

Meet our Multi-Asset & Currency Management Team

Navigating global opportunities by unleashing the power of multi-asset & currency investments

CIBC Asset Management's Multi-Asset and Currency Management Team, led by Michael Sager, Ph.D., Managing Director & Head, integrates rigorous quantitative models with forward-looking fundamental judgment to identify active investment opportunities in currencies, bonds, equities, and multi-strategy portfolio solutions.

Investment philosophy

We believe that risk-aware quantamental (quantitative and fundamental) factor investing is the core of well-constructed portfolios. In our view, integrating diversified quantitative factor risk premiums, including carry, value, momentum, and cycle, with forward-looking fundamental analysis in a robust risk infrastructure is key to the creation of consistent active portfolio returns.

Investment process

Our investment processes integrate rigorous quantitative models with forward-looking macroeconomic fundamental and geopolitical analysis. This integration of models and judgment, as well as traditional and environmental, social and governance (ESG) risk factors is expected to provide robust diversification and performance across many different macroeconomic, market risk, and geopolitical environments.

What sets us apart

Integration of quantitative risk factor analysis with rigorous qualitative judgment

We integrate quantitative research with qualitative judgment within a robust portfolio construction framework by drawing on our collective experience and understanding of market trends and anomalies.

Strength of the team

Our team has 21 highly qualified investment professionals with an average industry experience of over 22 years. Collectively, the team has broad experience, including central bank research and policy advice, risk management, investment consulting, third-party research, and proprietary trading.

Almost 30 years of evolution with an unwavering north star

We have demonstrated our active multi-asset investing capabilities since 1996. Throughout this period, the team's investment philosophy has remained constant, allowing a coherent evolution of the investment strategy encompassing new data sources, innovative quantitative techniques, and traditional fundamental and ESG risk factor analysis.
