period.
 Comprises amortization and impairment of buildings, furniture, equipment, leasehold improvements, and software and other intangible assets.
 Includes restricted balance of \$286 million (October 31, 2013: \$264 million; January 31, 2013: \$269 million).

Notes to the interim consolidated financial statements (Unaudited)

The interim consolidated financial statements of CIBC are prepared in accordance with Section 308(4) of the Bank Act, which states that, except as otherwise specified by the Office of the Superintendent of Financial Institutions (OSFI), the financial statements are to be prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board. There are no accounting requirements of OSFI that are exceptions to IFRS.

These interim consolidated financial statements have been prepared in accordance with International Accounting Standard (IAS) 34 "Interim Financial Reporting" and do not include all of the information required for full annual consolidated financial statements. These interim consolidated financial statements follow the same accounting policies and their methods of application as CIBC's consolidated financial statements for the year ended October 31, 2013, except as noted.

All amounts in these interim consolidated financial statements are presented in Canadian dollars, unless otherwise indicated. These interim consolidated financial statements were authorized for issue by the Board of Directors on February 26, 2014.

1. Changes in accounting policies

Effective November 1, 2013, CIBC adopted several new and amended accounting pronouncements as described below.

(a) Retrospective application of new and amended standards

The amendments to IAS 19 "Employee Benefits" and IFRS 10 "Consolidated Financial Statements" were adopted retrospectively as described below.

IAS 19 "Employee Benefits" – In June 2011, the IASB published an amended version of IAS 19. The amendments require the following: (i) recognition of actuarial gains and losses in OCI in the period in which they arise; (ii) recognition of interest income on plan assets in net income using the same rate as that used to discount the defined benefit obligation; and (iii) recognition of all past service costs (gains) in net income in the period in which they arise. We adopted the amendments to IAS 19 on a retrospective basis effective November 1, 2011.

Consistent accounting policies are applied for the purposes of applying the equity-method for our investments in equity-associates and joint ventures, and therefore the retrospective application of the amendments also impacted the accounting for certain of our equity-accounted investments in associates.

IFRS 10 "Consolidated Financial Statements", issued in May 2011, replaces the consolidation guidance in IAS 27 "Consolidated and Separate Financial Statements" and Standards Interpretation Committee (SIC) – 12 "Consolidation – Special Purpose Entities". IFRS 10 introduces a single consolidation model for all entities based on control, irrespective of the nature of the investee. Under IFRS 10, an investor controls an investee when an investor has: (i) power over the investee; (ii) exposure, or rights, to variable returns from its involvement with the investee; and (iii) the ability to use its power over the investee to affect the amount of the investor's returns. We adopted IFRS 10 on a retrospective basis effective November 1, 2012.

The adoption of IFRS 10 required us to deconsolidate CIBC Capital Trust from our consolidated financial statements. Although we have the ability to direct the relevant activities of CIBC Capital Trust, we do not have exposure to variable returns from our involvement in CIBC Capital Trust as we pass our credit risk into the Trust by issuing senior deposit notes to CIBC Capital Trust.

The deconsolidation of CIBC Capital Trust resulted in us removing Capital Trust securities issued by CIBC Capital Trust from our consolidated balance sheet effective November 1, 2012, and instead recognizing the senior deposit notes issued by CIBC to CIBC Capital Trust in Business and government deposits. We recognized an increase in shareholders' equity as at November 1, 2012 and October 31, 2013 due to the reversal of losses previously recognized on Capital Trust securities repurchased by CIBC.

The impact on the consolidated balance sheets as a result of the retrospective application of the amendments to IAS 19 and IFRS 10 was as follows:

(b) Other changes in accounting standards

The following standards and amendments to standards were also adopted effective November 1, 2013.

IFRS 11 "Joint Arrangements", issued in May 2011, requires entities which had previously accounted for joint ventures using proportionate consolidation to collapse the proportionately consolidated net asset value (including any allocation of goodwill) into a single investment balance at the beginning of the earliest period presented using the equity method. As we presently apply the equity method for our joint arrangements under IFRS, the adoption of IFRS 11 did not impact our consolidated financial statements.

IFRS 12 "Disclosure of Interests in Other Entities", issued in May 2011, requires enhanced disclosures about both consolidated entities and unconsolidated entities in which an entity has involvement. The objective of IFRS 12 is to provide information to enable users to evaluate the nature of, and risks associated with, its interest in other entities, including subsidiaries, joint arrangements, associates and unconsolidated structured entities, and the effects of those interests on our consolidated financial statements. IFRS 12 did not impact our consolidated financial statements; however, additional disclosures will be provided in our annual consolidated financial statements.

As a result of the issuance of IFRS 10, IFRS 11 and IFRS 12, the IASB issued amended and renamed IAS 27 "Separate Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures". The amended IAS 27 removes its existing consolidation model and requirements related to consolidated financial statements as they are now addressed in IFRS 10. The amended IAS 27 prescribes the accounting for investments in subsidiaries, jointly controlled entities and associates in separate financial statements. Amended IAS 28 outlines how to apply the equity method to investments in associates and joint ventures. The adoption of amended IAS 27 and IAS 28 did not impact our consolidated financial statements.

IFRS 13 "Fair Value Measurement", issued in May 2011, replaces the fair value measurement guidance contained in individual IFRSs with a single standard for measuring fair value. IFRS 13 provides expanded disclosure about fair value measurements for both financial and non-financial assets and liabilities measured at fair value on a recurring or non-recurring basis and for items not measured at fair value but for which fair value is disclosed. Adoption of this standard did not result in changes to how we measure fair value. However, additional disclosures related to the type and range of inputs used in the estimation of the fair value of financial instruments measured at fair value on the balance sheet that are considered to be in Level 3 of the fair value hierarchy have been included in Note 2 of our interim consolidated financial statements. In addition, we will be required to provide additional disclosures related to the fair value of financial instruments measured cost on our balance sheet, such as loans and deposits, including how the disclosed fair values fit into the fair value hierarchy in our annual consolidated financial statements.

IFRS 7 "Disclosures – Offsetting Financial Assets and Financial Liabilities", issued in December 2011, contains amendments to IFRS 7 and requires new disclosure for financial assets and liabilities that are offset in the balance sheet or are subject to master netting arrangements or similar arrangements. The amendments did not impact our consolidated financial statements; however, additional disclosures will be provided in our annual consolidated financial statements.

2. Fair value measurements

Fair value is defined as the price that would be received to sell an asset, or paid to transfer a liability, between market participants in an orderly transaction in the principal market at the measurement date under current market conditions (i.e. the exit price). The determination of fair value requires judgment and is based on market information, where available and appropriate. Fair value measurements are categorized into three levels within a fair value hierarchy (Level 1, 2 or 3) based on the valuation inputs used in measuring the fair value, as outlined below.

- Level 1 Unadjusted quoted market prices in active markets for identical assets or liabilities we can access at the measurement date. Bid prices, ask prices or prices within the bid and ask, which are the most representative of the fair value, are used as appropriate to measure fair value. Fair value is best evidenced by an independent quoted market price for the same instrument in an active market. An active market is one where transactions are occurring with sufficient frequency and volume to provide quoted prices on an ongoing basis.
- Level 2 Quoted prices for identical assets or liabilities in markets that are inactive or observable market quotes for similar instruments, or use of
 valuation technique where all significant inputs are observable. Inactive markets may be characterized by a significant decline in the volume and level of
 observed trading activity or through large or erratic bid/offer spreads. In instances where traded markets do not exist or are not considered sufficiently
 active, we measure fair value using valuation models.
- Level 3 Non-observable or indicative prices or use of valuation technique where one or more significant inputs are non-observable.

For a significant portion of our financial instruments, quoted market prices are not available because of the lack of traded markets, and even where such markets do exist, they may not be considered sufficiently active to be used as a final determinant of fair value. When quoted market prices in active markets are not available, we would consider using valuation models. The valuation model and technique we select maximizes the use of observable market inputs to the extent possible and appropriate in order to estimate the price at which an orderly transaction would take place at the measurement date. In an inactive market, we consider all reasonably available information including any available pricing for similar instruments, recent arm's length market transactions, any relevant observable market inputs, indicative dealer or broker quotations, and our own internal model-based estimates.

Valuation adjustments are an integral component of our fair valuation process. We apply judgment in establishing valuation adjustments that take into account various factors that may have an impact on the valuation. Such factors include, but are not limited to, the bid-offer spread, illiquidity due to lack of market depth, parameter uncertainty and other market risk, model risk and credit risk. For derivatives, we have credit valuation adjustments (CVA) that factor in counterparty, as well as our own credit risk, and a valuation adjustment for administration costs.

Generally, the unit of account for a financial instrument is the individual instrument, and valuation adjustments are applied at an individual instrument level, consistent with that unit of account. In cases where we manage a group of financial assets and liabilities that consist of substantially similar and offsetting risk exposures, the valuation adjustments for financial assets and liabilities are measured on the basis of the net open risks.

We apply judgment in determining the most appropriate inputs and the weighting we ascribe to each such input as well as in our selection of valuation methodologies. Regardless of the valuation technique we use, we incorporate assumptions that we believe market participants would make for credit, funding, and liquidity considerations. When the fair value of a financial instrument at inception is determined using a valuation technique that incorporates significant non-observable market inputs, no inception profit or loss (the difference between the determined fair value and the transaction price) is recognized at the time the asset or liability is first recorded. Any gains or losses at inception are deferred and recognized only in future periods over the term of the instruments or when market quotes or data become observable.

We have an ongoing process for evaluating and enhancing our valuation techniques and models. Where enhancements are made, they are applied prospectively, so that fair values reported in prior periods are not recalculated on the new basis. Valuation models used, including analytics for the construction of yield curves and volatility surfaces, are vetted and approved, consistent with our model risk policy.

To ensure that valuations are appropriate, we have established internal guidance on fair value measurement, which is reviewed periodically in recognition of the dynamic nature of markets and the constantly evolving pricing practices in the market. A number of policies and controls are put in place to ensure the internal guidance on fair value measurement is being applied consistently and appropriately. Fair value of publicly issued securities and derivatives is independently validated at least once a month. Valuations are verified to external sources such as exchange quotes, broker quotes or other management-approved independent pricing sources. Key model inputs, such as yield curves and volatilities, are independently verified. The results from the independent price validation and any valuation adjustments are reviewed by the Independent Price Verification Committee on a monthly basis. This includes, but is not limited to, reviewing fair value adjustments and methodologies, independent price verification results, limits and valuation uncertainty. Fair value of privately issued securities is reviewed on a quarterly basis.

Due to the judgment used in applying a wide variety of acceptable valuation techniques and models, as well as the use of estimates inherent in this process, estimates of fair value for the same or similar assets may differ among financial institutions. The calculation of fair value is based on market conditions as at each balance sheet date, and may not be reflective of ultimate realizable value.

Details on fair value methods and assumptions used for determining fair value of our financial instruments are disclosed in pages 105 to 107 of the 2013 Annual Report. The table below presents the level in the fair value hierarchy into which the fair values of financial instruments that are carried at fair value on the interim consolidated balance sheet are categorized:

Certain information has been restated to reflect the changes in accounting policies stated in Note 1 and to conform to the presentation adopted in the current period.
 Comprises FVO deposits of \$2,018 million (October 31, 2013: \$1,764 million), FVO secured borrowings of \$351 million (October 31, 2013: \$352 million), bifurcated embedded derivatives of \$375 million

(2) Comprises EVO deposits of \$2,018 million (October 31, 2013; \$1,764 million, EVO secured borrowings of \$351 million (October 31, 2013; \$352 million), brurcated embedded derivatives of \$375 million (October 31, 2013; \$348 million), and EVO other liabilities of \$2 million (October 31, 2013; \$2 million). Changes in our own credit risk had an insignificant impact on the determination of the fair value of our EVO deposits.

Transfers into or out of Level 3 can occur as a result of additional or new information regarding valuation inputs and changes in their observability. Transfers between levels in the fair value hierarchy are deemed to have occurred at the beginning of the reporting period. During the quarter, we transferred \$470 million of trading securities and \$404 million of securities sold short from Level 1 to Level 2, and \$13 million of corporate equity securities from Level 3 to Level 1.

The net gain recognized in the interim consolidated statement of income on the financial instruments, for which fair value was estimated using valuation techniques requiring non-observable inputs, for the quarter ended January 31, 2014 was \$53 million (October 31, 2013: net gain of \$23 million; January 31, 2013: net gain of \$47 million).

The following table presents the changes in fair value of financial assets and liabilities in Level 3. These instruments are measured at fair value utilizing non-observable market inputs. We often hedge positions with offsetting positions that may be classified in a different level. As a result, the gains and losses for assets and liabilities in the Level 3 category presented in the table below do not reflect the effect of offsetting gains and losses on the related hedging instruments that are classified in Level 1 and Level 2.

Total liabilities	\$ (1,248)	·			

Adjusted net asset value is determined using reported net asset values obtained from the fund manager or general partner of the limited partnership and may be adjusted for current market levels where
appropriate.

(2) Using valuation techniques which we consider to be non-observable.

(3) Net of CVA reserves related to financial guarantors calculated based on reserve rates (as a percentage of fair value) ranging from 16% to 79%.

(4) Excludes financial guarantors. n/a Not applicable.

Sensitivity of Level 3 financial assets and liabilities

The following section describes the significant non-observable inputs identified in the table above, the inter-relationships between those inputs and the sensitivity of fair value to changes in those inputs. We performed our Level 3 sensitivity analysis on an individual instrument basis, except for instruments managed within our structured credit run-off business for which we performed the sensitivity analysis on a portfolio basis to reflect the manner in which those financial instruments are managed.

Within our structured credit run-off business our primary sources of exposure, which are derived either through direct holdings or derivatives, are U.S. residential mortgage market contracts, collateralized loan obligations (CLOs), corporate debt and other securities and loans. Structured credit positions classified as loans and receivables are carried at amortized cost and are excluded from this sensitivity analysis. The structured credit positions carried on the consolidated balance sheet at fair value are within trading securities, FVO securities, FVO structured note liability within deposits and derivatives. These fair values are generally derived from and are sensitive to non-observable inputs, including indicative broker quotes and internal models that utilize default rates, recovery rates, prepayment rates and credit spreads. Indicative broker quotes are derived from proxy pricing in an inactive market or from the brokers' internal valuation models. These quotes are used to value our trading and FVO securities, our FVO structured note liability and derivative positions. A significant increase in the indicative broker prices or quotes would result in an increase in the fair value of our credit derivatives. The fair value of our credit derivatives referencing CLO assets are also impacted by other key non-observable inputs, including:

• Prepayment rates – which are a measure of the future expected repayment of a loan by a borrower in advance of the scheduled due date. Prepayment rates are driven by consumer behaviour, economic conditions and other factors. A significant increase in prepayment rates of the underlying loan collateral of the referenced CLO assets would result in an increase in the fair value of the referenced CLO assets and a decrease in our Level 3 credit derivatives.

- Recovery rates which are an estimate of the amount that will be recovered following a default by a borrower. Recovery rates are expressed as one minus a loss given default rate. Hence, a significant increase in the recovery rate of the underlying defaulted loan collateral of the referenced CLO assets would result in an increase in the fair value of the referenced CLO assets and a decrease in the fair value of our Level 3 credit derivatives.
- Credit spreads which are the premium over a benchmark interest rate in the market to reflect a lower credit quality of a financial instrument and forms part of the discount rate used in a discounted cash flow model. A significant increase in the credit spread, which raises the discount rate applied to future cash flows of the referenced CLO assets would result in a decrease in the fair value of referenced CLO assets and an increase in the fair value of our Level 3 credit derivatives.
- Default rates or probabilities of default which are the likelihood of a borrower's inability to repay its obligations as they become contractually due. A significant increase in the default rate of the underlying loan collateral of the referenced CLO assets up to a certain reasonably possible level would result in an increase in the fair value of the referenced CLO assets and a decrease in the fair value of our Level 3 credit derivatives. This impact is due to accelerated principal repayments from the defaulted underlying loan collateral and the subordination structure of the referenced CLO assets. In general, higher default rates have a positive correlation with credit spreads, but a negative correlation with recovery rates and prepayment rates, with the respective impact on fair value as described above.

The fair value of the credit derivatives is also sensitive to credit valuation adjustments for counterparty risk on both the credit derivative counterparty and on CIBC.

The impact of adjusting the indicative broker quotes, default rates, recovery rates, prepayment rates and credit spreads noted above to reasonably possible alternatives would increase the net fair value by up to \$48 million or decrease the net fair value by up to \$55 million in respect of financial instruments carried at fair value in our structured credit run-off business. Changes in fair value of a Level 3 FVO structured note liability and the Level 3 positions that the note hedges have no impact on this sensitivity analysis because reasonably possible changes in fair value are expected to be largely offsetting.

The fair value of our investments in private companies is derived from applying applicable valuation multiples to financial indicators such as revenue or earnings. Earnings multiples or revenue multiples represent the ratios of earning or revenue to enterprise value and are often used as non-observable inputs in the fair value measurement of our investments in private companies. We apply professional judgment in our selection of the multiple from comparable listed companies, which is then further adjusted for company specific factors. The fair value of private companies is sensitive to changes in the multiple we apply. A significant increase in earnings multiples or revenue multiples generally increases the fair value of our investments in private equities and by adjusting the multiple within a reasonably possible range, the aggregate fair value for our investment in private companies would increase by \$66 million or decrease by \$35 million.

The fair value of our limited partnerships (LPs) is determined based on the net asset value (NAV) provided by the fund managers, adjusted as appropriate. The fair value of LPs is sensitive to changes in the NAV and by adjusting the NAV within a reasonably possible range, the aggregate fair value of our LPs would increase or decrease by \$34 million.

The fair value of our asset-backed securities (ABS) is determined based on non-observable credit spreads and assumptions concerning the repayment of receivables underlying these ABS. The fair value of our ABS is sensitive to changes in the credit spreads and prepayment assumptions. A significant increase in credit spreads generally results in a decrease in the fair value of our Level 3 ABS and a significant increase in prepayment rates would result in a decrease in the fair value of our Level 3 ABS. By adjusting these non-observable inputs by reasonably alternative amounts, the fair value would increase or decrease by \$10 million.

Our bifurcated embedded derivatives are recorded within deposits and other liabilities. The determination of the fair value of certain bifurcated embedded derivatives requires significant assumptions and judgment to be applied to both the inputs and the valuation techniques employed. These embedded derivatives are sensitive to long-dated market volatility and correlation inputs, which we consider to be non-observable. Market volatility is a measure of the anticipated future variability of a market price and is an important input for pricing options which are inherent in many of our embedded derivatives. A higher market volatility generally results in a higher option price, with all else held constant, due to the higher probability of obtaining a greater return from the option, and results in an increase in the fair value of our Level 3 embedded derivative liabilities. Correlation inputs are used to value those embedded derivatives where the payout is dependent upon more than one market price. For example, the payout of an equity basket option is based upon the performance of a basket of stocks, and the inter-relationships between the price movements of those stocks. A positive correlation implies that two inputs tend to change the fair value in the same direction, while a negative correlation implies that two inputs tend to change the fair value in the opposite direction. Changes in market correlation could result in an increase or a decrease in the fair value of our Level 3 embedded derivative liabilities. By adjusting the non-observable inputs by reasonably alternative amounts, the fair value of our embedded derivative liabilities would increase or decrease by \$7 million.

3. Significant acquisition and dispositions

Aeroplan Agreements

On December 27, 2013, CIBC completed the transactions contemplated by the tri-party agreements with Aimia Canada Inc. (Aimia) and The Toronto-Dominion Bank (TD) that were announced on September 16, 2013.

CIBC sold to TD approximately 50% of its existing Aerogold VISA credit card portfolio, consisting primarily of credit card only customers, while CIBC retained the Aerogold VISA credit card accounts held by clients with broader banking relationships at CIBC.

The portfolio divested by CIBC consisted of \$3.3 billion of credit card receivables. Upon closing, CIBC received a cash payment from TD equal to the credit card receivables outstanding acquired by TD.

CIBC also received upon closing, in aggregate, \$200 million in upfront payments from TD and Aimia.

Under the terms of the agreements:

- CIBC continues to have rights to market the Aeroplan program and originate new Aerogold cardholders through its CIBC branded channels.
- The parties have agreed to certain provisions to compensate for the risk of cardholder migration from one party to another. There is potential for payments of up to \$400 million by TD/Aimia or CIBC for net cardholder migration over a period of 5 years.
- CIBC expects to receive annual commercial subsidy payments from TD of approximately \$38 million per year in each of the three years after closing.
- The CIBC and Aimia agreement includes an option for either party to terminate the agreement after the third year and provides for penalty payments due from CIBC to Aimia if holders of Aeroplan credit cards from CIBC's retained portfolio switch to other CIBC credit cards above certain thresholds.
- CIBC is working with TD under an interim servicing agreement to effect a smooth transition of the cardholders moving to TD.

In conjunction with the completion of the Aeroplan transaction, CIBC has fully released Aimia and TD from any potential claims in connection with TD becoming Aeroplan's primary financial credit card partner.

Acquisition of Atlantic Trust Private Wealth Management

On December 31, 2013, CIBC completed the acquisition of Atlantic Trust Private Wealth Management (Atlantic Trust) from its parent company, Invesco Ltd., for \$224 million (US\$210 million) plus working capital and other adjustments. Atlantic Trust, which has approximately US\$24 billion in assets under management (AUM), provides integrated wealth management solutions for high-net-worth individuals, families, foundations and endowments in the United States. The following summarizes the consideration transferred and the amounts of assets acquired and liabilities assumed at the acquisition date.

Consideration transferred The consideration transferred is as follows:

\$ millions, as at December 31, 2013	
Upfront cash payment	\$ 179
Contingent consideration, at fair value (deferred payment)	45
Working capital and other adjustments	12
Total consideration transferred	\$ 236

The deferred payment is payable in April 2014, and is subject to downward adjustment based on decreases in AUM until the final measurement date. The deferred payment, which cannot be a negative amount, represents contingent consideration that is classified as a financial liability.

The fair value of the contingent consideration was estimated at the closing date using a valuation technique that incorporated observable and nonobservable inputs, including assumptions for market appreciation of acquired AUM and redemptions during the measurement period.

The fair value of the contingent consideration liability will be remeasured until the final measurement date, with changes in fair value, if any, recognized in net income.

Assets acquired and liabilities assumed

The fair values of identifiable assets acquired and liabilities assumed were as follows. The allocation of the purchase price is subject to adjustment as CIBC completes the valuation of the assets acquired and liabilities assumed.

\$ millions, as at December 31, 2013	
Cash	\$ 44
AFS securities	4
Land, buildings and equipment	12
Other assets	32
Customer relationship intangible asset	89
Other liabilities	(28)
Net identifiable assets acquired	153
Goodwill arising on acquisition	83
Total consideration transferred	\$ 236

Intangible asset and goodwill

The customer relationship intangible asset arises from the acquired investment management contracts. The fair value was estimated using a discounted cash flow method based on estimated future cash flows arising from fees earned from the acquired AUM, which took into account expected net redemptions and market appreciation from existing clients, net of operating expenses and other cash outflows. The goodwill arising on acquisition of \$83 million mainly comprises the value of expected synergies and the value of new business growth arising from the acquisition.

Acquisition-related costs

Acquisition-related costs of \$5 million were included in Non-interest expenses.

Sale of equity investment

On November 29, 2013, CIBC sold an equity investment that was previously acquired through a loan restructuring in CIBC's exited European leveraged finance business. The transaction resulted in an after-tax gain, net of associated expenses, of \$57 million.

As at January 31, 2014, the amortized cost of 136 AFS securities that are in a gross unrealized loss position (October 31, 2013: 148 securities) exceeded their fair value by \$64 million (October 31, 2013: \$66 million). The securities that have been in a gross unrealized loss position for more than a year include 24 AFS securities (October 31, 2013: 24 securities), with a gross unrealized loss of \$36 million (October 31, 2013: \$40 million). We have determined that these AFS securities were not impaired.

Reclassification of financial instruments

In October 2008, amendments made to IAS 39 "Financial Instruments – Recognition and Measurement" and IFRS 7 "Financial Instruments – Disclosures" permitted certain trading financial assets to be reclassified to loans and receivables and AFS in rare circumstances. As a result of these amendments, we reclassified certain securities to loans and receivables and AFS with effect from July 1, 2008. During the three months ended January 31, 2014, we have not reclassified any securities.

The following tables show the carrying values, fair values, and income or loss impact of the assets reclassified:

\$ millions, as at		-	2014 1. 31				2013 ct. 31
	Fair value	Carr v	ying alue		Fair value		rrying value
Trading assets previously reclassified to loans and receivables Trading assets previously reclassified to AFS	\$ 2,599 7	\$ 2	,611 7	\$ 2	2,746 7	\$ 2	2,781 7
Total financial assets reclassified	\$ 2,606	\$2	,618	\$ 2	2,753	\$ 2	2,788
\$ millions, for the three months ended		-	2014 1. 31		2013 ct. 31		2013 an. 31
Net income (before taxes) recognized on assets reclassified Interest income Impairment write-downs		s s	18 - 18	\$	19 _ 19	\$	16 _ 16

		\$	21	\$	18	\$	24

The effective interest rates on trading securities previously reclassified to AFS ranged from 3% to 13% with expected recoverable cash flows of \$1.2 billion as of their reclassification date. The effective interest rates on trading assets previously reclassified to loans and receivables ranged from 4% to 10% with expected recoverable cash flows of \$7.9 billion as of their reclassification date.

5. Loans

Allowance for credit losses

	\$ 2,760	\$ 1,050	\$ 394	\$ 4,204	\$ 4,289

6. Structured entities and derecognition of financial assets

Structured entities

Structured entities are entities that have been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements. Structured entities include special purpose entities, which are entities that are created to accomplish a narrow and well-defined objective.

We consolidate a structured entity when the substance of the relationship indicates that we control the structured entity.

Details of our consolidated and non-consolidated structured entities are provided on pages 118 and 119 of the 2013 Annual Report, except for CIBC Capital Trust, which is no longer consolidated effective November 1, 2013. See Note 1 to the interim consolidated financial statements for additional details.

We have two covered bond programs, structured and legislative. Covered bonds are full recourse on-balance sheet obligations that are also fully collateralized by assets over which bondholders enjoy a priority claim in the event of CIBC's insolvency. Under the structured program we transfer a pool of insured mortgages and NHA MBS to the CIBC Covered Bond Guarantor Limited Partnership that warehouses these mortgages and serves as a guarantor to bondholders for payment of interest and principal. Under the legislative program, we transfer a pool of conventional uninsured mortgages to the CIBC Covered Bond (Legislative) Guarantor Limited Partnership that warehouses these mortgages and serves as a guarantor to bondholders for payment of interest and principal. For both covered bond programs, the assets are owned by the guarantor and not CIBC. As at January 31, 2014, our structured program has issued covered bond liabilities of \$11.5 billion with a fair value of \$11.6 billion (October 31, 2013: \$11.7 billion with a fair value of \$11.8 billion) and our legislative program has issued covered bond liabilities of \$2.0 billion with a fair value of \$2.0 billion (October 31, 2013: \$2.0 billion with a fair value of \$2.0 billion). The covered bond liabilities are supported by a contractually-determined portion of the assets transferred to the guarantor and certain contractual arrangements designed to protect the bondholders from adverse events, including foreign currency fluctuations.

With respect to Cards II Trust and Broadway Trust entities as at January 31, 2014, \$4.7 billion of credit card receivable assets with a fair value of \$4.8 billion (October 31, 2013: \$4.6 billion with a fair value of \$4.7 billion) supported associated funding liabilities of \$4.7 billion with a fair value of \$4.8 billion (October 31, 2013: \$4.6 billion with a fair value of \$4.7 billion).

As at January 31, 2014, there were \$2.0 billion (October 31, 2013: \$2.1 billion) of total assets in our non-consolidated multi-seller conduits. Our on-balance sheet amounts and maximum exposure to loss related to structured entities that are not consolidated are set out in the table below. The maximum exposure comprises the carrying value of unhedged investments, the notional amounts for liquidity and credit facilities, and the notional amounts less accumulated fair value losses for unhedged written credit derivatives on structured entity reference assets. The impact of CVA is not considered in the table below.

 Excludes structured entities established by Canada Mortgage and Housing Corporation (CMHC), Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac), Government National Mortgage Association (Ginnie Mae), Federal Home Loan Banks, Federal Farm Credit Bank, and Student Loan Marketing Association (Sallie Mae).

Comprises written credit default swaps and total return swaps under which we assume exposures and excludes all other derivatives.

Derecognition of financial assets

Details of the financial assets that did not qualify for derecognition are provided on page 119 of the 2013 Annual Report.

The following table provides the carrying amount and fair value of transferred financial assets that did not qualify for derecognition and the associated financial liabilities:

\$ millions, as at		2014 Jan. 31		2013 Oct. 31
	arrying mount	Fair value	Carrying amount	Fair value
Residential mortgages securitizations (1)	\$ 26,459	\$26,529	\$ 30,508	\$ 30,538
Securities held by counterparties as collateral under repurchase agreements ⁽²⁾⁽³⁾	690	690	1,159	1,159
Securities lent for securities collateral ⁽²⁾⁽³⁾	14,123	14,123	11,793	11,793
	\$ 41,272	\$41,342	\$ 43,460	\$ 43,490
Carrying amount of associated liabilities (4)	\$ 42,945	\$43,245	\$ 44,586	\$ 44,538

(1) Includes \$3.7 billion (October 31, 2013: \$7.2 billion) of mortgages underlying mortgage-backed securities held by CMHC counterparties as collateral under repurchase agreements. Government of Canada bonds have also been pledged as collateral to CMHC counterparties. Certain cash in transit balances related to the securitization process amounting to \$802 million (October 31, 2013: \$1,126 million) have been applied to reduce these balances.

(2) Does not include over-collateralization of assets pledged.

(3) Excludes third-party pledged assets

(4) Includes the obligation to return off-balance sheet securities collateral on securities lent.

Additionally, we securitized \$29.7 billion with a fair value of \$29.7 billion (October 31, 2013: \$25.2 billion with a fair value of \$25.2 billion) of mortgages that were not transferred to external parties.

(1) Commencing with the January 28, 2013 dividend payment, shares distributed under the Shareholder Investment Plan were acquired in the open market. Previously these shares were issued from treasury. Commencing June 14, 2013, employee contributions to our Canadian employee share purchase plan were acquired in the open market. Previously these shares were issued from treasury.
 Due to rounding.

Normal course issuer bid

On September 5, 2013, we announced that the Toronto Stock Exchange had accepted the notice of CIBC's intention to commence a normal course issuer bid. Purchases under this bid commenced on September 18, 2013 and will terminate upon the earlier of (i) CIBC purchasing up to a maximum of 8 million common shares, (ii) CIBC providing a notice of termination, or (iii) September 8, 2014.

During the quarter ended January 31, 2014, we purchased and cancelled an additional 1,415,100 common shares under this bid at an average price of \$89.87 for a total amount of \$127 million.

Regulatory capital and ratios

Our capital ratios and assets-to-capital multiple (ACM) are presented in the following table:

\$ millions, as at		2014 Jan. 31		2013 Oct. 31
Transitional basis		Juli J		000.01
Common Equity Tier 1 (CET1) capital	\$	16,705	\$	16,698

Tier 1 capital ratio		11.6%		11.8%
Total capital ratio		13.9%		14.3%
ACM		18.4 x		18.0 x
All-in basis				
CET1 capital	\$	13,347	\$	12,793
Tier 1 capital		16,189		15,888
Total capital		19,890		19,961
RWA		140,505		136,747
CET1 ratio		9.5%		9.4%
Tier 1 capital ratio		11.5%		11.6%
Total capital ratio		14.2%		14.6%

During the quarter ended January 31, 2014, we have complied with all of our regulatory capital requirements.

9. Post-employment benefit expense

The following table provides details on the post-employment benefit expenses recognized in the interim consolidated statement of income:

\$ millions, for the three months ended	2 Jan	014 . 31	-	2013 ⁽¹⁾ t. 31			
Defined benefit plans Pension plans Other post-employment plans	\$	46 10	\$	46 17	\$	52 10	
Total net defined benefit expense	\$	56	\$	63	\$	62	
Defined contribution plans CIBC's pension plans Government pension plans ⁽²⁾	\$	3 22	\$	2 21	\$	3 21	
Total defined contribution expense	\$	25	\$	23	\$	24	

(1) Certain information has been restated to reflect the changes in accounting policies stated in Note 1 and to conform to the presentation adopted in the current period.

(2) Includes Canada Pension Plan, Quebec Pension Plan, and U.S. Federal Insurance Contributions Act.

10. Income taxes

Deferred income tax assets and liabilities

As at January 31, 2014, we had available gross deferred income tax assets of \$548 million (October 31, 2013: \$526⁽¹⁾ million) and gross deferred income tax liabilities of \$31 million (October 31, 2013: \$33⁽¹⁾ million).

Enron

In prior years, the Canada Revenue Agency issued reassessments disallowing the deduction of approximately \$3 billion of the 2005 Enron settlement payments and related legal expenses. The matter is currently in litigation. The Tax Court of Canada trial on the deductibility of the Enron payments is scheduled to commence in October 2015.

Should we successfully defend our tax filing position in its entirety, we would recognize an additional accounting tax benefit of \$214 million and taxable refund interest of approximately \$199 million. Should we fail to defend our position in its entirety, we would incur an additional tax expense of approximately \$866 million and non-deductible interest of approximately \$124 million.

(1) Restated to reflect the changes in accounting policies stated in Note 1 and to conform to the presentation adopted in the current period.

11. Earnings per share

\$ millions, except number of shares and per share amounts, for the three months ended		2014 n. 31	2013 ⁽¹⁾ Oct. 31	2013 ⁽¹⁾ Jan. 31
Basic earnings per share Net income attributable to equity shareholders Less: Preferred share dividends and premiums	\$	1,174 25	\$ 832 24	\$ 783 25
Net income attributable to common shareholders	\$ 1	1,149	\$ 808	\$ 758
Weighted-average common shares outstanding (thousands)	398	8,539	399,819	403,332
Basic earnings per share	\$	2.88	\$ 2.02	\$ 1.88
Diluted earnings per share Net income attributable to diluted common shareholders	\$	1,149	\$ 808	\$ 758
Weighted-average common shares outstanding (thousands) Add: Stock options potentially exercisable ⁽²⁾ (thousands)	398	8,539 678	399,819 436	403,332 438
Weighted-average diluted common shares outstanding (thousands)	399	9,217	400,255	403,770
Diluted earnings per share	\$	2.88	\$ 2.02	\$ 1.88

 Certain information has been restated to reflect the changes in accounting policies stated in Note 1 and to conform to the presentation adopted in the current period.
 Excludes average options outstanding of 839,472 (October 31, 2013: 342,343; January 31, 2013: 346,801) with a weighted-average exercise price of \$92.68 (October 31, 2013: \$95.22; January 31, 2013: 346,801) \$95.62) for the quarter ended January 31, 2014, as the options' exercise prices were greater than the average market price of CIBC's common shares.

12. Contingent liabilities and provision

In the ordinary course of its business, CIBC is a party to a number of legal proceedings, including regulatory investigations, in which claims for substantial monetary damages are asserted against CIBC and its subsidiaries. Legal provisions are established if, in the opinion of management, it is both probable that an outflow of economic benefits will be required to resolve the matter, and a reliable estimate can be made of the amount of the obligation. If the reliable estimate of probable loss involves a range of potential outcomes within which a specific amount within the range appears to be a better estimate, that amount is accrued. If no specific amount within the range of potential outcomes appears to be a better estimate than any other amount, the mid-point in the range is accrued. In some instances, however, it is not possible either to determine whether an obligation is probable or to reliably estimate the amount of loss, in which case no accrual can be made.

While there is inherent difficulty in predicting the outcome of legal proceedings, based on current knowledge and in consultation with legal counsel, we do not expect the outcome of these matters, individually or in aggregate, to have a material adverse effect on our consolidated financial statements. However, the outcome of these matters, individually or in aggregate, may be material to our operating results for a particular reporting period. We regularly assess the adequacy of CIBC's litigation accruals and make the necessary adjustments to incorporate new information as it becomes available.

The provisions disclosed in Note 23 to the 2013 annual consolidated financial statements included all of CIBC's accruals for legal matters as at that date, including amounts related to the significant legal proceedings described in that note and to other legal matters.

CIBC considers losses to be reasonably possible when they are neither probable nor remote. It is reasonably possible that CIBC may incur losses in addition to the amounts recorded when the loss accrued is the mid-point of a range of reasonably possible losses, or the potential loss pertains to a matter in which an unfavourable outcome is reasonably possible but not probable.

CIBC believes the estimate of the aggregate range of reasonably possible losses, in excess of the amounts accrued, for its significant legal proceedings, where it is possible to make such an estimate, is from nil to approximately \$240 million as at January 31, 2014. This estimated aggregate range of reasonably possible losses is based upon currently available information for those significant proceedings in which CIBC is involved, taking into account CIBC's best estimate of such losses for those cases for which an estimate can be made. CIBC's estimate involves significant judgment, given the varying stages of the proceedings and the existence of multiple defendants in many of such proceedings whose share of the liability has yet to be determined. The range does not include potential punitive damages and interest. The matters underlying the estimated range as at January 31, 2014 consist of the significant legal matters disclosed in Note 23 to the 2013 annual consolidated financial statements as updated below. The matters underlying the estimated range will change from time to time, and actual losses may vary significantly from the current estimate. For certain matters, CIBC does not believe that an estimate can currently be made as many of them are in preliminary stages and certain matters have no specific amount claimed. Consequently, these matters are not included in the range.

The following developments related to our significant legal matters occurred since the issuance of our 2013 annual consolidated financial statements:

- Marcotte Visa Class Action: The appeal was heard by the Supreme Court of Canada in February 2014. The court reserved its decision.
- Green Secondary Market Class Action: In February 2014 the Ontario Court of Appeal released its decision overturning the lower court and allowing the matter to proceed as a certified class action.
- Brown Overtime Class Action: The plaintiffs' appeal to the Ontario Court of Appeal is scheduled for May 2014.

Other than the items described above, there are no significant developments in the matters identified in Note 23 to our 2013 annual consolidated financial statements, and no significant new matters have arisen since the issuance of our 2013 annual consolidated financial statements.

13. Segmented information

CIBC has three strategic business units (SBUs): Retail and Business Banking, Wealth Management and Wholesale Banking. These SBUs are supported by Corporate and Other.

Retail and Business Banking provides clients across Canada with financial advice, banking, investment, and authorized insurance products and services through a strong team of advisors and more than 1,100 branches, as well as our ABMs, mobile sales force, telephone banking, online and mobile banking.

Wealth Management provides relationship-based advisory services and an extensive suite of leading investment solutions to meet the needs of institutional, retail and high net worth clients. Our asset management, retail brokerage and private wealth management businesses combine to create an integrated offer, delivered through more than 1,500 advisors across Canada and the U.S.

Wholesale Banking provides a wide range of credit, capital markets, investment banking and research products and services to government, institutional, corporate and retail clients in Canada and in key markets around the world.

Corporate and Other includes the six functional groups – Technology and Operations, Corporate Development, Finance, Treasury, Administration, and Risk Management – that support CIBC's SBUs. The expenses of these functional groups are generally allocated to the business lines within the SBUs. Corporate and Other also includes our International banking operations comprising mainly CIBC FirstCaribbean, strategic investments in the CIBC Mellon joint ventures and The Bank of N.T. Butterfield & Son Limited, and other income statement and balance sheet items not directly attributable to the business lines.

Segment reporting changes

The following segment reporting changes were made in the first quarter of 2014. Prior period amounts were restated accordingly.

Sale of Aeroplan portfolio

On December 27, 2013, we sold approximately 50 percent of our Aerogold VISA portfolio, consisting primarily of credit card only customers, to TD. Accordingly, the revenue related to the sold credit card portfolio was moved from Personal Banking to the Other line of business within Retail and Business Banking.

Allocation of Treasury activities

Treasury-related transfer pricing will continue to be charged or credited to each line of business within our SBUs. We changed our approach to allocating the residual financial impact of Treasury activities. Certain fees will be charged directly to the lines of business, and the residual net revenue will now be retained in Corporate and Other.

Business unit allocations

Treasury activities impact the reported financial results of the SBUs. Each line of business within our SBUs is charged or credited with a market-based cost of funds on assets and liabilities, respectively, which impacts the revenue performance of the SBUs. Once the interest and liquidity risk inherent in our client-driven assets and liabilities is transfer priced into Treasury, it is managed within CIBC's risk framework and limits. The residual financial results associated with Treasury activities are reported in Corporate and Other. Capital is attributed to the SBUs in a manner that is intended to consistently measure and align economic costs with the underlying benefits and risks associated with SBU activities. Earnings on unattributed capital remain in Corporate and Other. We review our transfer pricing methodologies on an ongoing basis to ensure they reflect changing market environments and industry practices.

To measure and report the results of operations of the lines of business within our Retail and Business Banking and Wealth Management SBUs, we use a Manufacturer/Customer Segment/Distributor Management Model. The model uses certain estimates and allocation methodologies in the preparation of segmented financial information. Under this model, internal payments for sales and trailer commissions and distribution service fees are made among the lines of business and SBUs. Periodically, the sales and trailer commission rates paid to customer segments for certain products are revised and applied prospectively.

Non-interest expenses are attributed to the SBUs to which they relate based on appropriate criteria. Revenue, expenses, and other balance sheet resources related to certain activities are fully allocated to the lines of business within the SBUs.

The individual allowances and related provisions are reported in the respective SBUs. The collective allowances and related provisions are reported in Corporate and Other except for: (i) residential mortgages greater than 90 days delinquent; (ii) personal loans and scored small business loans greater than 30 days delinquent; and (iii) net write-offs for the cards portfolio, which are all reported in the respective SBUs. All allowances and related provisions for CIBC FirstCaribbean are reported in Corporate and Other.

14. Financial instruments – disclosures

We have provided quantitative disclosures related to credit risk consistent with Basel guidelines in the "Credit risk" section of the MD&A in our 2013 Annual Report and interim report to shareholders, which require entities to disclose their exposures based on how they manage their business and risks. The table below sets out the categories of the on-balance sheet exposure to credit risk under different Basel approaches, displayed in both accounting categories and Basel portfolios.
