

Annual Management Report of Fund Performance

for the financial year ended December 31, 2023

All figures are reported in Canadian dollars unless otherwise noted.

This annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling toll-free at [1 888 888-3863](tel:18888883863), by emailing us at info@cibcassetmanagement.com, by writing to us at CIBC Square, 81 Bay Street, 20th floor, Toronto, Ontario, M5J 0E7, or by visiting our website at www.cibc.com/etfs or SEDAR+ at www.sedarplus.ca.

Unitholders may also contact us using one of these methods to request a copy of the investment fund's interim financial report, proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Investment Objective and Strategies

Investment Objective: CIBC Active Investment Grade Floating Rate Bond ETF (referred to as the *CIBC ETF*) seeks to generate current income while preserving capital by investing primarily in a portfolio of Canadian debt securities and by using interest rate derivatives that seek to mitigate the effect of interest rate fluctuations.

Investment Strategies: The CIBC ETF invests primarily in a portfolio of (i) Canadian investment-grade floating rate debt obligations and other floating rate debt instruments and/or (ii) Canadian investment-grade debt obligations and other debt instruments that deliver a fixed rate of income while using interest rate derivatives to mitigate the effect of interest rate fluctuations. The CIBC ETF undertakes a bottom-up analysis of bond issuers combined with a top-down analysis of an industry's potential in a given economic environment.

Risk

The CIBC ETF is a Canadian short term fixed income ETF that is suitable for short to medium term investors who can tolerate low investment risk.

For the period ended December 31, 2023, the CIBC ETF's overall level of risk remained as discussed in the prospectus.

Results of Operations

The CIBC ETF's portfolio advisor is CIBC Asset Management Inc. (referred to as *CAMI* or the *Portfolio Advisor*). The commentary that follows provides a summary of the results of operations for the period ended December 31, 2023. All dollar figures are expressed in thousands, unless otherwise indicated.

The CIBC ETF's net asset value increased by 22% during the period, from \$292,345 as at December 31, 2022 to \$357,512 as at December 31, 2023. Net sales of \$62,097 and positive investment performance resulted in an overall increase in net asset value.

The CIBC ETF posted a return of 5.6% for the period. The CIBC ETF's benchmark, the FTSE Canada Floating Rate Note Index (referred to as the *benchmark*), returned 5.4% for the same period. The CIBC ETF's return is after the deduction of fees and expenses, unlike the benchmark's return.

Canada's economy expanded over the first half of the period, buoyed by strong consumer spending and net exports. However, high inflation and rising borrowing costs weighed on households and businesses, eventually slowing consumer spending and hindering economic activity. Gross domestic product shrank in the third quarter of the period as exports dropped sharply.

Canada's labour market added jobs in most months, while the unemployment rate remained relatively low. Wage growth slowed but remained high.

In a continued effort to combat inflation, the Bank of Canada (referred to as the *BoC*) raised its benchmark overnight interest rate to 5.00% from 4.25% between January and July. With inflation and economic activity slowing, the BoC held the rate unchanged through its final three meetings of 2023. The BoC did not rule out the possibility of further interest rate increases, warning that core inflation (prices for goods other than food and energy) remained above its target.

The U.S. economy grew at a better-than-expected pace, as U.S. consumers benefited from higher savings, built up through the pandemic, and a robust labour market. U.S. business activity, as represented by manufacturing and services sector activity, was relatively weak given slower new orders and output.

The U.S. Federal Reserve Board (referred to as the *Fed*) raised the target range of its federal funds rate by a total of 100 basis points to end the period at 5.25%–5.50%. In December, Fed officials signalled expectations that interest rates could be reduced in 2024 given moderating inflation and slowing economic activity.

The Canadian yield curve, defined as the difference between two-year and 30-year bond yields, continued to invert as short-term interest rates rose while 30-year bond yields fell. Demand for Canadian long-term bonds remained exceptionally strong, partially as a result of a lack of supply. Canadian bonds outperformed U.S. bonds, partly owing to Canada's weaker economy relative to the U.S.

Corporate bonds outperformed as credit spreads (the difference in yield between corporate and government bonds with the same maturity) continued to narrow. This outperformance stemmed from strong demand for risk assets, materially lower issuance of new bonds and

better-than-anticipated profitability and credit fundamentals. However, corporate bond markets were volatile, particularly following the collapse of several U.S. regional banks in March. Regulators, the U.S. Treasury and the Fed quickly stepped in to help calm markets.

The CIBC ETF's exposure to short-term corporate bonds contributed to performance. Individual contributors to performance included floating rate bonds issued by Daimler Trucks Finance Canada Inc. (1.85%, 2023/12/15) and Glacier Credit Card Trust (2.28%, 2024/06/06).

The Portfolio Advisor added several new holdings to the CIBC ETF. Floating rate notes issued by Canada Housing Trust No. 1 (5.26%, 2026/09/15) and Province of Ontario (5.45%, 2028/11/27) were added to increase the portfolio's duration (sensitivity to changes in interest rates).

Several of the CIBC ETF's holdings were sold in order to take profits, including BMW Canada Auto Trust (5.43%, 2026/01/20), GMF Canada Leasing Trust (5.46%, 2025/04/21), Ford Auto Securitization Trust (5.21%, 2025/06/15) and BMW Canada Auto Trust (3.65%, 2024/12/20).

Recent Developments

Effective April 27, 2023, Bryan Houston was appointed Chair of the Independent Review Committee.

The COVID-19 pandemic and the Russia-Ukraine war have disrupted the global economy and financial markets in unprecedented and unpredictable ways. This has resulted in significant volatility and uncertainty in financial markets. It is unclear what further actions may be taken by governments and the resulting impact on global economies, businesses and financial markets. Inflation has increased in many markets across the globe, leading central banks to raise interest rates in order to counter rapidly rising prices. These factors may adversely affect the performance of the CIBC ETF. The Manager continues to monitor ongoing developments and the impact to investment strategies.

Related Party Transactions

Canadian Imperial Bank of Commerce (referred to as *CIBC*) and its affiliates have the following roles and responsibilities with respect to the CIBC ETF, and receive the fees described below in connection with their roles and responsibilities.

Manager, Trustee, and Portfolio Advisor of the CIBC ETF

CAMI, a wholly-owned subsidiary of CIBC, is the CIBC ETF's Manager, Trustee, and Portfolio Advisor. CAMI receives management fees with respect to the CIBC ETF's day-to-day business and operations, calculated based on the net asset value of units of the CIBC ETF as described in *Management Fees*. As Trustee, CAMI holds title to the CIBC ETF's property (cash and securities) on behalf of its unitholders. As Portfolio Advisor, CAMI provides, or arranges to provide for, investment advice and portfolio management services to the CIBC ETF. CAMI also compensates dealers in connection with their marketing activities regarding the CIBC ETF. From time to time, CAMI may invest in units of the CIBC ETF.

Designated Broker and Dealer

CAMI has entered into an agreement with CIBC World Markets Inc. (referred to as *CIBC WM*), an affiliate of CAMI, to act as designated broker and dealer for distribution of the CIBC ETF, on terms and

conditions that are comparable to arm's length agreements in the exchange traded funds industry.

Brokerage Arrangements and Soft Dollars

The Portfolio Advisor makes decisions, including the selection of markets and dealers and the negotiation of commissions, with respect to the purchase and sale of portfolio securities, certain derivative products and the execution of portfolio transactions. Brokerage business may be allocated by the Portfolio Advisor to CIBC WM and CIBC World Markets Corp., each a subsidiary of CIBC. CIBC WM and CIBC World Markets Corp. may also earn spreads on the sale of fixed income and other securities, and certain derivative products to the CIBC ETF. A spread is the difference between the bid and ask prices for a security in the applicable marketplace, with respect to the execution of portfolio transactions. The spread will differ based upon various factors such as the nature and liquidity of the security.

Dealers, including CIBC WM and CIBC World Markets Corp., may furnish goods and services, other than order execution, to the Portfolio Advisor when they process trades through them (referred to in the industry as "soft-dollar" arrangements). These goods and services are paid for with a portion of the brokerage commissions and assist the Portfolio Advisor with investment decision-making services for the CIBC ETF or relate directly to the execution of portfolio transactions on behalf of the CIBC ETF. Any soft dollar arrangements shall be in compliance with applicable laws.

During the period, the CIBC ETF did not pay any brokerage commissions or other fees to CIBC WM or CIBC World Markets Corp. Spreads associated with fixed income and other securities are not ascertainable and, for that reason, cannot be included when determining these amounts.

CIBC ETF Transactions

The CIBC ETF may enter into one or more of the following transactions (referred to as the *Related Party Transactions*) in reliance on the standing instructions issued by the Independent Review Committee (referred to as referred to as the *IRC*):

- to invest in or hold equity securities of CIBC or issuers related to the Portfolio Advisor;
- to invest in or hold non-exchange-traded debt securities of CIBC or an issuer related to CIBC in a primary offering and in the secondary market;
- to make an investment in the securities of an issuer for which CIBC WM, CIBC World Markets Corp., or any affiliate of CIBC (a "Related Dealer" or the "Related Dealers") acts as an underwriter during the offering of the securities or at any time during the 60-day period following the completion of the offering of such securities, including in respect of equity securities of a reporting issuer pursuant to a "private placement" offering (an offering under exemptions from the prospectus requirements) and for the 60-day period following the completion of the offering, in each case in accordance with certain conditions;
- to purchase equity and debt securities from, or sell them to, a Related Dealer, where it is acting as principal;
- undertake currency and currency derivative transactions where a Related Dealer is the counterparty;

- to purchase securities from, or sell securities to, another investment fund or a managed account managed by the Manager or an affiliate (referred to as *inter-fund trades* or "*cross-trades*"), subject to certain conditions; and
- to engage in in-specie transfers by receiving portfolio securities from, or delivering portfolio securities to, a managed account or another investment fund managed by the Manager or an affiliate in respect of a purchase or redemption of Units of the CIBC ETF, subject to certain conditions.

At least annually, the IRC reviews the Related Party Transactions for which they have issued standing instructions. The IRC is required to advise the Canadian securities regulatory authorities, after a matter has been referred or reported to the IRC by the Manager, if it determines that an investment decision was not made in accordance with a condition imposed by securities legislation or the IRC in any Related Party Transactions requiring its approval.

Custodian

CIBC Mellon Trust Company is the custodian of the CIBC ETF (referred to as the *Custodian*). The Custodian holds cash, securities, and other assets of the CIBC ETF and ensures that those assets are kept separate from any other cash, securities, or other assets that the custodian might be holding. The Custodian also provides other services to the CIBC ETF including record-keeping and processing of foreign exchange transactions. The fees and spreads for the services of the Custodian are paid by the Manager. CIBC owns a 50% interest in the Custodian.

Service Provider

CIBC Mellon Global Securities Services Company Inc. (referred to as CIBC GSS) provides certain services to the CIBC ETF, including securities lending, fund accounting and reporting, and portfolio valuation. Such servicing fees are paid by the Manager. CIBC indirectly owns a 50% interest in CIBC GSS.

CIBC Active Investment Grade Floating Rate Bond ETF

Financial Highlights

The following tables show selected key financial information about the CIBC ETF and are intended to help you understand the CIBC ETF's financial performance for the period ended December 31.

The CIBC ETF's Net Assets per Unit¹ - Common Units

Inception date: January 22, 2019

^a Information presented is for the period from the inception date to December 31.

^b Initial offering price.

* Ratio has been annualized.

¹ This information is derived from the CIBC ETF's audited annual financial statements.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The total increase (decrease) from operations is based on the weighted average number of units outstanding during the period.

³ Distributions were paid in cash, reinvested in additional units of the CIBC ETF, or both.

⁴ This information is presented as at December 31 of the period(s) shown.

⁵ Management expense ratio is based on the total expenses of the CIBC ETF (excluding commissions and other portfolio transaction costs), incurred by or allocated to a series of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that series during the period. The management expense ratio includes the fees attributable to exchange traded funds, where applicable.

⁶ The decision to waive management fees is at the discretion of the Manager. The practice of waiving management fees may continue indefinitely or may be terminated at any time without notice to unitholders. The management expense ratio before waivers or absorptions includes the fees attributable to exchange traded funds, where applicable.

⁷ The trading expense ratio represents total commissions and other portfolio transaction costs before income taxes expressed as an annualized percentage of the daily average net asset value during the period. Spreads associated with fixed income securities trading are not ascertainable and, for that reason, are not included in the trading expense ratio calculation.

⁸ The portfolio turnover rate indicates how actively the portfolio advisor and/or portfolio sub-advisor manages the portfolio investments. A portfolio turnover rate of 100% is equivalent to the CIBC ETF buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate in a period, the greater the trading costs payable by the CIBC ETF in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the CIBC ETF.

Management Fees

The CIBC ETF pays CAMI an annual management fee to cover the costs of managing the CIBC ETF. Management fees are based on the CIBC ETF's net asset value and are calculated daily and paid monthly. Management fees are paid to CAMI in consideration for providing, or arranging for the provision of, management, distribution, and portfolio advisory services. Advertising and promotional expenses, and office overhead expenses related to the Manager's activities and the fees of the Portfolio Advisor are paid by CAMI out of the management fees received from the CIBC ETFs. The CIBC ETF is required to pay applicable taxes on the management fees paid to CAMI. Refer to the CIBC ETF's prospectus for the annual management fee rate.

For the period ended December 31, 2023, 100% of the management fees collected from the CIBC ETF was attributable to general administration and investment advice.

Past Performance

The performance data provided assumes reinvestment of distributions only and does not take into account sales, redemption, distribution, or other optional charges payable by any unitholder that would have reduced returns. Past performance does not necessarily indicate how a fund will perform in the future.

The CIBC ETF's returns are after the deduction of fees and expenses. See the *Financial Highlights* section for the management expense ratio.

Year-by-Year Returns

These bar charts show the annual performance of each series of units of the CIBC ETF for each of the periods shown, and illustrate how the performance has changed from period to period. These bar charts show, in percentage terms, how an investment made on January 1 would have increased or decreased by December 31, unless otherwise indicated.

[†] 2019 return is for the period from January 22, 2019 to December 31, 2019.

Annual Compound Returns

This table shows the annual compound return of the CIBC ETF for each indicated period ended on December 31, 2023. The annual compound total return is also compared to the CIBC ETF's benchmark(s).

The CIBC ETF's benchmark is the FTSE Canada Floating Rate Note Index.

	1 Year (%)	3 Years (%)	5 Years (%)	10 Years* (%)	or Since Inception* (%)	Inception Date
Common Units	5.6	2.4			2.1	January 22, 2019
FTSE Canada Floating Rate Note Index	5.4	2.5			2.2	

* If a class of units has been outstanding for less than 10 years, the annual compound return since inception is shown.

FTSE Canada Floating Rate Note Index is designed to reflect the performance of domestic Canadian Government and Corporate Floating Rate Note securities denominated in CAD. FTSE Canada 91 Day T-Bill Index measures the returns attributable to 91-day Treasury Bills.

A discussion of the CIBC ETF's relative performance compared to its benchmark(s) can be found in *Results of Operations*.

		Bank of America Corp., Floating Rate, Callable, 6.03%, 2027/09/15	2.2
		Athene Global Funding, Floating Rate, 5.93%, 2024/04/09	2.1
		AltaGas Ltd., Callable, 4.40%, 2024/03/15	2.0
		Morgan Stanley, Floating Rate, Callable, 5.76%, 2025/03/21	1.9

A note on forward-looking statements

The management report of fund performance may contain forward-looking statements. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", or other similar wording. In addition, any statements that may be made concerning future performance, strategies, or prospects and possible future actions taken by the CIBC ETF, are also forward-looking statements. Forward-looking statements are not guarantees of future performance. These statements involve known and unknown risks, uncertainties, and other factors that may cause the actual results and achievements of the CIBC ETF to differ materially from those expressed or implied by such statements. Such factors include, but are not limited to: general economic, market, and business conditions; fluctuations in securities prices, interest rates, and foreign currency exchange rates; changes in government regulations; and catastrophic events.

The above list of important factors that may affect future results is not exhaustive. Before making any investment decisions, we encourage you to consider these and other factors carefully. CIBC Asset Management Inc. does not undertake, and specifically disclaims, any obligation to update or revise any forward-looking statements, whether as a result of new information, future developments, or otherwise prior to the release of the next management report of fund performance.
