#### Management Discussion of Fund Performance

##### Investment Objective and Strategies

Investment Objective: CIBC European Equity Fund (the *Fund*) seeks to provide long-term growth through capital appreciation by investing primarily in equity securities of medium to large companies, located in select member countries of the European Union, as well as securities of companies in other European countries with established stock exchanges, and in less developed European countries.

Investment Strategies: The Fund focuses on industries that have generated consistent and predictable, above-average earnings by investing in securities such as common shares, preferred shares, convertible bonds, and warrants.

##### Risk

The Fund is a European equity fund that is suitable for long-term investors who can tolerate medium investment risk.

For the period ended December 31, 2016, the Fund's overall level of risk remains as discussed in the simplified prospectus.

##### Results of Operations

The portfolio advisor of the Fund is CIBC Asset Management Inc. (CAMI or the *Portfolio Advisor*). The commentary that follows provides a summary of the results of operations for the period ended December 31, 2016. All dollar figures are expressed in thousands, unless otherwise indicated.

The Fund's net asset value increased by 1% during the period, from \$255,160 as at December 31, 2015 to \$256,450 as at December 31, 2016. Net sales of \$44,113 were partially offset by negative investment performance, resulting in an overall increase in net asset value.

Class A units of the Fund posted a return of -18.1% for the period. The Fund's benchmark, the MSCI Europe Index (the *benchmark*), returned -3.2% for the same period. The Fund's return is after the deduction of fees and expenses, unlike the benchmark. See *Past Performance* for the returns of other classes of units offered by the Fund.

European economic growth remained slow throughout 2016. The European Central Bank maintained its quantitative easing policies (buying securities from the market in order to lower interest rates and increase the money supply) to keep lending rates low (and negative in some countries). The U.K.'s vote to exit the European Union (*Brexit*) in June contributed to significant volatility within the U.K. and major continental European equity markets.

Significant individual detractors from the Fund's performance included Wirecard AG and Kerry Group PLC. Wirecard reported disappointing 2015 results. The company, along with the rest of the financial technology and payments industry, has faced increased competition requiring greater investment in research and development and pricing concessions. Kerry Group detracted as deflationary challenges affected food pricing while volumes remained stable. Koninklijke DSM NV was a moderate detractor from the Fund's performance. The company's share price appreciation was strong in first half of the year but moderated in second half. Vitamin E priced stabilized at lower levels, creating concern among some investors.

Ypsomed Holding AG was a significant contributor to the Fund's performance, as the company continued to benefit from solid end-market demand for medical injection pens and systems. Fresenius SE was a moderate contributor to performance as a result of robust demand for dialysis treatments, clinical care and blood products. Nestlé SA was a slight contributor despite share price volatility. The company began to experience a moderate growth slowdown across emerging markets, but remains a steady performer overall in key consumer segments.

The Portfolio Advisor added Compass Group PLC to the Fund for its strong competitive positioning in the high-growth U.S. market, and for its leading position in the catering and corporate meals market. The Fund's holding in Total SA was increased to increase exposure to the energy sector as the price of oil recovered from lows earlier in the year. Pernod-Ricard SA was eliminated as a result of weakness in demand coming from emerging markets exposure. In addition, the company's margins continue to be under pressure. The Fund's holding

in Industria de Diseno Textil SA was trimmed as its equity valuation reached a high level as a result of the company's strong operating results and leading market position.

### Recent Developments

Effective September 6, 2016, the maximum annual management fee was reduced from 2.25% to 2.00% and the maximum annual trailing commission was reduced from 1.25% to 1.00% for Class A units of the Fund.

Effective April 27, 2016, the composition of the Independent Review Committee (*IRC*) changed. John Crow resigned his position as member and Chair. Marcia Lewis Brown was appointed as member and Don Hunter was appointed as Chair.

### Related Party Transactions

Canadian Imperial Bank of Commerce (*CIBC*) and its affiliates have the following roles and responsibilities with respect to the Fund, and receive the fees described below in connection with their roles and responsibilities.

#### Manager

CIBC is the Manager of the Fund. CIBC receives management fees with respect to the day-to-day business and operations of the Fund, calculated based on the net asset value of each respective class of units of the Fund as described in the section entitled *Management Fees*. The Manager also compensates its wholesalers in connection with their marketing activities regarding the Fund. From time to time, CIBC may provide seed capital to the Fund.

#### Trustee

CIBC Trust Corporation, a wholly-owned subsidiary of CIBC, is the trustee (the *Trustee*) of the Fund. The Trustee holds title to the property (cash and securities) of the Fund on behalf of its unitholders.

#### Portfolio Advisor

The portfolio advisor provides, or arranges to provide, investment advice and portfolio management services to the Fund. CAMI, a wholly-owned subsidiary of CIBC, is the portfolio advisor of the Fund.

#### Distributor

Dealers and other firms sell the units of the Fund to investors. These dealers and other firms include CIBC's related dealers such as the principal distributor, CIBC Securities Inc. (*CIBC SI*), the CIBC Investor's Edge discount brokerage division of CIBC Investor Services Inc. (*CIBC ISI*), the CIBC Imperial Service division of CIBC ISI, and the CIBC Wood Gundy division of CIBC World Markets Inc. (*CIBC WM*). CIBC SI, CIBC ISI, and CIBC WM are wholly-owned subsidiaries of CIBC.

CIBC may pay trailing commissions to these dealers and firms in connection with the sale of units of the Fund. These dealers and other firms may pay a portion of these trailing commissions to their advisors who sell units of the Fund to investors.

### Brokerage Arrangements and Soft Dollars

The Portfolio Advisor makes decisions, including the selection of markets and dealers and the negotiation of commissions, with respect to the purchase and sale of portfolio securities, certain derivative products and the execution of portfolio transactions. Brokerage business may be allocated by the Portfolio Advisor to CIBC WM and CIBC World Markets Corp., each a subsidiary of CIBC. CIBC WM and CIBC World Markets Corp. may also earn spreads on the sale of fixed income securities and other securities and certain derivative products to the Fund. A spread is the difference between the bid and ask prices for a security in the applicable marketplace, with respect to the execution of portfolio transactions. The spread will differ based upon various factors such as the type and liquidity of the security.

Dealers, including CIBC WM and CIBC World Markets Corp., may furnish goods and services, other than order execution, to the Portfolio Advisor in partial exchange for processing trades through them (referred to in the industry as "soft dollar" arrangements). These goods and services are paid for with a portion of the brokerage commissions and assist the Portfolio Advisor with investment decision-making services for the Fund or relate directly to the execution of portfolio transactions on behalf of the Fund.

In addition, CIBC may enter into commission recapture arrangements with certain dealers with respect to the Fund. Any commission recaptured will be paid to the Fund.

During the period, the Fund paid brokerage commissions and other fees of \$81,163 to CIBC WM; the Fund did not pay any brokerage commissions or other fees to CIBC World Markets Corp. Spreads associated with fixed income and other securities are not ascertainable and, for that reason, cannot be included when determining these amounts.

### Fund Transactions

The Fund may enter into one or more of the following transactions (the *Related Party Transactions*) in reliance on the standing instructions issued by the IRC:

- invest in or hold equity securities of CIBC or issuers related to a portfolio sub-advisor;
- invest in or hold non-exchange-traded debt securities of CIBC or an issuer related to CIBC in a primary offering and in the secondary market;
- make an investment in the securities of an issuer for which CIBC WM, CIBC World Markets Corp., or any affiliate of CIBC (a *Related Dealer*) acts as an underwriter during the offering of the securities at any time during the 60-day period following the completion of the offering of such securities (in the case of a "private placement" offering, in accordance with the exemptive relief order granted by the Canadian securities regulatory authorities and in accordance with the policies and procedures relating to such investment);
- purchase equity or debt securities from or sell them to a Related Dealer, where it is acting as principal;

- undertake currency and currency derivative transactions where a Related Dealer is the counterparty; and
- purchase securities from or sell securities to another investment fund or a managed account managed by the Manager or an affiliate of the Manager.

At least annually, the IRC reviews the Related Party Transactions for which they have issued standing instructions. The IRC is required to advise the Canadian securities regulatory authorities, after a matter has been referred or reported to the IRC by the Manager, if it determines that an investment decision was not made in accordance with conditions of its approval.

#### *Custodian*

CIBC Mellon Trust Company is the custodian of the Fund (the *Custodian*). The Custodian holds all cash and securities for the Fund and ensures that those assets are kept separate from any other cash or securities that the Custodian might be holding. The Custodian also provides other services to the Fund including record-keeping and processing of foreign exchange transactions. The Custodian may hire sub-custodians for the Fund. The fees and spreads for services of the Custodian directly related to the execution of portfolio transactions by the Fund are paid by CAMI and/or dealer(s) directed by CAMI, up to the amount of the credits generated under soft dollar arrangements from trading on behalf of the Fund during that month. All other fees and spreads for the services of the Custodian are paid by the Manager and charged to the Fund on a recoverable basis. CIBC owns a 50% interest in the Custodian.

#### *Service Provider*

CIBC Mellon Global Securities Services Company (*CIBC GSS*) provides certain services to the Fund, including securities lending, fund accounting and reporting, and portfolio valuation. Such servicing fees are paid by the Manager and charged to the Fund on a recoverable basis. CIBC indirectly owns a 50% interest in CIBC GSS.

<sup>1</sup> This information is derived from the Fund's audited annual financial statements. The Fund adopted International Financial Reporting Standards (*IFRS*) on January 1, 2014. Previously, the Fund prepared its financial statements in accordance with Canadian Generally Accepted Accounting Principles (*GAAP*) as defined in Part V of the CPA Canada Handbook. Under Canadian GAAP, the Fund measured fair values of its investments in accordance with CICA Handbook Section 3855 which required the use of bid prices for long positions and ask prices for short positions. As such, the net assets per unit figure presented in the financial statements may differ from the net asset value calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements issued prior to January 1, 2014. Upon adoption of IFRS, the Fund measures the fair value of its investments by using the close market prices, where the close market price falls within the bid-ask spread. As such, the Fund's accounting policies for measuring the fair value of investments in the financial statements are consistent with those used in measuring the net asset value for transactions with unitholders. Accordingly, the opening net asset figure as at January 1, 2013 was restated to reflect accounting policy adjustments made in accordance with IFRS. All figures presented for periods prior to January 1, 2013 were prepared in accordance with Canadian GAAP and subsequent thereto were prepared in accordance with IFRS.

<sup>2</sup> Net assets and distributions are based on the actual number of units outstanding at the relevant time. The total increase (decrease) from operations is based on the weighted average number of units outstanding during the period.

<sup>3</sup> Distributions were paid in cash, reinvested in additional units of the Fund, or both.

<b>Net Asset Value per Unit</b>	\$ 15.82	\$ 19.32	\$ 15.75	\$ 15.77	\$ 12.97

<sup>4</sup> This information is presented as at December 31 of the period(s) shown.

<sup>5</sup> Management expense ratio is based on the total expenses of the fund (excluding commissions and other portfolio transaction costs), incurred by or allocated to a class of units for the period shown, expressed as an annualized percentage of the daily average net asset value of that class during the period.

<sup>6</sup> The decision to waive and/or absorb management fees and operating expenses is at the discretion of the Manager. The practice of waiving and/or absorbing management fees and operating expenses may continue indefinitely or may be terminated at any time without notice to unitholders.

<sup>7</sup> The trading expense ratio represents total commissions and other portfolio transaction costs before income taxes expressed as an annualized percentage of the daily average net asset value during the period. Spreads associated with fixed income securities trading are not ascertainable and, for that reason, are not included in the trading expense ratio calculation.

<sup>8</sup> The portfolio turnover rate indicates how actively the portfolio advisor and/or portfolio sub-advisor manages the portfolio investments. A portfolio turnover rate of 100% is equivalent to a fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio turnover rate in a period, the greater the trading costs payable by a fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## Management Fees

The Fund, either directly or indirectly, pays an annual management fee to CIBC to cover the costs of managing the Fund. Management fees are based on the net asset value of the Fund and are calculated daily and paid monthly. Management fees are paid to CIBC in consideration for providing, or arranging for the provision of, management, distribution, and portfolio advisory services. Advertising and promotional expenses, office overhead expenses, trailing commissions, and the fees of the portfolio sub-advisor(s) are paid by CIBC out of the management fees received from the Fund. The Fund is required to pay applicable taxes on the management fees paid to CIBC. Refer to the Simplified Prospectus for the maximum annual management fee rate for each class of units. For Class O units, the management fee is negotiated with and paid by, or as directed by, unitholders or dealers and discretionary managers on behalf of unitholders. Such Class O management fee will not exceed the Class A unit management fee rate.

The following table shows a breakdown of the services received in consideration of the management fees, as a percentage of the management fees collected from the Fund for the period ended December 31, 2016. These amounts do not include waived fees or absorbed expenses.

	Class A Units
Sales and trailing commissions paid to dealers	26.39%
General administration, investment advice, and profit	73.61%

## Past Performance

The performance data provided assumes reinvestment of distributions only and does not take into account sales, redemption, distribution, or other optional charges payable by any unitholder that would have reduced returns. Past performance does not necessarily indicate how a fund will perform in the future.

The Fund's returns are after the deduction of fees and expenses, and the difference in returns between classes of units is primarily due to differences in the management expense ratio. See the section entitled *Financial Highlights* for the management expense ratio.

## Year-by-Year Returns

These bar charts show the annual performance of each class of units of the Fund for each of the periods shown, and illustrate how the performance has changed from period to period. These bar charts show, in percentage terms, how an investment made on January 1 would have increased or decreased by December 31, unless otherwise indicated.
