(5) (6) Beginning in 2019, the capital ratios are calculated by reference to the same level of RWA. Prior to 2019, before any capital floor requirement, there were three different levels of RWA for the calculation of CIBC's CET1, Tier 1 and Total capital ratios as CIBC elected in 2014 to phase in the credit valuation adjustment (CVA) capital charge as permitted under the Office of the Superintendent of Financial Institutions (OSFI) guideline; different scalars were applied to the CVA included in the RWA calculation applicable to each of the three tiers of capital.

Revenue of \$503 million was up \$46 million from the fourth quarter of 2018, primarily due to loan growth and strong fee income, partially offset by margin compression.

Provision for credit losses of \$17 million was down \$23 million from the fourth quarter of 2018. The same quarter last year included a provision for credit losses on performing loans due to unfavourable credit migration within the performing portfolio. Provision for credit losses on impaired loans was down due to lower provisions in the U.S. commercial banking portfolio.

Non-interest expenses of \$286 million were up \$22 million from the fourth quarter of 2018, primarily due to higher spending on strategic initiatives.

Reported and adjusted⁽³⁾ net income for the quarter was \$226 million, compared with reported and adjusted net income of \$233 million for the fourth quarter of 2018.

Revenue of \$735 million was up \$86 million from the fourth quarter of 2018. In global markets, revenue was up driven by global markets financing activities, and our commodities, foreign exchange and equity derivatives trading businesses. In corporate and investment banking, revenue was up driven by higher corporate banking and debt underwriting activity, partially offset by lower advisory revenue.

Provision for credit losses was \$45 million, compared with reversal of credit losses of \$4 million in the fourth quarter of 2018. The current quarter included a provision for credit losses on performing loans due to an unfavourable change to our economic outlook and unfavourable credit migration within the performing portfolio. Provision for credit losses on impaired loans was up primarily due to higher provisions in the oil and gas sector.

Non-interest expenses of \$386 million were up \$30 million from the fourth quarter of 2018, primarily due to higher performance and employee-related compensation.

 Revenue and income taxes of Capital Markets and U.S. Commercial Banking and Wealth Management are reported on a TEB basis. The equivalent amounts are offset in the revenue and income taxes of Corporate and Other. Accordingly, revenue and income taxes include a TEB adjustment of \$48 million for the quarter ended October 31, 2019 (July 31, 2019: \$46 million; October 31, 2018: \$30 million).

(2) For additional information, see the "Non-GAAP measures" section.

Net loss for the quarter was \$120 million, compared with a net loss of \$97 million for the fourth quarter of 2018. Adjusted net loss ⁽²⁾ for the quarter was \$18 million, compared with an adjusted net loss of \$11 million for the fourth quarter of 2018.

Revenue of \$281 million was up \$122 million from the fourth quarter of 2018. International banking revenue was up as the prior year included incremental expected credit losses on debt securities in CIBC FirstCaribbean as a result of the Barbados government restructuring its public debt, shown as an item of note. Other revenue was up primarily due to interest income from the settlement of certain income tax matters, shown as an item of note, partially offset by a higher TEB adjustment.

Provision for credit losses was \$5 million, down \$25 million from the fourth quarter of 2018, as the fourth quarter of 2018 included a higher provision for credit losses on impaired loans in CIBC FirstCaribbean, which included losses on sovereign loans resulting from the Barbados government debt restructuring noted above. Non-interest expenses of \$480 million were up \$130 million from the fourth quarter of 2018, primarily due to a goodwill impairment charge related to the

expected sale of our controlling interest in CIBC FirstCaribbean and an increase in legal provisions, both shown as items of note.

Income tax benefit was down \$40 million from the fourth quarter of 2018, primarily due to lower losses.

Non-GAAP measures

We use a number of financial measures to assess the performance of our business lines. Some measures are calculated in accordance with International Financial Reporting Standards (IFRS or GAAP), while other measures do not have a standardized meaning under GAAP, and accordingly, these measures may not be comparable to similar measures used by other companies. Investors may find these non-GAAP measures useful in understanding how management views underlying business performance.

The following table provides a quarterly reconciliation of non-GAAP to GAAP measures related to CIBC on a consolidated basis. For a more detailed discussion and for an annual reconciliation of non-GAAP to GAAP measures, see the "Non-GAAP measures" section of CIBC's 2019 Annual Report.
